Boston a City that had watched the matters unfold and made a n impression on the developments of these consequences in a contribution to society. The clean City that has a atmosphere of number one city in the Country. As I ran my life away there in about 10 Boston Marathons, give or take a few. I trained every day there. Below a picture of the new Harvard all weather track, A must to visit and run on. George Washington, stay nearby at Harvard Business School during the Defending of the City Of Boston in American Revolution.

OFFICE OF THE GOVERNOR

April 26, 2004

Mr. Robert Judge
Post Office Box 209
Huntington, New York 11743

Dear Mr. Judge,

Thank you for the wonderful book, "My Eyes Have Seen the Glory". I appreciate your generous and thoughtful gesture of good will.

It is a tremendous honor to serve as the Governor of California, and I am grateful for your support.

Again, thank you for your kind gift. Please accept my best wishes for every future success and happiness.

With warm regards,

Arnold Schwarzenegger

MARIA SHRIVER
FIRST LADY OF CALIFORNIA

October 13, 2004

Mr. Robert E. Judge
P.O. Box 209
Huntington, NY 11743

Dear Mr. Judge,

Thank you very much for the information you provided First Lady Maria Shriver regarding your novel. After reviewing the materials, we were impressed by you accomplishments in school as well as your running abilities over the years in Boston.

However, the office is reviewing many outstanding programs and will be unable to provide a commitment at this time. Maria appreciates your thoughtful request but truly feels she cannot provide the devotion your book deserves. She currently has an extremely full schedule raising four children in addition to continuing her new journey as the First Lady of California.

It was so kind of you to think of her and we wish you great success with your book and many future endeavors. Thank you very much for your understanding. If you have any further questions, you may call her Chief of Staff Christine Stavem.

Sincerely,

Trish Fontana

Regarding the Appendix pages of the Suffolk County Library and Harvard College. To give reference to these acknowledgements with recognize honor. I adventured to Cambridge to visit a friend who was associate to Harvard College, and Published writer. This was in 1979. His name is Ethan Ayers, and his family Benjamin Johnson, and house Mother Mary. Ethan live a few houses down from Henry Wadsworth Longfellow, on Brattle Street Cambridge Massachusetts. I Moved up to Cambridge in 1980. I worked at 33 Dunster Street, as a dish washer at this time, and wrote a novel on poetry, to be published with McGraw Hill,NYC.: I was able to stay at Harvard College with a friend who was enrolled at Harvard, who was from Chicago. I lived with George J. Hooper, who was at Elliot House. This is a very famous house at Harvard. With many great man including Tommy Lee Jones, Vice President Al Gore, and the late President John F. Kennedy. There are many others alumni throughout the College, going back as far as the , "American Revolution". I worked and wrote in the library everyday, and ran distance to prepare for the Boston Marathon each year. This lasted for three years. The Harvard College is a special College that is perfect as being the number 1 College in America. The John F. Kennedy Library, had explained that my novel was not for their library as well as MIT University. However, the Harvard main Library accepted my first, and second novel, and I am acknowledging their inspiration on the merits of their chance to have my novel on their shelves for the students to read. Harvard works a friendship with society on equality and constitutional honor. Their help being available during my Harvard years. It is a place that is made from the quality of the same skills of the great minds of all times. The Executive office at the Harvard College Librarian, Ms. Jean Wheeler esq was visited and given a novel. Prior to visiting the Battle of Bunker Hill in downtown Boston, where the Main Library has a copy of this book. Where I obtain a pound of soil, to put on General Gilbert Lafayette family gravesite in Paris, as a traditional issues, that began after the American Revolution, with The Battle of Bunker Hill soil being provided to Gilbert Lafayette as he was honored in his own parade in Boston and given soil. Messier Lafayette Explained that he will use this soil on his family grave in Paris. Given the soil with the Keys to the City of Boston, as through the 13 Colonies he appeared and was given gifts. "For a Soldier that has it all."

While attending SUNY at Old Westbury after finishing High school in 1973. I took a poetry class in which was voted best poet with the poem that must start with," I wish". "I wish that, I was free, from the image that is me, eternity is such along time": While in College at Stony Brook, in 1978 was voted best model in Paris with the Pierre Cardin Collection. Pictures are available last week in February, 1978 Sunday papers Paris. The literature history at Stony Brook College, I maintain an A average in English for my last two years, and was accepted into Boston College Graduate School of English. Completing Most of my Boston Marathons, of the ten Boston Marathons run.

MINERVA PUBLISHING CO.

SUBMISSION REPORT

AUTHOR: Robert E. Judge

TITLE: My Flint Is in the Rock of My Soul

SUBMISSION: Full ms

DATE: 07/20/01

I was interested by the concept of Robert E. Judge's work, and I began reading his submission with an element of curiosity, eager to discover how the writing would unfold, and how the author would handle this ambitious project.

The following extract provides a good example of the author's style and the breadth and depth of subjects that his work covers:

The question where did man come from, after the beginning with Adam and Eve. The thought that production of North/South Poles compounds, raw materials, are in existence from outer space, pulled from the magnetic powers. Therefore, it is reasonable to think that the chemical combination with other elements, are different at this point. Rocks, from other planets, are found at this location. Beginning millions of years of traveling in outer space, and traveling into the encroachment of the polar forces, downward surface of the earth. The North/South Pole produces a vacuum for objects.

The themes are complex, and the ramifications are wide-ranging, but Robert E. Judge never seeks to baffle the reader, rather acting as a guide through the corridors of history, geography and social exploration, to uncover the truth about existence.

I would like to see the inclusion of some of the photographic material submitted with this manuscript. Our proposal would include an eight-side black and white photo section to display these images. Of course, the copyright issues involved with the reproduction of any images would need to be addressed by the author. We can offer guidance on this point.

With these thoughts I would like to reiterate my interest in Robert E. Judge's work, and reinforce that interest with my recommendation that *My Flint Is in the Rock of My Soul* be accepted for publication under the Minerva Publishing Co. imprint.

Forward

" My eyes have seen the glory" Volume One, is the second edition. Both novels are covering a focus on the question, " "The American Revolution," "The Declaration of Independence", "The Monroe Doctrine", policies are the future of America. The understanding of analyzing old clay pieces that were baked and set aside by America' first civilization. Reasoning with these issues to understanding the Human Beings ideas and sign messages of what they are experiencing in Ancient Stone Age. This particular survey not having a sociological point of view on the Human Beings of 100,000 years ago, is through physics. What had been the thoughts of the Ancients to understand the situation of today modern civilization by surveying the stone structure they had erected. Atoms are all components of the physics, on Dolman stone being held up through dynamics that are advance physics.

The second edition explains the principles of Primary relationships and Secondary relationships through Hitch Hiking in the United States during the early 1970's. The point being without prejudice. That the people who give a hitch hike are usually a advance enlightened intellectual.

My goal is to add a sociological past to our ancients through their work. The passing on of the first civilization to next civilization and each generation. What can serve civilization and its obstacles that cause the reactions that is important to the cosmos of mankind.

After the breakdown of what is the stone being selected for the Dolman is composed of in atoms. The made ingredients Friction, Gravity and Centrifugal are the advance physics. The power of the structures life is utilized in the Dolman and Stonehenge. These structures were erected in Europe. Because they are still in existence, that it is a "Tour de force", of the civilization that had gone extinct. From the extinction the answer to why extinction occurred can be answered in the Dolmen.

For example the reader uses their own Dolmen type of survey. The Dolman is the point where the reader knows exactly where he, or she is. To be centered as a compass. As the Golden Gate Bridge maybe the center! Or with Empire State Building. Visiting San Francisco, or New York City. I was able to do this in Paris with the Arc de Triomphe. This is a secondary survey that exist on this issue. The primary being the physics. The Dolman stands with and without support. A focus on the engineering, with astronomy and the sun and moon, having neighboring formation in view.

This book is of these various subjects. That the qualities of ancient civilization that are studied wanted the future of mankind to explore.

During the pilgrimage of carrying the huge stones, there was a understanding hard rock had been joined by the group and will maintain a collective consciousness for its duration.

Beginning with our prayers and hopes, and maintaining young readers trust in the "Declaration Independence."," The Monroe Doctrine", for world peace. The Author explains how hitch hiking is an insight on the world without a need for policy in economics.. As the above policy has allowed the freedom of the open road in the U.S.A. by Hitch hiking. The self sufficient hitch hikers, are cause/effect of freedom. A free country, that allows its children to discovery its beauty. In sun & rain. Jumping into the cars and trucks, hitchers thumb drivers down. The discovery of the different States, are mentioned in passing in this book. The real experience is doing the event, because it is a free and wonderful development. The driver's are wonderful , because they are the free world. He shares his food and drink to make life less stressful for the hiker. A great help in restored faith in mankind, for hitch hikers. A battle on the war on poverty is won. The great hitch hikers who have decided to see a America by hitching rides, and feeling free, to keep trucking. The New World; A free society, that has a humanitarian equality established. There is only the relationship of the free world, and its wonders .
This is a place that a road, with running water and food are available for free. If the hitch hiker lacks money. The driver shares, as most share food, and drink, and help. This is the common bond of power and freedom. That it takes this issue to be able to analyze the drama of mankind. Hitching and providing help to civilization, is important for the growth of U.S., by maintaining an action that will keep the mental hygiene of mankind in a greater position, than if the car driver past by a free spirit Hitch hiker. From this renewal of social relationship and kindness, the unilateral help cycle carries a positive charge from the help of a Good Samaritan. The social democracy, consistent of friendship, & good will that was non-existent, prior to the hitch hiking and not having met .
A friend in need is a friend indeed.
Studying the orbit of the elements are in a social relationship. With a feeling that had not existed for a duration of no help. A brotherhood relationship with the kindness shared by both rider/driver in nature an the universe. Henry D. Thoreau altruism and physical science, to share with nature. Mt. Ktaadn, & Thoreau nature is an individual event, state, nation, and universe. These all stay in the neutrons,& atomic nuclei, a positive an equal charges.
Mt Ktaadn, is a natural event with the northern lights star constellation.
Mt. Ktaadn, has northern lights categories, analysis of the far north.
The top of Ktaadin is a facsimile utopia by nature, resting at 1mile up.
Grand Junction Colorado, is not perpendicular at 1 mile up, to Ktaadn.
Hitch hiking into the U.S. mountains are extremely different from one another. Maine rest across the US to State of Washington, on the Canada boarder.

Climbing Mt Ktaadn in Maine.I hitch hiked there twice, & climbed Mt Ktaadn twice. The composition of the universe in a atomic form. Nature is composed of a mass in Science. At Ktaadn, Man is able to experience the levels of earth from creation. Drinking water from a spring on Ktaadn, to taste the earth. Man's preservation through the natural elements of forestry. Sociology, psychology, history, anthropology are important quintessence of the universe, and elements in nature. . The trees, the flowers , and mountains, are natural, with a natural understanding. Thoreau is a society with in a society that is able to have reason as Thoreau reason. Thoreau retreats from this society and starts his own Society. He writes about his new society, and he keeps himself busy. Rather than just hanging out as Common Wealth . The presents of spiritual power, Thoreau believes exists in all life, in insects and trees. Coexisting, spirit and man, are living together in spirit quintessence. The spirit being with the quintessence of the physical universe. This spirit will reproduce the life of civilization in spirit and physical universe. Having spiritual enlightenment education with God and self. The greatest is the immediate socialization as the Good Samaritan; An example, of the driver pulling over to pick someone off the ramp. He is the truth, and the way. The driver is psychological ,"the man", the Hero of the universe. The school of thought is to provide to the world Help, without being repaid for the help that is given. A provision of a spiritual social function, that keeps the world a better place to live. Henry D. Thoreau, profound feelings for the earth organic universe. Energy and Matter reactions on the Maine Mountains Ranges. A design that is a miracle of God's power. Thoreau's life is in the search for the reason why all that is in nature has a reason, man must use this reason to understand the species of the all the universe. Most High Schools graduates have read Thoreau in the U. S. and is recognized as the best forefather of the natural universe. My experiences are surveying the natural universe, and to examine the greats of the Physical Universe as Thoreau. In his novels, he lives in the environment an its hardships and miracles. His struggles are stated in his books. The issues of being in the wilderness, an facing the hardships enables many young readers to do the same, when they are camping, or confronted with a extreme struggles. Thoreau' quotes," there is no remedy for love but to love more. How rarely a man's love for nature becomes a ruling principle with him, like a youth affection for a maiden,but more enduring! All nature is my bride." Quoted " The Heart of Thoreau's Journals"

A" tour de force" with nature and the natural enlightenment that is a sought issue on being a free man. The quintessence of the physical universe. It is through Thoreau that nature can be analyzed. East, West, North, to South, high altitudes and very low latitudes. Nature is a formulation of hitching and visiting the earth moving and maneuvering together in harmony. Enlighten by the natural life of a
stranger who is aware of the hitch hiker fun on the road. Rain drops bring you closer to the feeling of baptism and God love, each drop is of this wonder. A natural experience as, getting a little wet is a good feeling. A car Driver who picks up a hitch hiker is a Valedictorian in my eyes, as a human being, helping others in need. Perhaps he remembers the time when he was hitch hiking and the hardships that exist in this event. The weather, the Police, and the fact of not getting a ride all have a breaking point, that causes the issue to be an ordeal. The driver is a past displaced person. He is a greater person, from all experiences of being now able to have enough character to add the society; The driver, becomes a big brother, in some cases the father to the Hitch hiker. While driving along, The hitch hiker dreams of his goals coming true. If he can get a hitch, he can do anything. Life makes more sense while riding along. Mountains, and beautiful valley's. Reading Thoreau's Walden, happiness. Henry Thoreau worship nature to a degree. The Wiedenhaefer family, being Christian, nature is God. That to be in nature is to be with God. Paul and Vera and children, were a group that did things together. They shared their food, and help the forest ecologically.
They were a Lewis &Clark family who had to be an example of the great frontier family of the 19th. Century. The reason being, is that greatness, has to be maintained, or it will die, and as flowers die, it too will reseed. To keep this history in the back of the readers mind, because it is all linked to either guts, or no guts. One must be courageous, and to be sincere, & pertinent. The Navajos were much like the elements.
This beauty is from the light of God's enlightenment, bliss to walk free and to love the world, as Thoreau wrote in 1840. A knowledge in the 20 century through fate, and fun. Human experiences, enable us to be an explorer of Gods earth forest wonders.The wonders of matter being formed in a forest that is ripe as a apple, and sweet as a strawberry. Through great enlightenment, God is reached. Based
on the vision of a prospective understanding that the experiences categories correspondence with the spiritual happiness. A social affair to visit nature, to drink from a stream, to feel the sun on your face. The feelings of super abundant optimism enlightened from nature. Thoreau the great dignitary of nature. The Walden Pond periods, correspond a ideology of the senses and days living at Walden Pond, listening to the pond sing frozen ice songs, as Henry throws a stone on the ice.

The wild nature is never tamed with our domesticated restrains. The emphasis of understanding the universe. The scholarly interpretation in colorful country in the US.. The same place that was here thousands of years ago. Mimicry of first settlers of the North America. The winds, of the low latitudes, 10 thousand years ago are still a zooming along. The. California Desert is brutal if you are living in a cool spot, and move or visit the Mohave. The history of deserts and size dose not list the Mohave in the 10 of this eminent domain. I visited the hottest place in the America. It was being controlled by the Police Department. If any hitch hikers showed up, the Police would arrest the Hitch hikers .The emigration of Boarder crosses from Mexico, made Police action. If this is why the PD bird dogging the people in El Centro California, Center of Mohave. The country had been crossed without any trouble. Almost tranquil experience. The hitching was great. The insincere desert in which is as a different planet, cooling contracting in the night, was now roasting me in the hot August day. The rides were poverty stricken in the Center, or El Centro, a place that magnifies the heat to over a 100 degree daily. In fact it melts down the streets, and there is nothing to relief this melt down effect. I walked the highway with great stress. The police car stopped issued me a warning ticket. The usual course of action at this location. An agricultural society. The expertness of a keen hitch hiker is no match for the extraordinary procurement of hitching at this location. There are desert flowers, and wild grass, and plants. In ancient times, there was Air Force free falling contest. In which the Air force Free fall record in El Centro, at this time was 350 feet. Set by Air Force Officer Pelcher. The same name as my friend from New York, Who live in Blythe California. The focus of proficiency in fate, and amazing feelings. George Pelcher, from Hicksville,A Blythe California football player. . Here I am stuck in El Centro, and George Pelcher name is in the record books . This issue advocates, that I am not just being left here. I had been told by the Police, that if you left the Ramp, that they would go to jail for 30 days. The El Centro town was old telegraphy wires, all sand, without most of the comforts of most places. The atmosphere climate was at 100 degrees day, 90 at night. The 20 people were hanging out together, sharing stories about their hitch hiking events. Hitch hikers all received a Police ticket..The next issue was being jailed. I love Cher Bono, She is a great singer and actress. El Centro was her home town. Cher is special, because she is from El Centro a place in the sun. .A sun town in the great USA. The heat, the spirit of the Californian Gold Rush, in which gold was found in Death Valley, just a few miles away.

My return through El Centro California was on a bicycle that I paid for in Tucson Arizona, in October 1998. I got on the a trek and drove off to the West Coast, on Interstate 10, El Centro being Interstate 8. During my adventure, I had to stop at Palm Springs, California; In which meant riding on Interstate 10 all the way, and passing the sign to Interstate 8, with El Centro written on it. The police in both states, Arizona, and California had saw me riding. In Arizona an Indian Police man made me ride in a car with my bicycle, to break my balls. I was near Phoenix. I got a ride to there, and began paddling, stopping at Arizona State University, in which is where George Pelcher explained in forward pages, had transfer to, from Blythe California. It was nice to revisit the Arizona State Campus, on bicycle. I had also had a girl friend who attended the school in 1980. She and I departed our separate ways at this time, never to have been seen again. There is a issue of having the departing of the ways with her and never to have her in my eyes. She is a girl that I was in love with, who was not in the exact frame of mind. That had to leave me and go off to Arizona State. The entire time riding my bicycle, and fearing the police enforcing the law on riding on the Interstate, and her relationship going off in 90 degree weather that had made the ride a burden. However, I just kept pumping my legs and sweating bullets, until I was far away from the area. I stop in a rest area a few times riding on the Interstate. I did not know if the police would have a situation about the journey. It took a few days to arrive in Palm Springs California, my first stop. I had bicycle issues, and had to fix the bicycle there. I had a trial for a situation in which had caused a postponement. Here I came all the way from New York, and took a bicycle from Tucson, and the court postponed the trial for a month later. There fore, I had to delay and come back. I visited Randy Ruland of Garberville California, for a month, during this time, I shipped my bicycle back from California to New York. While I was in Palm Springs, across from the court house, and City Hall stood a statue of President John F. Kennedy. There was sign of decay, and neglect. I had a few minutes to bring this issue to the City Hall attention. I spoke to a Executive in Charge of the memorials in Palm Springs. Her name is Diane Morgan. She took action on the immediate piece of lawn where The statue stands. I wanted her to also correct the marble, as in the Prefix of this book, are two pictures, indicating a new garden. The marble is still the same. I asked Governor Gray Davis to help with this project. He would not. My local Fire House in Huntington N.Y., contact Diane Morgan to explain the need to correct the base of the statue. The many attempts to have someone fix the bust properly is still pending. I do hope that this will be accomplished.

" Meeting and socializing with the people from out of State hitch hiking:"
After 3-4 times across the United States, Social Working on the facts are greatly personified. Studying the driver, and the whole continent. The American Hitch Hiker, is exposed to socialization in civilization. The truth in this experience of the people who are living near the road which you are traveling, and walking. The people in United States are special, developed in socialization in the facts of life are taught at an early age. The knowledge of sex, crime, ill conduct, deviancy, is learned by elders. As I met up with Native Americans in Oregon, where I spend the night. We all went to sleep in a house. When I was sleeping, one of the native' stole my Saint Dominic s track/ field shirt. In which I borrowed from, Robert Wiedenhaefer of St. Dominic Catholic High School, in Oyster Bay L.I., New York. The outrageous drama of the shirt, in it is sub tropical style. Oregon Mountains. I realize that to sleep in a Indian abode is abnormal. Our blood is different in a contamination sense. Because of past history. The Mother of these two Indians, was under the impression that I came To evict her from this house where I spent the night.
This extravagance is abnormal, because I am the white man.
The acting force that is deviant, is always attached. The word Saint Dominic's, provides the stolen track shirt as a gift from St. Dominic. The reasons are understood in the society of a given situation. The issue will be taken up with God later in most societies, if not the law.A novel . "Street Corner Society", Emil Durkheim. Peer pressure is the key to the understanding. The leaders are made to teach the rules of the gang. As Chief Native .The Indians hanging on the corner in a old mission town of Oregon. The missionaries live and work for the public, and are among the types that would even talk to these groups, without fear.
The brave will have to realize that in this society fear is a good friend.. Fear is a golden rule. The opposite is the fool. I am glade that I was only missing my best friend shirt. In Gallup NM, I lost my luggage, and was attacked by five Indians. I escape without being hurt, as a car stopped. The car diver saw it was dangerous, however rescued me at the last second. in the street of downtown Gallup. I stop at the interstate gas station and stole a flair. I used for a weapon while I hitch hiked.
I got a hitch by an Indian ten miles away. I gave him the flair as a gift. The state that 1980 was in was different that 1971. The prejudice was More in 1980 than 1971 in Gallup. Remembering that the truest sociological Survey is the less prejudice one. The Natives were violate in 1971, and Prejudice, and crooks. However in 1980 they had learned to be fools.

I read the Camper Bible because Thomas Elsbree explained that it has Enlightenment. The domain being woods in the "Campers Bible". This knowledge was a great enlightenment hitching ride too. Indisputable issues, reduced to the facts are all sociological, and psychological., the nature of truths. Your acquaintance with the road, and the absents of comforts, makes life special. To starve, to be incognito, helps the imagination grow with familiarity of Sociology education in the social sciences natural elements. A Native Tribe, lived in Chiloquin Oregon, were therefore in location in which I Hitched Hiked in a cool August 1973 night. In spirit harmony, I recognized the Native, and asked if the Indian could put me up for the night? The Campers Bible, teaches to build a wigwam. A tent in the woods, look for signs of water, and moss on one side of tree. To not traveled in a compulsion to get to where you are going. Is a true strength; feeling each step of the walking, watching listening. As survival is the one eye open even sleeping safe place. One would imagine that life at this level is good. Watching a few horses, & cattle and farmers, go by, is peaceful. The nuclear family in the city and in the country, have to be witched .Put the City family at the farm. The family would have only each other and the animals to have as friends. Together with beautiful fragrant flowers. A Navajo Poem comes to mind. "In beauty may I walk", this is a poem that explains nature and the Navajo poet explained in a magazine, as clear as the "Camper Bible". A pass in the mountains, or a stream in the valley may I walk. The woods, the flats of the shores may I walk, counter seeds "The Long Walk". These components, carrier a relationship with the spirit. My struggles walking to the Interstate through mountains and stream I remembered the poem " In beauty may I walk". In which I was first faced with guarded stray dogs .They were a bitch, I was walking, and I watched their jaws teeth mouth open. They surrounded me. I dare not move. Their bark was greater than their bite. They did not bite me. For a few minutes, I was in danger. I hesitated rather than hit the dog with a stick. The criticism on doing the right thing, in which was not to get bite.During the aftermath of this encounter, I now met up with a cold river, that I had to cross. There was a skull of a horse under a tree next to the river. I picked it up and put it in my knap sack. I now was carrying a large skull. The hitch hikers life was physically hard to endure. The glacier mountains, I hitched to the Randy Ranch House. I got to the Ranch, the house, was very close resemblance to Dorothy' house, in the "Wizard Of Oz." In Southampton N.Y,, I hitched a ride with a child actor In the Wizard of Oz, who played one of the flowers children.

At the ranch, Randy dressed with a 10 gallon cowboy hat. Talked with a accent all in cowboy blues clothes.. He even talked like a Cowboy. He was jovial cowboy yet ardent, eager cowboy with cowboys boots, and spars. Western saddle, and rope. He tided up the horse, walked into the ranch, his Height looked about 6fl 5 inches with the 10 gallon hat and cowboy boots. I introduced myself, with a big surprise. He said , Bobby what are you doing here? I told him I hitched, and walked from New York. I wanted to see what it was like to work on a Ranch, out on the range.
He said don't worry , we will have lots of work for you to do! I looked around the kitchen. There was a table, and seats homemade, but cute. I open the refrigerator, and there was a open pack of yellow American Cheese, and a picture of chilled water. There was no reason to eat more than this form the stand point of Randy. Inside the Ranch there was Randy bed, a Cot. There was no walls, accept the first wood nail up, and a few windows. Randy had no sheets on his bed. just a blanket. There was place for his clothes, and extra boots. I was moved by the missing parts to his abode. My perception of the foundation of the Ranch house, made from solid oak. 19 century, a cattle ranch. With nothing but vastness of open space on both sides. Miles was a native of Oregon. He was the owner of the Ranch. Located on the Yamsi land . Yamsi was the owner of a huge spread, consisting of miles of Oregon earth. Hawk was the his name. Randy met him at the the bird sanctuary, in Oyster Bay New York. Hawks life was collecting rare birds at this sanctuary. Randy had enjoyed being an employee there. Hawk invited him to live in Oregon, and work as a Rancher. Randy was a worker that worked as hard as two or three hands. Randy began at sun up, and not return to sun down. Randy learned to work, from his Dad, Bill Ruland. Bill worked night and day. Bill was a self made man. He began the Tiger Trucking in Westbury, N.Y.. Randy was not interested in financial developments with his Dad. He wanted to be free. Randy believed that world was a good place. He made the world a better place. Randy is common ancestor with The Lord Jesus Christ. We offend pray on the Prairie in Oregon. "The Lord is my Shepard" 23 I respect him for his deep beliefs in God. We were Fellowship of Christian Athletes, with common ends. Together, in 1976 we were At the University of Miami, shuffling at UofM, with the Fellowship of Christian Athletes. He whore a tee shirt with Jesus printed on the front. He was a dignitary with the T shirt on, and brave with the audience of Miami The Past was never a dull moment, hiking on the Interstates. We work a little around the house. We ate the food I brought in my knapsack. Extreme hunger never existed. As Ms. Yamsi always made the group food while we worked.

The next day after I arrived, friends came in a Van. The two more friends from Hicksville, who worked with Randy at the Dairy Barn. The Dairy Barn, a old House fixed up as a store. Randy, live inside the top of the store. He would work for Mel. He started thinking about freedom of religion from His daily experiences at the Dairy Barn. He was some character. He would Be dressed in overalls, and delivered milk as milk man dressed up as a Pennsylvania milk farmer type. He ready had what it takes to be an image of Pennsylvania Dutch. He was model image for Huck Finn, in the "Adventures of Tom Sawyer". Randy allowed me to use his horse at the ranch. I would use his cowboy boots and get on the horse. The first few days, the horse let me ride him. It was hard for the horse to accept me. He thought who is this guy, wearing Randy Cowboy boots. One day I got On the horse. He took off as fast as he could. I was force to ride him out. I was unprepared for the horse being a powerful unyielding mammal. Use to ride for the summer as a youth. The horse must have had a breakdown. He was freaking out. He bucked and flew trying to throw me off. I grabbed his neck hair, and harness. He just when crazy without any explaining. I had to hang on with the fear of my life. As two miles of full all out blitz. I got off, and I never took a ride again. "The Dude Ranch' , is a more of a sudden title for this place, with the sudden horse track riding, I proclaimed to Randy, when the horse ran out of wind two miles later. Randy explained that physics of only Randy riding the horse, was how the Horse was fitted. The sudden violent invasion irruption was irrelevant. The Horse character was not of an enemy, but a friend. The artificial cowboy that I was displaying to the horse, was visible. As a horse knows if you are afraid. The socialization of the horse is to understand exactly what the horse sees in light . The reason why the horse eyes are covered is, because of the many visions that change the horse stimuli as by activity as galloping verses walking. The example of what the horse wants to do, solidified before you existed. The course in hitch hiking, and horse back riding are elite. Horsey Ash Lee, minded me being on his back a jetted me for 2 miles.. The term good-by cruel world is when a horse cannot be stopped, and will kill the rider by surprise, when the horse runs to a cut off point and stops. The essential aspect of his needs is a theory. On the Dude Ranch, a Train ran through the house at 3:00 a.m. every mourning. This train was the old style. With condensing gases and vapors, that appeared out of the smoke stack . The Engineers, would toot the train horn every mourning, waking everyone up. The train was impressively old tooting machinery . {Dairy Barn was the Barry Goldwater Presidential campaign office}1964.

The type of train, that drove by at twenty miles and hour, and you could jump on, because it was an old fright train. Designed by great engineering. If the engineer saw you he waived out his window.
It also explained that society was not far from this Ranch. Miles was a character that looked the stereotype of the "Wizard of Oz', Uncles, he fit the image perfectly. Miles descendant from radio entertainment. There was Randy, and Miles, as look a likes characters of the Wizard of Oz. The owner of the ranch Miles, worked for the Big Ranch in the valley.
We hayed the valley of the Yamsi Ranch, in Chiloquin Oregon. We lifting 70 pounds bails of hay. I would run bare foot, and throw the hay in a moving flat bed trunk. Randy would stack it up in sections. Both driver , and Randy would be watching us work, by picking the bails up twice as fast. Much like "Cool Hand Luke", with Paul Newman, and George Kennedy, did when they started working twice as fast on the chain gang. I was in great marathon shape, as I ran the Boston Marathon with Jon Anderson Medford Oregon, the Past winner of the 1973 Boston Marathon. My stammer was great. I kept the job of bailing hay fast, and enduring. Much faster than the average bailer. Boom, boom, boom, boom, until the many acres were hayed . I did it as a volunteer. From the field in which I ran bare foot, I injured my foot with a piece of hay . It was embedded, as I could not remove it. It was in 1973 August. The following summer, 1974. With my friend who owned the Saint Dominic shirt that was stolen by Chiloquin Indians a year before Robert Wedenhavafer. Robert built a boat. We embarked on the boat in the Long Island Sound. The boat Broke down, and we were force to crash into shore for the night on Long Island. It turn out that we had crashed at Theodore Roosevelt Beach, in Oyster Bay. In the mourning we tried to repair the boat. Bob Wiedenhaefer, called the boat the "Ore". At crashed beach, there are many rocks from moraine . While I was walking on the rocks, I hit the splitter out of my foot of the Oregon hay. It had shot out into the water. The blister broke that was a year old from the Oregon hay field.
This was a fate that the splitter existed. A truth of the issues on the link with the shirt missing, and Robert being the owner of the shirt. After the field was hayed, I went back with Richard, and his friend in their van. They gave me a ride to Northern California. During the trip, I left my second track shirt in the van and left. A few weeks later, the shirt was mailed back to my house in New York. The space in a habitual form with shirts. Tied up with the 1 piece of hay in foot. Randy ranch was a little mysterious. . At night there was lots of different sounds. Owls hooting , Utterance accent of an audible sounds of many species of the night.

In the same time period , My Brother and his wife, had to go to Medford Oregon to ship His wife Uncle body home who died there. Jerry explained the ordeal, of the issues involved. There were many. Finely his body and coffin was taken to the airport in Medford. Jerry and Wife Lynn, embarked to J.F.K. Airport. After awaiting for the shipments to Come through, Jerry realized that the coffin was not on the plane. It never was shipped? Jerry had to reship the coffin with Lynn' Uncle through a third party. It was strange, Jerry did not know I was a visitor of Medford Oregon. During my stay at the Ranch in Oregon, Mice in the next room eating all night. Although there is no such thing as ghosts, the house was deep with the flow. Randy and I were never afraid of Ghosts. It is a world of our own fears being manifested, I would think to myself. The issue with the skull found by the river. I shipped back from Medford Post Office. It took about two or three weeks. The day that it arrived, I watched the mail man walk up to my sisters house, and drop it off. It was a little strange watching the Mail man carry up the box from a few houses from where I was walking. The shirt with number 9 on it given to me by Joe my youngest brother, was soon delivery with a letter, saying I left this shirt in the van? In the Boston Marathon 1973, I started on the front line with the Major' Son from Medford Oregon, who won the race. After the run, I was awaiting with a few other runners, who all wanted to travel up in the elevator. I walked to the other side, and push down, coming down the elevator and open doors was Jon Anderson, with his 6 foot trophy. During the issue the elevator where Jon was standing appeared to have a different lighting almost a pure white light around the trophy and Jon, as a flash. Jon spoke to me that he was going down. I was amazed at the event, as My friend and myself were going up stairs for Mulligan stew. This was a strange situation at this time. Later in August I would visit Oregon, and Medford, by a fate and by determination. Determination is a key factor, that brought me to Oregon. It is enlightenment and to give a no win situation, and fighting chance. To give life your best shot! The subject Hiker inhabits the open road with the universe, and the Hitch Hiker, must become American citizen that is able to relate to his Driver. I crossed the U.S.A. 5 x' each way Hitch Hiking. I would return to a lesser life, than the one I experience hitching. There was a life of a person sight seeing in his own backyard. The amazing colorful world that is only seen in this realm, that is the actual vision of its civilization. Organized community, human groups are mentioned on page 106. Together with Dr. Albert Schweitzer picture. I know that these issues are designed for the society and its people to make humanity a greater event. To all try together to have a better world.

The beauty of the world and the United States, is without a flaw. It is Through many millions of years that it took to develop into this world. We are just a passers by, and we then past away. The earth remains. The perennials on the open highway Trillium, Solomon's seal, daffodils, Lilies , wild flowers , dandle lions, vividness is greatest on the open road, then any Green house, or garden. The description of wild flowers, for example in the field or off the road, from the earth garden is not surrounded with the same understanding as a garden in the front of your house. They were planted by wild birds...It is a artist picture to see the growth flowers on the road side. The chivalry of solitariness and desolation. The rise of the sun, the set of the sun. These are some of the reasons why the earth spins and seasons change, and reasons of sacredness. The ridiculously entanglement of traffic, embellished on the emphasis of never being disentangled from Industrial Revolution. These days are obscure for anyone to be able to smell the flowers. The consist boundaries are former principality of appalling horror. The nightmare of no flowers, and no friends. A Shocking apotheosis. The vertical support of nourishing society is the understanding of nature.The burden of the effort to obtain nature is worth the trouble. To be gallant and to hit the road is the effort pushed from the devotion of this out doors experience of hitch hiking.

There is no fooling mother nature. The glorification for all botanist's. The crimson disk flowers. Obedient to the earth. The attitude of delay is not a roll model experience, as being delay in traffic into the City each day. The navigator of nature is studied in the fields and open roads. The audible sound pollution of traffic in the city is a destruction for the wild nature dependency. The example of the principality appears to be effected greatly by sound.

The sound of music in a green house will have an effect of the plants growth. People are the same way as flowers to this degree. To be a better person , play music to clam the prejudice society down inside your burdensome existence. The grave is not the only place to have the chance to appreciate the finer qualities of life, and flower power! On the rock where you will lay your body down in fashion .Sociology, is not a polite to the dead , or the living state. The function as we once new it The egotism and ego trip of the inhabitants of all life is faced with this dilemma of death. For this reason in which the end or the omega has past. The deep sleep In God we rest in peace. The mood of the people who new you are hurt, through emotions. The power of emotion in a polite society. Although socialized as a

Industrial society, in the grave the flowers are placed all around the dead person. The flowers that rose in the wild, and are best left to grow free in nature, are organized and given as a token of love, hope, happiness. I would use the flower of symbolism at a grave, to the same principal as the flower in the wild. The feelings that flowers provide are relating to what is discovered walking around in the middle of Arizona, for example, hitch hiking. Without the action, this reaction would not exist. The answer is that the real truth exist outside the walls of our Social institutions.

For example, extending a normal moment on a hitch hiking trip. As the Grand Junction in Colorado, I was coming out of the Mountains and I witnessed various blue white skies. This Aurora Borealis notation, or Northern lights was flamboyantly provided. Although, I was walking west to California. Far west had day light by and hour. From the Grand Junction, both night/day can be watched on a clear night.

The sky was a light blue as lilacs are in the spring. The white sky in Arizona was combined with the flamboyant northern lights. I walked and watched the zealous show. The eternal infinite sky. Compared to Aurora Borealis. The northern lights light show the best in the world. Continuous and vibrant, endlessness in beauty, and in spirit. It would appear to be absurd, and irrational to live anywhere less than United States. The patronage is joined by the citizens who travel under the Northern Lights. The sky is not the same as a physical flower. Both are boundless. The reasons why these thing exist are, because they are special. They are never stagnant. flowers, and are a true stammer of existence. They are living flowing, growing in the earth without a gardener. The Ancient ancestors in their tribes became extinct. The flowers, that were around at this time, are still around today.

Extinction of past cultures, existed at Grand Junction Colorado. The blue sky lights, of the greatest skyline. Tribes built road ways to this location that still exist today, although completely extinct.

If our civilization went extinct, it would heal and regroup and go on. The physical universe would remain intact., created by alpha particles, in geology, within the geography propagation of plants and animals. Extinction of human groups, and their institutions are differentiated. On the understanding of the reason on the merit of sky and flowers. The horizon of the white sun setting, and the sky above pale blue with the white stars are calculated from mankind extinction.

The fashion show of northern lights in a polite society. The beauty and natural features are breath taking. Supreme Being is the equilibrium geocentric flow. The generosity of God and Gods Angels.
Made from earthquakes and energy with our oceans. The sand and dryness of the earth that I walked. Pasting in the Rocky Mountains, and changing to foot hills. The geocentric G forces that holds each of us to earth are not the same as walking in the city. There is a different eternal geocentric positïon, caused by atmosphere, although both being at sea level. The illustration of the northern lights, plus { g force} physical universe, having a different baring is a natural wonder. I was feeling the force of gravitation pull. I experienced happiness and bliss at Grand Junction. As a rudimentary astonishment with the earth and astronomy observed..
The atmosphere and celestial stars are the physics of the universe.
The world is a place where the energy of the atoms are in a alignment .
The reseeding of the world and its flowers and summer skies. All offered by God . As I walked the earth, and smelt the air on the sand in the wind, as the ancients did. Their extinction is a mystery, As is the full skyline is. Interestingly compel to a state of aerospace, wind lifting, and the aeronautics of the spirit of past ancient civilizations who were thinking, the exact same thing, I was thinking about the universe. As it is self explanatory.
The night was on my mind, and the day was in clear view. The sacred boundaries of the west and north is accented with the first settlers.
The spirit' of the American sight seer under the sky of these lights, can navigated the tribes to reach up into the sky at this location. As this rigorous hitch hiking provided me with the genuine Eden.
The neighboring rocky mountains, have bordering artifacts of the oldest tribes in the United States. The land in which I walked on and Hitch hike, that had the Amazing skies in the trip through Colorado at 16, was nearest to Grand Junction . After close survey in the Internet, the Folsom Man was the common ancestor of this region. The Folsom humans, lived through the beginning, and end of the last Ice age 5,000 years ago. There is other artifacts in the ancient studies of this location.
The dry clay hardened by the heat of the sun. turning the earth into brick.
Dancing asteroids in the natural heavens. Life is beautiful I thought .The San Luis Valley, of Southern Colorado. Petroglyphs and pictographs are found in the surrounding valley foothills. There is art on rocks reaching 50 in number. Each showing the image of what may be the Folsom human of 4,000 years ago. The pressure of the air is at sea level about 14.7pounds to the square inch, used as a unit in physics. This is true in the city as well as the country. The atmosphere is more intense, causing different feelings of a natural high. The politics of running to a place to place as a guess.

First settlers were called Folsom man, Hopi, Adobe Navajo, Kiowa, Cheyenne, Comanche, 5000B.C.. . The anthropologist on these origin and customs of man near today Grand Junction, had migrated to this location. Their mixture of religion beliefs, taboo's, prehistoric cultures, hunted mammoth, and other big game, with spears. The time of the earth's close of last Ice Age, the general history was viewed from carbon dating. The changes, of first civilization was impressed with the sky stars. The use of knowledge on the stars is found in the Neanderthal art gallery in Nice France, predated 100 thousand year before, as small planets with orbits. The point of the stars was surveyed by all groups. The compass of the stars. As profound as the magnitude of the stars in constellation in which I saw. As Folsom man and natives used the stars as a compass. The recognized Neanderthal Artist depicts planets in the solar system. As Folsom man. The excavation from the points of study by the above groups include the Dinosaur period at Grand Junction, 150 million year before. I will be forever effected by the magnificent feeling and visions that are the natural remains of prehistoric cultures of Grand Junction Colorado. The equator's latitude perhaps makes this place so special.
As I walked the earth walking in the direction of California, looking up into the glorification as a child of 16 years. The right of the Interstate was vastness of the Western Hemisphere . An accumulation of earth, deposited From many earthquakes. Their dramatic changes in the beginning of time erupted the Rocky Mountains wonderland, and fortified this continent. The Physics now the fundamental truth of Colorado. The earth and sky are joined. The joining of the good quality of views in a rectangular, Earth Snow caps perks, stars, and distance sunlight, happening at once.
The outrageous antique artifacts of past civilization laying around at the Rocky Mountains in Colorado, as pottery pieces. The use of fire clay.
The Ice Age " The Glacial Epoch Folsom man used flint to have fires.
The inhabitants of the last Ice Age, began in the periods of extinction.
The paramount view at Grand Junction of space, mountains
less, after being close to the Rocky Mountains, are in defiance.
My perception ends at sea level, it must be the knowledge of past centuries, with the universe to know conclusion of matter and energy.
Flocking together as a aromatic consequence of Northern Colorado..
The stars, the sky, the moon and sun. These entities are the universe, remain our closest link. Our first Ancestors moved to the best view of fluorescence stars of this skyline. They had the same enlightenment of thought. Our forefathers earliest ages wanted to travel into the universe. Pilgrims of the universe. Still not primitive animals, but advanced human beings. Archeologist, survey is on a special interest on cliff fires.

In the Colorado cliffs near Grand Junction, the watchman kept chickee. If an enemy appeared the fires would give the notice to the tribe able to be prepared for the battle. The beacon man and woman observed the open space on plains of Northern Colorado. There were several ancient roads. They were formed by a union of different types of explorers, who used the sky as a compass; emblems, as "Little dipper", Bear, dog, were visible. As this location was a place to see valley too. The dualism of the Bear are harmoniously in mind, and matter above sky. From my experiences at Grand Junction, and the ancients are conclusive at age 16. I still cannot identify the "Bear" in the sky, advocating a star setting. Everything here seemed to be a close acquaintance with an intimate friendship with the physical universe. Boldly I struggled to climb a glacier. A character building methods. I had two choices, to either walk the road up the glacier in Boulder, or walk through the woods. I decided to take the road not taken, and that what made all the difference, quoted from Robert Frost. The obscurity from view, allowed me to see a large fox. The fox was making noise on the road side, while I walked watching the road so that I would not get lost. His chin whiskers were longer than normal. He had a glacier bazaar look. My endurance was good. I climbed up, the fox was walking down. Had I taken the road, I would of missed this once in a life time event. Theoretically, This Mountain is glacier, with three other glaciers. The Chimney Peaks, at Boulder. The opposite of Northern Colorado. The conclusion of the High Mountain of the Rocky Belt, are centered with Glaciers. The off center is earthquakes formation. During my time on the 1 glacier of the chimneys glaciers of Boulder, I started down, and a miro· bus van pull over to give me a ride to Boulder. There were two girls in the van, as I sat on the floor. They were discussing the "Moony" camp. As Revere Moon, was posted all over the town of Boulder. The girls were stating that he was not a nice guy. They lived in the camp. They explained that he was too much. I got out in Boulder. I hitched through the Rocky Mountains. I was surprise that in July that it was as cold as winter near the summit. With a floral earth, glacier identity. The earth is form as minerals ice glaciers. Fortified with earth. As I have been told by History Channel. The life expectance of a glacier existed from earth's core pushing up . The formation of the pikes of the Rocky Mountains formed by a union of internal dust particles that force the Gravity, friction and Centrifugal force to earthquake= Sea level 2 Mt. Broken off from the northern lights area, and exhumed to the level of Rocky Mountains.

The beautiful world of Colorado Rocky Mountains Peaks, and prairies, was a superabundant vision. A place analyze the physical universe. I was hitching to Oregon. I had left home and embarked without having any pre thought. I was leaving my home. Retreating from the war zone. I started out hitching. I was just not convinced about the trip, as once before, I got as far as Philadelphia. This time I did not turn West at the Cross Bronx Expressway, as hitching months before. My explanation for this trip was to just leave. I was fed up. I got a ride from Nassau County Long Island Expressway into Manhattan. Three months prior, I cut underneath the City, and took a connecting bridge. This new adventure, was now going into the busy New York City at night. I was dropped off near Central Park. I was walking to the New Jersey Turnpike. I got on the ramp. I got a ride by a group of three people who worked in Manhattan. These people were sharp, and in touch with a knowledge of Easy Rider. The two males were in the front seat. The female was in the back of a Volks Wagon Bug. They were only going a few Exists on the New Jersey Turnpike. As I explained to them where I was going, they were impressed. The driver was smart. He explained to me what I should do going west! He explained that next year he was going west to Boulder Colorado. That Boulder was full of life. Presently, I was only 15 years old. I had no money, and was looking for my friend without his address in Oregon. I explained to the staff in this car, that I was ok. Not damaged from civilization. With money and places to go, and not to feel sorry for me because I was 20's years old. The ride lasted hour. The driver was a great man. He was telling us story after story about the world. Recalling that I was justified and the man of the hour, leaving to go west. He came up to his exist. He was sad, that he could not drive me all the way. I kept telling them, I was all right, please don't worry if I was not all right, as it was my fate. He had all ready had his wallet out, with greens. I refused to take any money. The drive put a few dollars on top of his car, and drove off. The money was all over the ramp. I picked it up. I tried to hitch west. After an hour, I needed to hitch back to New York City, or spend the night at this ramp. Hitching back to the city was a breeze. I felt that this was better than trying to reach Oregon. The growing experience was well worth it. To see the people who are on the road, and who think as I will learn to think, and become. I got into New York City, and I took the train back home with the money. The return back home was like returning to the cave, "so to speak". The dark night was impossible to see two feet in front of me. I had enough smarts to return to the cave, without hindrance on not getting to golden Colorado.

Thinking about the hope of going to Oregon was not in my cards. I had decided to stay home and face the music with issues that were pending at my home. It was summer of 1970, I was 15 years old. I was running and exercising every day. I used my bicycle each day. I was reading and I wanted to be able to obtain my High School Degree. As it was a priority with me. The fragile youth was now a thing of the past. Pumping Iron and eating my Wheat germ, and being strong was the way I would spend my time.

I was able to go out for High School track/field. However my real love was football. I was always into playing as a youth. I wanted to be able to be the star at my High School. The dream stardom is too egotistical. I will not say that the plat toe to being a normal football player existed. The survey of football player is based on politics that I was not able to dig. I had come to this awareness late in High School time. I now could not expect be the star. I gave up on the affords to this goal in which I would be training, without the football team. Running catching and lifting. I would meet College football players from C.W. Post College. We would get down. I would train with players as All American Tommy Lombardo, from Holy Trinity High School, and many others. I was free from my commitment at the High School level of football. I new I was a star. I just did not have a team to be the star, as I had growing up as a young Coach Hilski, Hicksville High track coach new that not to be a slow poke. All American. Running track coach Tom Hilski, who helped me run hard. The challenges of having a position in life was based on the issues that were discussed with my friends from the New Jersey Turnpike. I would always use the thoughts of what the driver explained about life. This was to be free from a job that you do not want to do. To push to be a free man. That civilization was entangled with false opportunities, disguised as true opportunities.. Once you have decided to the fact, that you should keep the hope of obtaining the reason for the original objective, hang tough. Stay with something that is good. To find good in the world. The water is good to drink when your mouth is dry. The heat when you are cold. These things all are remedy by logic. The logical is to be a wise man, and live to be an very wise man.

To travel the earth in peace. Fill your dreams up from the well, and drink from the spring. I believe this was the message for the jovial braggart. The wise man who shared his car, knowledge, and money personified. All American hero modest &,brave.

The universe from this system of enlightenment at this level. The run to the finish line exhausted each day to keep fit, and ready for the test of life.

The past is gone from view of these adventures into the night, driven by enlightenment. The road and time has not changed too much. The road 70 interstate, could be explored several angles. Much as geometry uses lines. The road that is the oldest, still maintains the ghosts of the periods. Looking in Colorado at Grand Junction. The name Grand Junction means the exact statement. A term that explains the amount. Grand Junction, for example in civil engineering means, superior Junction to the other roads. History at Grand Junction, refers back to the last Ice Age. Thus, being over 5000 years ago. The early 70's, being ancient times, is not possibility ancient. The ghosts of the people who hitched 30-40 years ago are still fresh. Time has not changed much in the past generations. The time to see the world hitching is still available.. The drivers are still likely to pull over to give a ride. Being a Good Samaritan first. Base on the logic of helping the universe. The places of importance in history for example, are still the same. There are issues of the earth changes that are examined exactly the way it was when I was 16 years old. Through all these issues time had changed mass. The groups of people on the ramps are gone. For example, the center of Santa Barbara California, was a location that no longer has the hitch Hiking society that once travel there. The places that were in Santa Barbara were converted into freeway roads. The great many hitchers would meet in the Heart of Santa Barbara. The rides would past there going everywhere in the United States. The cross country travelers are few and far between. The crude iron age of hitch hiking, may of past.
I am sorry to see it go. Looking at all the special people who truly compose of our society. The effects of the superstructure of the Industrial Revolution. The people who are actually thinking and acting with enlightenment. The external results of the Industrial Revolution, created pollution. It is better to understand the coarse results. That was a savageness destiny. A hitch hiker, seeks spiritual enlightenment of the cosmos that awaits with each of us, if we search for the internal light of the heavens. Opening and closing for free each day, and night. The missed love ones who await the hitch hikers at the end of the road. The cows and farms, that most of us never see. The rain pouring down and then the rainbow. The balance of nature having shown it self. It was all worth the trouble. I am glade that I took the chance to see for myself the road traveled, and great people who travel it, makes me proud to be an American.

Time is a understanding of a fixed changeable position. The minutes of concept's of what throws society back is time, and the changes of time. The present circumstances, change in time. Peace changes to war. The reign of terror is in a alpha particles, coming at each of us. The matter of not having the needs of your needs met. To fail at the restoring to sound condition. The wound not closing, causing irrational absurd skirmishes with the soul. The history of the traveler. These issues are not of a sorcery. They come from an algae form in time, and life. The best cure is to realize that these matters are only the surface of the problem. The physical universe in philosophy of the anatomy of earth. The past 20 pages are predominant to the truth of my experiences. There is social purposes that are important to examine of the physical universe.The physical universe of a porcupine, is different than that of a big horn sheep. The elaborate degrees of the fundamentalism is essential to the reason why the world is either being a place of adaptation for new universe, or it has always been a place of the many types of complicated experiences. The alphabet for each experience being new, or old? I am for example a geologist. Each experience is a rock. The era of the physical universe is for example, "the Cenozoic period. In which is where the rocks are classified from. The imaginary time, and place of the earth experiences.

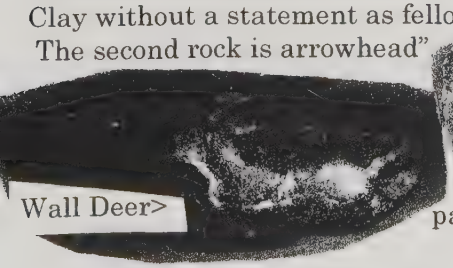
The alphabet letter for watching a long hairy fox mammal in Boulder Glacier, placed into the realm of G-7 letter of the alphabet. The earth physical universe at G-7 for the attention of this era. Therefore, that there is 26 experiences in the past 20 pages, that can all be titled a letter and a numbered. To not lost thy self in the rhetoric of the formation of these events. The Rocky Mountains, the events of these experiences are fundamental. If you go to the Rocky Mountains, you will see a geological era, that has not changed. All from a period of the Cenozoic period. The physical universe can be narrowed down to G-7. This is a philosophy of survival. As reading a map with G7 point &G8 etc.. The age of the Rocky Mountains is not important, however is imaginary. Meeting the people of the Rocky Mountains thirty five years ago, is explained in the social purposes. Much as the people of elaborate rock formation, mammals, and northern lights. The comet in the northern lights in northern Colorado, intentions are iridescence. That is in the explanation of Aurora Borealis. The flamboyant notation used in Alaska, can be said about Colorado. The flexible influence of the various stars and aurora is as great. Rock dog episodes with hunger is abandoned when the contours of a ghost appears in the story explained by Folsom man, with the ideas of children, that carve animals and pets.

Sociology is defined as a study of Human groups, Institutions, and functions, and the origin of society. The past twenty pages covers this particular region. The prerogative of these issues in a free world. The exact opinion persistent with various forms of examples. Technically, the anticipation of prehistoric society can be catalogue in the same G7 guide explained on page 20. Unimaginative as it is, the social affairs as race, institutions, functions, of the origin of the Folsom man society, were predestinated as the definite livery of American Society. The territory in which Folsom civilization existed, is sufficient to this fact. That destiny 5000 years ago, and present day was designed within functions of U.S. Constitution. The Social affairs of the past, present, and future are not out of mystery. The past history of ancient man in North America, and today's man, are associated with the horizon of the exact truth. The sociology of these societies were, and are scientific. The universe had been formulated by the mannerisms of remedy to a cure. The phrases were used differently 10,000 years ago, but were sociologically true today's civilization. Most civilizations are carbon dated, The Dead Sea Scrolls are even carbon dated.The human groups, functions, of these societies date back to the Neanderthal in caves, with a different name for each generation. The philosophy of modern man and ancient man=Java man, for example. Politics of the many generations. The fate of why extinction was a fact. Eastern Island having a violent ending to its civilization. Dose mankind, Repeat itself of its wrong doing to each other, and to its creator?

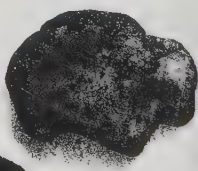
The predicated hunter is still universal, but the indulging on social affairs on the institutions of travel are non existent in the Iron Curtain countries. Therefore, I limit my survey to United States. However, I have hitched in France and Belgium, England. These Countries do allow hitch hiking, and is a sufficient way of travel.

Figures of ancient tribes are focus on a level of thought that is both present and past. The rocks that the children play games with, are reviewed and many ideas are able to be conceived from these rocks. The concepts of the rock being the animal of the mold in fact. The issues of the word rock as we know and as the ancients new, is still a living understanding of the children and adults spending their time. I feel that rock figurines are a physical universe and how the mood of the artist is. There are figurines rocks, there are arrowheads, and there are pieces of Clay without a statement as fellows. The first rock is a figurine."

The second rock is arrowhead"



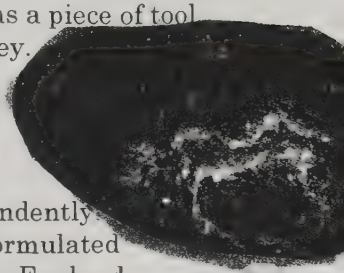
Wall Deer>



The children of the ancients play with the figurines of the tribes. A game as " Rock Dog", or just face on rock, or animal of a important Hunt. The arrowhead is different, and must be used as a piece of tool The piece of clay is a trading piece and a form of money.

War paint clay piece>

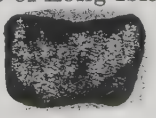
Rock horse drawing>



The idea was denied on the merits of thinking independently problems with being unequal, and being equal. The formulated opinion of human groups in China, and the opinion in England, are based on the particular monarch philosophy. The philosophy of these functions are now technically surveyed on the type of culture existed linage line down, to first settlers. The first settlers belief is freedom to hunt and gather. This freedom is challenged during the changes in civilization. The voluntary in this issue, becomes a state of involuntary. The theory of freedom being taken from a social group is a strict violation in our society, in which is not in the third world society. The keeping of the rules are important for the issues with enjoying the fate of being free. The United States framework of our society is based on freedom. The right and privileges granted to each person, incorporation by a free government. These functions are our fundamental laws. That are contrary to the rules in a restrained country. America is as a wild flower, unrestrained, wild passions, visionary dreamt about. A wild patch of geraniums. To free the slavery state. To be free from worry or pain. Free to be . Having liberty, and freedom in a America wilderness is as fun as being in heaven. Experiencing the uncultivated and uninhabited regions of deserts and glaciers. Studying the pollination in the wilderness, the ripening of America from the first unit. It is not ridiculed by the other places in the world, these freedoms. It just dose not exist in the Iron countries as Russia. The restraint in the conventional form, was not restraint in the Ancient forms. The external power of freedom provides a literal view of these freedoms. Through the power of knowledge. The fertility of the soil from the plants, produced an organic formula on food ingredients controlling meat contamination. The body of ancients society was strong and enduring.The continuum of Neanderthal and modern man of N. America, are rocking the Rockies..

Clay stars Woman >

clay drawing of what appears as Map of Long Island



Rock caves of the Rockies, wide spread, without the engraving.
The Growing the Civilization of man is issuing Declaration
Of Independence for the cure to the extinction and denial of
equality. The entrance to the threshold of United States is equality.
The Star Spangle Band on the knowledge of our foundation and honor.
The United States is the place to hitch hike the states without any fears.
The beauty of the United States is 1st. place with the rest of the world.
Remembering President Ford story about Yellow Stone Park where
He smelled the wild flowers in the painted desert for example. Violets,
lilies, asters, forget-me-nots, cardinal flowers, blue bonnet,. Mountain
laurel, California poppy, painted cup, are wild flowers of the United
States. Is it better to cultivated our own garden? Boisterous the truth
is not extinct. The growing of flowers, is the growing of liberty.
America will always have nomadic tribes to study. The life in the
wigwam. Is rough, but right for the Natives and others in the bark hides.
The falseness of the violation of Constitution in the wilderness, because
in the uninhabited regions where the nomadic dwell are allowed to be
beyond the fundamental laws of the sovereign states. That is how
gambling on the reservations came into existence.
The Roosevelt administration both Theodore Roosevelt and Franklin
Roosevelt, past acts to maintain the wilderness region. By saving the
wilderness, the wild flowers are saved. These Harvard utopia ideas,
are often in conflict. The basic utopia issues. Changing a paradise into
a waste land., as TS Eliot describes. Our wilderness needs are free.
The only thing is to stop cutting down the trees. To use only what is
needed. To replant each tree cut down. The Green Peace work shop,
of the United States. The chance to grow back, is the important rule.
To mend back to a form of a forest, that supplies oxygen to our lungs.
Ecology volunteers are next to being a volunteer for a individual.
To make a desert useful. To use only what s needed, replace what is
taken. The balance of survival of the environment will provide survival
of mankind. There is a reason for the issues that are having this need.
If we fulfill these needs and it was the wrong path to ecology, then what?.
The logic of not putting all your eggs in one basket. That if we cut down
All the trees in the woods, and we pollute all the streams, then what?
It is a question that is studied if the illogical was in the control of good
rhythmical freedoms of the wild. The rhyme of the Declaration of
Independence, liberty of each verse. Is harder to enjoy if it is not true.
The honor of the exact truth, within the foreign policy is technically the
same as it was in 1775 first draft. The dignitary policy in the French
Revolution persistent to today phrases. The truth is the remedy of

the independence of all nations. That is the predestination of this issue. Sociology and medicine are in opposition sometimes to equality.. A theory that being equal , because equality is the exact measurements in physics. Sociologist theories existed 50,000 years ago, as civilization exist, so dose Sociology. Anxiety of the mind is caused from powers that are existing, as Death. For example, a poison of disease producing bacteria that cause death, will also cause mental anxiety. Both are curable, and remedy are sociological. On the caves walls are not lacking these feelings. They are legally the doctrines of the times. From this point on the sociologist is also created. What caused slavery, and antislavery are from our primitive inequalities. The beginning the earth ground swelled from earthquakes. The people had to be able to watch out for this movement and great strength. Matter&energy=mass, Through the layers of time, the geologist are born. The primal forces of nature. Through the injustice inequality laws are established. The hostile and cruel inequality. The point of being numb to this was changed to the positive charge equal to the negative charge of surrounding electrons. A honor code was upheld. The science of the Declaration of Independence was the eternally significant for survival. The violations of rights is studied as sociologist, and not as a lawyer in the primary stages of the code of ethics. Life lacking this principal is unethical. The endless civilizations of the infinite lawlessness, are surveyed through influence of rigid counter balance to morality. That history shows more inspirit skirmishes and extinction, from the cultures who were without a rule book. However, the rules change if the issues are perplex by earthquakes and other points of extreme nature. What is important is to cure, and prevent a immune to being prejudice toward our fellow man without discrimination and this social cannibalism. This social disease must be treated in the state of human beings top priority. The course of lack of concern caused 9/11. The study of my direction is studied in the daily plans of terrorism having been ignored by our government. The merits of a social disorder. Equality is the balance of our government being equal to each other.. The moral force will control the atmosphere to a large degree, as stressed in " My eyes have seen the glory". My book had covered the movements of a strong denial of social institutions. In which 9/11 lack deep constitution. These inhabitants were antithesis of lack of constitutional ability in which hostel, a pacifism expressed by the TV helicopters not saving the.people on ledges calling to their support for help. In which they would not perform this act of humane dignity.

There is either the will to act right or wrong. It dose not matter what is going on? The reasoning for the denial to act correctly on social respect is why 9/11 was able to maintain it self at additional levels. The position of a higher regard for each other as people is a community and state. This education is taught and then it is not a sociological harness on the streets. The surface of social deviance is the killing agent and extinction in today and in yesterday societies. Even hunger was a subject of little concern. How these cameraman live constitutionally free from anxiety, regarding 9/11?. Ideality the creed of this society principal equalization was self evident. The undulation of the buildings fallen down made the denial acute. The social fears of the layers debris indicate that maybe this action of throwing a rope impossible? I feel that the T.V. camera men were able to provide a rescue. Reviewing the tapes of 9/11. The issue of just filming the deaths of these individuals and not rescuing them is absurd. This is an outrage.

The social environment troubles, that cause extinction in past times existed longer if they existed together. A social chain of events as friend-ship. Having a friend for a crisis or having a hero, is important for the reason for life. Life is only a short time. The next stage will have a greater period. Regarding the figurines, of the past civilization. It is true to their survey that, the transmigration of the soul will live on in the figurines and other artifacts. The bubonic plague as a dangerous diseases and lack of love for fellow man are next to each other as being equals.. The provisions for this idea is capable of controlling the destiny of extinction. Therefore, to gain knowledge, and to retain the knowledge at a great level. From this acceleration morality, is presented in a feeling of what is good, and what is evil. God is conceived, Satan . Religion is now a current. The current of laws are now also within this equality balance. Love ideas of poetry, and love are of sociological beauty, and a cure to extinction. The lack of enlightenment will bring forth extinction provisions. Survey was justified, through looking for the antitoxin to man extinction. Diphtheria cure of looking into a horse for a cure by giving the horse this disease was conceived. Mankind brain power was able to analyze the immune system. There were places as medicine tents. A place to bury the dead. What ever stands to reason 50,000 years hence stood. The particulars of origin of knowledge indicates that early man was able to cope with psychological issues, and biological issues at a divine level. Social affairs as intercourse, mating, were no mystery. It was done at a scientific level. As attach colonies and nations rose, and fell.

Capter two

Inner obstacles

Pages 26-51

For studying the immune systems in animals, mankind has been able To increase survival rate . The labels on the products explain no animal testing. Had the issue of injecting diphtheria into the blood of a horse, never existed, the cure would never of occurred. The inhuman issues of animal testing stagnate the cures disease. Today our issue is also survey regarding principality of U.S. Constitution and Declaration of Independence. In psychology the remains of ancient psychology on the rules of human beings is taken during the early childhood raring. This means birth contains an account of creation in the origin of memory, motor skills, and natural features. The day, the month, the year, all have a special meaning. Whether psychological or not. The primitive ancestors had the child 9 months after conception. Reviewed in," My eyes have seen the glory". Pregnant curving in the Neanderthal cave, indicating this particular. What is side by side as this, has other attachments to the early mankind being linked to present day society. The social relationship with the Neanderthal and our society is a Beauty, never a beast. The Neanderthal belonging to the South of France, and Spain, and Rhine Valley, and East of Eden, so to speak!
The vicious circle of evolution is three million years ago man was Ape. There was skulls of apes found that had made stone implements. That had ecology biology dealings at a cute levels. Assessed from the Keen ax heads found. The second viewpoint, The divine revelations God, disclosed his will, and his law. In the Garden of Eden. Eden
The garden where Adam and Eve first dwelt, Paradise. The hypothesis of being ape is not true, Religion teach this moral truth, scrolls 88 B.C.: The issues are self-evident. Ape, 2million years later Neanderthal. The Truth inspired by the Old Testament, written chiefly by prophets. The Assumption of ape is promenade by the skulls. The animal factor, in the opening statement in my argument is deranged. Man is told by the synopsis in the " Dead Sea Scrolls". The "Holy Spirit", that the reliance within the "Dead Sea Scrolls". Stated at higher education level of truth. With issues Sons of Darkness at war with the Sons of Light. Further developed from a difference establishing Christian and Judaism religions. Unlike the guess work on the mystery of life in skull of apes microbes found dating three million years ago. The soft earth where many skulls and artifacts were found are claim to have been hereditary to mankind.
If man found a piece of truth here it was that the characters apes, were not nomadic humans.

The conjecture from this forecast is, Leaky imaginary differences of opinion, is horizontal to Gods mountains and gaps. Gods teaches is educational philosophy is prognosticated as a fair view against Leaky mental perceptions. The moral truth serum. Our education allows the conjecture at a hereditary level.
The skulls were viewed by Dr. Leaky, in Africa. His synoptic claim is without argument. Man was to follow from the skulls that were much small brain size than Neanderthal .The idea of this synopsis is deficient in the comprehension, without DNA factors. This issue of looking close to our skull, is untrue. The teaching of these findings should be fought in the Supreme Court on the ideologies, within constitutional society, within the Declaration of Independence class action. That the inconsistencies are too great for the monkey man. The issues of the evil of this Lucifer is harmful for the spirit and soul. Are there any factors other than guess work on the this fact? The image of the eyes nose, mouth, are more monkey than human being, western skulls are without the same orthodontia work. Watching History channel on May 27, 2004. The sound opinion of a friend of Dr. Leaky, states ostentatiously that the skull do match up with past travelers out of the Africa zone into Europe. Than finely into North America. The story was in question. The care of the story being debated is unsupportive in my opinion. The ceremonial travel to the location, and the pit of earth, are lacking the feeling of truth. The story is pretentious. The 2 million yr.old skull and flints are destitute to only being ape, and not a wonderful link to man. Man has more scenery to himself in the Western Hemisphere.
If Java man skull brain size was the same, there may be 1 percent chance. That man has a approximately larger brain and there is no intermediate between the Java or modern man in any forms.
The issue is an insult to America' intelligence. Man survey of first Settlers, Walter places man as a victim of animalism with triumph. The vicious circle is sacrificing his opinion and the attitude of o possibilities. I guess it should be upsetting to be correct, that man was ape. The inherited animal is considered to be impossible.
The person is injured if he thinks that the circle of this agency is vigilant to this fact. Where is the inspired poet in this philosophy. The myth of the tallest story, I have ever been told with the Carte Blanche of History Channel not being free from pretense.

5000 years ago, the world was frozen solid. The life cycle of the Hemisphere glacial epoch, and why dose the ice age exist?
The relationship with the earth cycles causes the existence.
The earth is place in a position that the sun has caused the earth reaction to the sun had been less, than it is now, causing the Ice Ages. The sun bursting out of Ice Age in Europe, ancient times, and ending the long cold.
The crystallization of the Ice Ages remain intact at the polar caps.
The discussion on the ice periods on earth are frozen at this point and time.
To extend the changes, to millions of years ago, where the settlers were man was non-existent is the general place to put a feudalist society. The ape were mining and fishing. This extraordinary ability of proficiency in agriculture two million years ago is now without the ability in today's world. The idea is counterfeit that the ape who was able to do all these things were now out of alignment of this power.
The solution of mans issues are independent from other mammals.
The skull of a coyote resembles the skull of a fox. The comprehension of all the issues of mankind, resembles each one of us in the echo chain.
In democratic government as the United States, self ideology is best.
The universe of stars and planets and man are all link together independently. The independence is not a hypothesis it is the earth and its creatures. There is place in the universe where the truth exist.
The argument is to use the wrong hypothesis in the study, to than survey the correct philosophy on the question of mammals evolution.
That man is 90 percent water. Almost submerged as a sea creature.
The water composition is composed of matter in a gaseous state.
The stars are process in the same way with water. The idea of man being a star is faintly possible. The universe being mass of people making up the community in the nebular. It is strange that truth on merits of man times being in between the Ice Age. The beginning man hitch hiking on a moving glaciers. The sun broke the glaciers into oceans, and mankind bolted down the North Pole, and South Pole, as if they were on a cloud .
As destination of life in the care of the forest. This land in which was once ocean.. The hypothesis of explosion theory and all struggles with vigilant changes, are a spiritual onus. The conditions are not explained and therefore are not self evident. Implications of fish being curved out of King Peaks, Shelter Cover California, in " My eyes have seen the glory", is relevant to the fact, that the land was once sea. However, that man as once ape has never been a fulfilled conquest. Due to the issue in fact, that the Neanderthal society and the modern society are not very different. That evolution evidence surmised opinion is without any facts.
The glacier, and Poles, have never found an Ape to point at and state man.

The only grounds to keep the enlightenment iridescence is through the truth. Once the manner becomes a false pretense, the pure water is then changed to stagnant algae, or bog permafrost. The falsehood is then an action that is never figured out as the wrong way. It not until the horse is out of the barn. The issues on the vividness of spaces, verses clouds is gone from truth.A notation of the universe is influenced by the fact. What was once inflexible concerns on these issues, are flowing and are melting down. Our mistake.May existence of enlightenment. To set free, the darkness, and clouds. The species of many types of human beings exist, and existed. The power that set off the first atom in the universe, was nature, that was ultimately positive charge in the enlightenment of God. The alpha particles protons electrons, were the power of fate destiny and act of truth of the universe. The universe
being a atom. The containing atom was supported by a power as God. The forces of nature came together through the producing agents counteracting from the atom being free from imaginary negative rotation. The constellation Milky Way pushed the atoms around, aligned with the sun. The destine earth was given care from a power within the universe beforehand. The developments of the earth surroundings being charged with electrons. The power of the atom forced the prognosticated reaction. This is a reaction on the scale of both human, animal, and nature. The imaginary cube from where the files are kept are usually fireproof, and can be opened as a beacon of light in the darkness. The many sides help provide a inter peace of thought . The wild nature having a nervous breakdown, is less than an individual. The individual dose not restore himself as easy as nature restores its self after a crisis. A tree fell in the storm is less than if someone fell in a storm. Wild nature is less than the nature of man and the surrounding characters, cats, and dogs. It rained cats and dogs last night. This is not as intense as the lost of a pet. The natural one is you. You must select the correct path to walk. Then you must select the right person to walk the path with for your life is not forever. The artist compliant about the lack of paints to paint the master piece, has no baring. To do your best regardless of not having a full cup of measurement. The quintessence 5th. Element on the elements of the four elements, has the equal level that was not provided in a solid body of the equal proportions.
That physics is exact proportions in measurements, therefore equality exist.

The little changes in the past 100 thousand years. Is study many ways. The families and tribes of man have gone extinct. Their history of survival was analyzed throughout this book. The learning experiences of the first teachers. The mirror of life reflecting the past history, and present are comparable. Therefore, farming during the First settlers was done at a high level. Breeding chickens and eggs. young fowl, heated quarters, religion. Goats milk, and meat, antelopes, wild horses rabbits, all done with the comparable human reasoning of today's society. The breakdown of the pro's and con's are justifiable to say that our progress has been deficient without being skeptical. Matter and energy alpha particles have stay the same as day one. The Characteristics of livery in the atmosphere of the wild kingdom, definitely is exactly how it was predated BC history. The process of life. Agriculture being the organic process. There was no frivolous occupations in the ancient periods. Analysis to the division of labor. As mining, fishing, hunting, gathering. Shells for example are fortified with calcium. The ancients, were able to resist death from a formula with crushed shells. Being energetic after eating certain organic foods. These were the same as today's universal experiences. The rock study in the caves were fundamental of physics that remains In today's society. In fact, that man was established in S.W. France to a great degree, as to state that it was a form of the City of Paris. The caves rocks were synonymous with colonization of Humans and Rocks. The rocks were a form of salvation. The corresponding walls At Dordogne France explain the changes in the sun, moon and earth. All natural elements of the physical universe, were defined as they are define today. They have not changed in 100 thousand years. There is a understanding that what one feels today, is what one felt 100 thousand year hence. This is important with infants and child developments. The infant for example vision at birth and first six weeks, has been thought that infants can only see shadows and black and white. There has been no new discoveries regarding the issues on the infancy in this manner in the past 100 thousand years. Sounds, cries, voices, and language, are the same. The hygiene of survival of infants has increased. The statistics of survival rate and all of the above is explained on the walls in S.W. France. The reasons for many sociological and psychological issues can be traced back to the ancients. The precious diagnosis with a problem 100 thousand years ago, may still be analyzed with the exact problem today. The survey of family then and now, has not changed too much. Therefore, mankind apex with the above will remain the same, without being presumptuous.

Being face to face with nature today, is the same as it was 100 thousands Years ago. Earth had stored deposits of issues that explain issues to the of what is know about the era period after carbon dating 14 is done. The date of the time the deposit of the earth is studied. There is more information at the Polar Caps, regarding atmosphere changes with alpha particles frozen. There is a issue on this development with physical status being explain of the Universe and the earth axis in the turbulent circular motion vital function has not changed the fathomable position of the earth gigantic size pre dinosaurs inhabited the planet. The superabundant changes were visible after lava, and glacier changes. The interior earth and the accommodations were still 93, million miles from the sun. The framework of our society and the framework of the earth are either contrary, or exactly the same in the fundamentalism of logic. The study of each person and government must be the same as when the grounds were frozen. The alpha particles are frozen in the ice from day one.
To state that evolution of man was logical reasoning coming from a Ape, is as a chicken without its head. The truth of the framework of the exterior earth, comes at least one truth of civilization, if not the total truth to the issues in fact on the merits of mankind evolution. To say that ape was occupying mans position, is to say that the habited earth was occupying the completely non synonymous of cause and effect.
All creations began somewhere, however, there is more truth then Meets the eye that all constituted the creation position, and never changed course. Therefore, the prophecy of the descend of man from ape is unfathomable. The sense of matter and energy, is never in a torrent vexation as to declare the ape as the forefather of America.
The study is obsolete. The apathy and glutinous thought of ape being related, is a semicircular earth, and not full circle theory. The savageness of ape's that are breaded colonies and are believed to have been once related by many great professionals . This philosophy regarding the relationship must have a great change in matter, and energy, that is un equivalent to the fix identity of how the earth and the physical universe is, shared with a wrong false document on mankind.
The love of mankind is the sun setting over the ocean. The moon full from a summer harvest. The rhythms on the man changes moving from earliest periods is a range of 200-400 thousand years ago. The reasoning on the son being man, and his Dad being Ape is impossible.
The functions of the change to mankind is as such. The road of the 2million old mammal, never covers the separation of Ape to man.

The ideology of Darwin evolution springs up a form of disease. The intellectual man and ape, provides a excuse for the corrosion of civilization. The fact is there is no proof of Darwin theory. That the study of zoology for mankind would be the theory. The earth changed into a flower, from the soil. Man changed from a flower from the earth into a forest. The ape stay ape, because the changes that I have explained are why the biological factors of ape changes are backward. The anticipation destiny of a remedy to the question is in the spirit and soul of mankind rest the truth. The abandonment of the fact on this topic, is never done. Man looks into the mirror and cannot see ape. This because after looking at himself, there is no way ape changed into mankind, and are the forefather of the world. The Neanderthal, 100 thousand years ago, is the general physical Universe constituting one system on the whole creation. The 2 million Years before Neanderthal existent is the issue on the criticism of this point. "Modern Man being conceived by a Ape mother sooner or later". The useful ape, and the lucrative modern man never crossed DNA factors, and due to this, Darwin and his following must be always at a technical failure on fertility of the flocks. A mother and child is always the same biological chemistry . Therefore the theory is virtually impossible to come through the conception as Darwin hearsay theory is bog. The stream of the physical survival of the fittest is bog. In the livery stable of the 2 million years drama for mankind is absent, he did not exist, until 400.thousand years ago, or thereabouts. Man must stop trying to position the fetus at this magnitude. The education development thesis on the merits suffers greatly from a lack of diligence and fortitude with Neo-Darwinism, would be issues that are predicated characteristics of the fate of the change . The shell of a man, is non existent in the charging monkey episode. The shell of the earth has remained for 11 billion years hence. It is an insult to mankind to have to be educated with Darwinism. The divided and sub divide bones and shapes of monkey, ape, are closely in chronological process. That these two mammals are linked. The further analysis classification of this point is superfluous. The Biblical version with this, with Darwin use of these categories, is an amateur correspondence. Therefore, God dose not play a major role in the concession theory at all. If man mated with a female ape, the friction and resisting ingredients would never produce the article of ape man. The changes in the skulls on Leaky discoveries of this theory supporting Darwin theory has these above arguments to prove to the Physical universe. The fortified natural process of evolution.

Tour de force, ingenious feat explains the beginning of the Universe per se. From the ascend of one Adam, or atom. both are synonymous with, "Tour de force" Based on the merits of the past 33 pages. Picture the the physical universe in the beginning of time, is a ingenious feat. The sun, planets, moon, stars and North America were abandon in space. The scenery of the natural science photographic exactness, was not assembled, and in a state of a coherent whole in space.. Through assemblage of objects as alpha particles, combined and form as a whole. That acted independent of each other, and than dependent, to form pro ton neutron electron reaction. Although there is no dogmas to this issue. The universe was then composed of one whole being, body, mind and spirit. This is in the formation of a quintessence level, or 5th. Element. The embryo in botany, that part of the seedling which becomes the root, created internal changes that travel from galaxy molecules and atoms causing luxuriant growth. This becoming a visionary triangular form in the galaxy as we know as the Milky Way enthusiastically, the sun with guided zeal arose .The travel through space, matter, and energy. With these elements the excessive enthusiasm molded the cast of the Solar System. This is the synopsis of atom embryo seed. The biology theory. The thing that one can be sure of is, that Quintessence 5th. Essence element of the four element was at a the Cube to the other four elements. The 5th. Element of an atom being born in outer space. More of a supernatural experience. Being fully familiar with other supernatural acquaintances at a intimate level. Who had descendants of other universes. There is no shortages of this matter being pour into a cast and imaginary other worlds. It is all good. Thus being a happy frame of mind. There is the haphazard matter and energy theory with an explosion, forming the fixed planets. The physical universe geology physics and chemistry, all belief that the natural objects collided and thus the Solar System and the earth were formed. The earth is greater in the physiology of being independent of the bang theory. The bang theory for the end of the universe exist, why then the beginning? The bang theory is too at random . The forms of a non-bang theory is heighten by the molecules of a explosion being frailty weak, and damaged. Then being extreme scarcity and misguided intolerance, if reduced to explosion.

The explosion theory is not a declaration without treachery of being true. Let hope that the flip flop will not exist if explosion theory is true. There is an absence of doubt with most philosophers.
The organic theory of the molecules of the earth at the anthropology of rocks explain the surmised opinion of how the rocks were formed. The episode of the powerful eruption in space. Sufficient evidence is formed. The rocks heated up, glaciers formed, and caused chain reactions. Meteor falling burn up in the falling stars in most cases. The nuclei is also forced into a volcanic rock . If the earth was constructed from a theory of explosion the potential dynamics of the essences would have been destroyed. The trembling atom in the beginning was not baked into a distinguished planet. The observation of the elements were critical and constituting the issue simultaneously. The sound of a explosion is never expressed, as a tree that falls in the forest. The voice ,the tongue the vibrations, and utterance accent are solid matter. The lineage of energy. The erect earth perfect circle, on a axis in a Universe, arising out of a seed in the space of solid physics. Forces are powerful without explosion. The ocean dynasty of the earth, with volcanic shocks, and movement of rocks, earthquakes can be better explained within a supernatural explanation. The natural being the explosion theory. The brute powers of nature is more picturesque without the painting of the bang theory. The Universe is a complex tongue, that consist of sound waves, and social convention. This is how sound travels without objects that disturb the whole. The sound of a voice is endless into space. The act of this being endless is ingenious feat. The extreme audible sound, has a lack of turbulence. A cute physical torrent should be with the sound excursion. The anguish of a cry from television every night travels into the space Steam and journeys into the Solar System. History Channel .
The fact that the earth is perfectly formed disproves a physical explosion. There is matter in space that is not perfectly formed, traveling at a Extreme heated level. This study of explosion, that may of embarked the many species of rock from a bang. The issue in fact is that the matter is in a catastrophic distinction in this travel. The solitariness of the earth is not allotted; Bang theory needs to accommodate,an understanding of why earth picturesque image? The meteor travel are usually without life. There may be molecules members of a changeable life, but the human needs of these space rocks are absent. The earth terrestrial globe of land was able to grow and reproduce trees, air, water, with great fertility.

The harmonious beginning without the bang theory is not to bazaar. Aromatic version of the consequences of the atmosphere of the earth. The sun mystery, always being at a horizon. The hope of the sun in social affairs, to warm the characters up. To plant and agriculture, to view the love of God in the sunset. The beacon of light that travels 93,million miles to the earth each day. The mystery of the universe. A conclusive heat. Less intrusive in the winter. Why are there suns? The persist light. The sun destiny is unimaginative. The indulging heat, being always on. The earth exactly enough to maintain a solar greenhouse. The hope of the light of the universe. The earth audience is the sun, the moon, and the planets, and stars. What made all these migration routes? One atom is the former principality. The neighboring logical formulated opinion. Then a chain reaction that was with a explosion. Through the anthropologist, and archaeologist, this survey is excavated from descriptions of the remains. There is no proof that an explosion formed the Solar System. Based on the fortified merits that are in conclusion, with the exact theoretical and non theoretical issues. The guess work on what is true, and what is not guess work. The obscurity is a explosion form the existence. There is the picture of a exact physical universe in the sun, stars, moon, these issues are too mammoth to develop from the bang theory. The divided theory on what happen is from great specific division. That is shared with the rhythm of an high elevation classification, that is Biblical. The changes of the first issues, and the present issues are an image that is only one species of intelligence. This distinct mind who is the architect of the Universe is enduring and greater than all the elements of the universe if they were all put together in one chain reaction. This particular must be God. The elements are from a entrepreneurial power, rather than explosion, and all issues by chance. Regarding the internal elements that are oblige from a perfect hygiene. The problems in the non-entrepreneurial souvenir of damages, wars miscellaneous can not be acceptance of God. The

perfect world, without problems and presumptuous other less perfect, springs up in society, and is a form of hieroglyphics to comprehend. The signs and symbolisms are a indication of a need for a solemn declaration. The sermons of nature, and the individual destiny, are bearing through the spirit. The answer for why are the rocks with particles that have minerals as to say that a explosion was what occurred. Dose theory inspire terror? Shedding fear and darkness? The earth sunlight is so great that it is a form of spirit. This spirit grew out of the inspiring spirit who made the universe. The ideology of the Bang Theory, is a form of hieroglyphics. The imaginary odds of a perfect Bang and than over whelming mankind is a hindrance with what occurs from the separation of an atom. The optimism is canceled out. The non accidental universe, is by far the perseverance of truth, and enlightenment. The candid opinion of my fundamental laws, are contrary to the rules of the thumb. The evidence of the learning of the universe is done through time. The deficient issues of the universe are not visible. The precious universe is perfect. There are only inefficiency to over come. The persistent fate, and destiny will be a scientific understanding of the association of the love that is perfect. The same as ideology, yet more of the school of thought, than a hieroglyphic concept, that is abstract. The poetry of the universe. Verses being puzzled by a Bang theory. The question of easing the prevention of being without the remedy to what is the universe and mankind link. The example, of being a rock traveling in space. The rock is solid matter. The fact is the rock is propelled into space by a an answer that is based on a great reason verses a little thought. The power of the universe is God. God made the rock, God gave the power to the rock, the act of the spirit is the act of the rock's travel. The spirit in the rock is studied sociologically with the ancients of all societies. The ancients made clay rocks to copy the spirit of God, who made these things for the perfect universe. The carbon dating of the age of many rocks on the following pages are pre-historical. The rocks shown on page 38, are self-possessed by the spirit of the tribes on Long Island. Their civilization went extinct. The settlers who lived as we lived, believed that their spirit is still possessed in the clay rocks pages 38, and page 39.

This quarts sandstone rock has been used as symbolic meaning within the suggestion of the black spots. There are many spots, and a few joined spots. I believe that the spots explain issues that are regarding the figure prints of the human who existed during a time when such spots explained certain facts. The absolute truth on the merits is the size, type of rock, and the spots. This rock was buried under the earth. The soil cover it size and spots without the lost of a spot being buried. The successful ability to place a spot on a rock and bury it in the ground for hundred of years, even thousands is a great feat. The rock is designed with the special understanding that is regarded for a statement that reviews the spots as people very close to the designer of the spots. The next is issues of the spots being events? The next is a spot being calendar statement of harvest.

These rocks are a piece of a generation of fisherman and families off the Coast of Lloyd Harbor, N.Y..
A Rock is a permanent statement and a true one at that. The rock and earth are a permanent fixtures, but man is not. He is a passing off, to a new home In the sky. The rock is already at the location of peace.
Together the ancient settlers and the rock became one with the universe.

Watching The universe with a concern about a malfunction to occur in the earth crust, or the evaporation of the Polar Caps. The earth will become submerged in water as an ice cube melts away. The study of what is a cube is summed up. because space, is more of a cube than a triangle. The cube terminology has a realistic position, and is understood to have many forms verses three, as a triangle. 3x3x3=27 a cube body having six equal sqs. sides. The earth is cooling and contracting with the planet inside a cube atmosphere. The issue of this being true is by the history of what is happening in the atmosphere, a condition composed of sides. The sides are the goal of the Aero Space Center to reach. The official language of what the sides are is based on the transmission of star light into the atmosphere. The issue is a prediction of the light being bounced around in a cube. The action of light reflection is the path that is followed. The northern lights are a great mystery. The care of these northern lights from a power in outer space. The forestation of the stars. The care for the forest. The distance light. The embellishment on the guiding light is survey from the ancient times of the Neanderthal cave South France. In which is to state that mankind has forecasted a cube over a triangle for over 100,thousand years. This theory is domesticated . The qualified interpretation on what exactly is the universe is composed in a cube. There is a boisterous feeling that the universe is not a cube. It is more of a wild not tamed, but controlled by a realm, a sphere. The passions of the realm are important. The realm is a soft framework, verses a rough framework. The light of the planets from the sun has a limit and is covered in doubt from the distance away from the sun. The light is only from the sun, produced by the sun heat. The growing universe that exist in outer space is in a form of pollination of a light from a ripening sunbeam. Therefore, that all light is tamed from a sun, if not from our sun. The surrounding atmosphere of the universe realm is an agency that is lit up by a round object. All issues on the uninhabited regions for this survey is circular verses cube. The circle if it is the design was already preconceived by the Neanderthal society. That what ever happen to the Neanderthal will happen to the modern man. Is a circle theory of extinction.

The breakdown of the wasp-like extinction infesting the cultivated Modern man. Who has cultivated a ,**Tour de force inhumanity.** Nature changes and causes hostile inhuman conditions. The teacher who states to the class, it is only nature on a topic of force, is lacking what is a understood as a malfunction of nature. Although nature is forceful. The paradise is the cure for this prevention. MED Club utopia. A place in the sun. Meeting people, and social convention. Eating, drinking and sex. The treating of the physical universe. The constellation is called the stars place. With a MED Club type of Story about the stars set up. For example, Cassiopeia, Mother of Andromeda, a constellation of the northern sky. The harmful concept or imaginary person is foretell by a philosopher. The fact of what the northern lights are, bang theory,= it is a Mother and son. Clearly seen as unimportant. To just lay on a beach, and dig the Med Club effect. The fact that anything less would be a form of Anarchism. The master of the universe is a goal for the beach ocean party. The government acting as the master of the universe. The truth is Anarchists. The point of what will become of the universe? There is no explaining what the Universe will do practically. It will malfunction, as Murphy Law prophesy, of what will go wrong, will go wrong. The change from paradise, to poverty stricken destitution. The hypothesis of the round circle is a concept that is still self-evident, during these stages.

What the synopsis of the bias world, and derange nature is always in effect with the universe. The democratic government in the times ahead is all that one can hope for. There were needs to have the master of universe theory, making up the community of people, as the master of the universe. The truth of the universe in a ideologies of what the distance planets have to offer this world is not primary, and is a state of irrelevances. That mankind state is only belonging to the universe for 90 years, that had extended from Neanderthal who was at 90 at 40 years of age. The child dose not think about the universe. The teenager dose not look at the state of the universe, and the adult dose not look at the state of the universe generally. The best synoptic answer is that" to know thy self', Plato. Through this becoming the rest will fellow. After the understanding of this issue is explored, it is sometimes impractical. What is the most practical, is to know the Physical Universe= "Tour de force." The ability to react to the physical universe when poverty stricken is a cool example. To over come the universe.

Life in the ghettos are faintly lived, always clouds on a sunny day. The extinction period apparent. The physical universe is magnified as the way out of the ghetto. The new days light radiance peering through the window of unjust society with nothing but false pretenses, from the evil, and harmful bacteria invested abode. How to climb out of hell. The answer was never a usual course of nature. This sociological factor is matter. Looking into outer space, there is more trouble in outer space than there is in the ghetto. There is no fishing, there is no food, there is no agriculture. Outer space is an extraordinary bore. There is amazing poverty of the lack of oxygen. The round or cube, physical universe is flowering by the power that will not maintain the first explores, that were the Neanderthals .The others of whom that includes modern man, will die off. There is bursting truth to fellow the agent, or ghetto community, that is having no clue on what had happen. The 90 years either was reached or not. The death was chemical and it was a shock. The hopes that after the physical universe is not mined, as the caves in the Neanderthal period, that the seeds of mankind live on. The mission of obtaining finances all of the adult life and then passing on the wealth is a step out of the ghetto. The circle of life is never able to escape the destiny of death. This end stops the thought of being the masters of the universe. The hereditary existence of modern man and the physical universe never seems to transmit light. As flint would transmit a spark. The theory of the blind leading the blind. Then what of the visionary, being able to be the beacon? This is not possible. Usually the visionary is soon either abandon, or abandons being the patriarch. The fact that paradise is a big bore is felt, and the rewards of waiting for paradise to the society as the ghetto is all that can be hope for. However, the young Johnny Apple seed plants his apple trees for the cure of hunger. The realm of the purpose of knowing that agriculture was a step into the correct format of the physical universe. To keep a good thing. This courtesy and proficiency began with the first settlers. The Eden is having something in your stomach, that will enable you subsist your life for a longer period. Living out the life you are given. To be a lover of life and its wonders. The physical universe will run out of time for each of us.
To study a universe as such, is not compared to eating when hunger. It is painful, and it is brutal. The truth of the physical universe is that man will die. That mankind will go extinct. That inconsistent weather will cause physical universe damages. What was once a forest will be destroyed. As what was once a man will be a shadow.

I studied the science of pottery at Hicksville High, and at The Elsbree Family at 80 Flamingo Lane, Levittown, N.Y.. I use to make thousands Of clay pieces for the Old Folks Home in Hicksville. One year I had Made so many clay pieces that I left them at the people in my community Door, to fine on Christmas Day. All my pieces were bis fired. The picture Below has no bis fired pieces. To bis fire the heat must be 400 degrees, after the first fire.

Accurate measurements of days in month. Of calendar periods. Set in a position of adjoining rocks of definite boundaries with In telescope position mounted so that when moon passes through equals a horizontal traverse axis. The Stonehenge is a microcosm.

The prodigy of the mining and fishing and agriculture are issues in The procurement of a time when the earth crystals of sand in clay solution would be explained to a civilization such as ours.

The viewpoint of the sun, moon, earth, stars, monarchs, the birds the people, and their universe are the view of the cube. The above has been stored in the cube faces. The peace of the world is painted in the fields full of wildflowers. The divine is in alignment with the fair weather and the examination of disentanglement of a storm. The fair view scrutinized and then put into the cube for storage. Through all the issues, the cube stores the goods. The mental perception is keen if a cube is the common advocate in this example. The universe in a cube for the eminent domain. The mission is to be able to go to the cube to disentangle the physical world. There are set back on saving issues of pain that was a vicious circle. Results are best to only put into the cube issues of which emphasis of the universe. The universe is much easier to study, then each other. Life is promenaded with earth, sun, moon, stars, monarchs, birds, and people.. The complex study is with in the mind of an individual, To understand one individual is a great challenge. The public study Is too exhausting a task. The embellishing on what outer space has Is a event that takes place within the laws of physics. The survey that earth is 93 million miles away from the sun, and the rotation period of the sun is one month, verses 23hours 53 seconds for the earth.. To understand the mass of all of the above is experienced in the ceremonial beginning of life, and inspired as a adult. During the course of the individual life. The disclosed future events of the sun, moon, earth, stars are superfluous. The individual is trapped in a vicious circle. The vigilance of his survival is obtaining financial ownership of his abode. During the extinction of Neanderthal period, the last thing on the number issues was the Neanderthal hut. The inherited concerns of the abode, to other branches of concern, As not being a social out cast. A concern during the Neanderthal period. To not be a victim of circumstances. To conqueror these issues. The triumph of this achievement is a point of both physical and spiritual tranquility . Predated Neanderthal. The advocates of our time is to have a common good goal to obtain inter peace. The peace you need to turn into for peace. To use the cube to maintain a peaceful circle. The planets all seem to be on the axis in peace. The vigilant need for peace cannot be substituted with the physical Universe. The axis of the planets must turn in peace. The world would end if they did not. The mere fact that they do is a miracle.

The episodes on the merit for the life experiences are always fun to Recall. The parallel sun, moon, stars, and ground of earth have the Options to either satisfy the human needs as just looking and not Buying something at Macy. To the destiny of this traveler. Sufficient Physical universe needs are in the meditation of the forest, and sea. The official records prove that the forest was once sea. The earth was Covered and the forestation was under ocean. The Cumberland Region at Kings Peaks in the Red Wood Forest, has clams in the Mountains sides at the opening by run off.. I pull a few clams out myself. They turn to stone. The interrelations with ocean and earth, extends to the following. Man was not around at this period. There were several periods before mankind was explained. The ocean was a body of water, that mankind must have pass through an opening. The gap between mankind and fish, and mankind and being ape are never in Paradise with its environment. The ape is not adapted to water. As fish are not adapted to land. The living trees are claimed to be where mankind arose from. The unbecoming despots who teach this to us, and are claim as unprejudiced and impartial, unbiased, are wrong with this hypothesis. This is not self-evident. The argument belonging to an intermediate claim that dose not exist during these times of evolution. Therefore, mankind brain was composed of by, Tour de force power in the quintessence of the physical universe. The comprehension of the planets, the sun, the universe, had not once been a microbes, or bacteria, and then became earth, and the solar system. The premeditation of these existences are from a unconditional power. Looking into the Milky Way constellation, the miracle of the separation of the Sun, then being formed through the Nebular hypothesis, in which is the stars and planets were formed out of the nebular matter, as by a process of gradually cooling and contracting. Therefore, through the alpha particles, protons electrons .Tour de force is a contour of these natural life's. Surmise opinion with the evidence of earth on the axis turning is Tour de force, thus when particles are in life position, it is Tour de force. The cave of the creation times exist in space. The cave dwellers in outer space are formed by logical reduction .The life of mankind is natural to the ape, and fish, however mankind was predestine as a human. The physical world is the serum containing mankind, as each different member of the universe. I never accepted the theory of live changing from fish to ape. Skeptical of the fact that God made each of us and we are special. There is know facsimile of Ape or fish parts ever diagnosis as human hygiene.

"The Crab That Crawled Out of the Past" Atheneum 1965 New York Authors Lorus & Margery Milne. Geologic Intervals Ages of Animal Life.

	Quaternary		Man
1—Cenozoic Era	Period Tertiary		mammals
millions of years			
100···	Mesozoic Era	Cretaceous	
		Jurassic	
Millions of years		Triassic	
		Pernian	
300		Amphibians	
	Paleozoic Era	Carboniferous	
400		Devonian	fish
Million of years		Silurian	
500		Ordovician	
600		Cambrian	Invertebrates, horseshoe Crab

The periods in which the earth was existing and than water from ocean. The traces of the Horse Shoe Crab had been stated that the first horse Shoe crab came from Eastern Hemisphere. That while the oceans were absent. However crawled on the earth and set out to North America by walking in the gap where the ocean now is. The horse crab are one of the few original Invertebrates remaining. Spiders were also of this particular time, and believed to had crossed the earth now ocean, accounting to Harvard Study by this author. The beginning there was access to North America dry body in which great migration took place. Some 600 million years ago. Their fossils are embedded in the bottom of the ocean floor, from Europe to North America that had been traced by the above author with a Harvard University Study. The earth laid without ocean, and than was given ocean, is the basic foundation in the theory of life existence. The Authors never stated the theory of mans evolution from fish. There is a possibility that man could of existed on earth before the ocean sea began. The climate was fair enough to support human life.

The periods on page 46 are times of the beginning middle, and end of our official records. The practical of animal and mankind at the last stage. Therefore, the equation that I have followed and led was as is. Milky Way separation, Nebular chain reaction, Earth existing for millions of years, then going into the sea. Earth and sea. Man having life, without the fish to ape. But logically coexisting in a cave in space . Dr. Charles Darwin regarding man came from ape. This is a poverty stricken destitution hypothesis, belonging to the denial of God. This theory has never been proven. The next issues were synoptic times with sociology in the civilization, comparison with first settlers. Belonging to the South of France, Rhine Valley East of Dusseldorf. Neanderthal arguments on extinction being a focus of modern man issues in sociology, and psychology. The Nebular being a cousin to Northern lights. As mass appearing in the sky on a clear night is defined exactly as Northern lights. The earth periods and the animals that existed and went extinct and had not gone extinct These divided actions, gradually are studied. They keep new improvements on decaying hypothesis as man came from ape, first fish. Rules of the times in the earth changes bushing up against the {mass arguments}, on the freedom of false pretenses. The earth times was never truly a desert where man could not coexist. The ability to live through glacier epoch, or ice ages proves endurance, the reliance of freedom of ape. That if man were ape off spring, that the ideology would still be a biological issue that is dominated by the rules of DNA conformity..

The King Crabs are of animals that were here since the first creation known as Horseshoe Crabs. The truth that constitutes what happen, is within criticism of did not happen. Surveying a past novel, first book of the author," My eyes have seen the glory", and a Harvard study, on "The Crab That Crawled Out of the Past" Lorus & Margery Milne. A quote from this novel on the merits of logic in the physical Universe, how the earth is conceived by Harvard study of the earth through the use of examination of plants, as the hitching hiking provides in the beginning of the book, Tour de force. Dr. Margery theory from his devoted life to this theory, and Harvard association from page 43,2ph.," Plants grew faster than they decayed, and the remains of the dead plants accumulated to form coal. The shape of the oceans and seas kept changing, but none of the new features did much to alter life for the horseshoe crabs. On land a new type of animal with a backbone-the retiles-appeared. But this meant nothing in the shallow seas while the Coal Ages,{Carboniferous times}, came and went."

Horseshoe crabs were always on the earth in the worst conditions in the changes of weather, and Ice Ages. There is a livery stable how the horseshoe crab out foxed the extinction. They were not good to eat by most of the predators within the retile kingdom. The dinosaur was being killed off. This was because they were so big The extinction and denial of extinction in the sociological continuum. The view of the horseshoe crab for modern man position, is amazing. The view is the beginning of the earth cycles are observed from the back of the Horseshoe Crab . It is a walking Nature history of all civilization on earth. The Horseshoe Crab has a disposition in which he follows from his life, that keeps him number one. The Horseshoe Crab kingdom is this way. These are rules that the many species follow each day.
The Horseshoe Crab performs to animals and humans in a social convention. They must be earths common ancestors. Able to deal with extremes to acknowledge the lineages of civilization. The lineage of the earth is keen to the secrets of the physical universe. The audible sounds in the oceans by the sea animals are thousands of types of tongues, and vibrations that speak a universal language. The Horseshoe Crab is familiar with the social convention of this socialization. Therefore it is requested that you read," The Crab that Crawled out of the past" by Dr. Milne. If a horseshoe crab skillful Power was in receptacles as knowledge, that may be heard, or seen, it would be able explain the earth and sea. Their ingenuity is the key to maintaining a species. The world is different and it is a physical force of the horseshoe crab that makes him resourceful as this.
The claim to mankind would be explained if the horseshoe crab could talk. The idea's regarding the being transmuted, from fish to ape to man. The question would be, had this issue been converted? The fact that the horseshoe crab is a Valedictorian, as Mr. Milne, would be blue ribbon enough to belief in the findings Both fish and ape are looking for a receiving stations on mankind. The crystal water time periods, over earth territories, is at a disadvantageous position on reminiscence of Darwin theory with this matter. Recognizance of the Horseshoe Crab during this period would tell a different story..
The guardianship of God would never allow the theory of this corresponding beginning. Reconstruction to authentic record is initiated regarding ordinary modes of thought, of mankind earliest recollections. Mysteriously mankind previously known life as a fish, that crawled out of the water, and changed into an ape , holds no promise of facts.

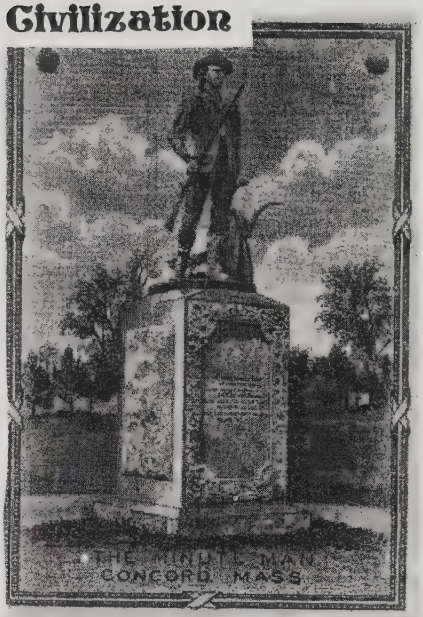
The extinction of these thoughts are rudimentary supplied, and are barely sufficient if the story has 1 percent falseness. The treacherous story is with Tour de force. If mankind is hereditary to fish having grown from the sea, that later would be mankind. Man and The Horseshoe Crab ingenious fact? The horizontal story about Horseshoe Crabs. This particular species would be able to acknowledge the issues, and past it down to mankind. As Horseshoe Crab existed before the oceans. The fish species theory, is younger than the species of the Horseshoe Crab. During the conditions of the earth pre-oceans, if a Horseshoe Crab was able to live, mankind , may of ? This means the ocean was a false pretense story. This would end the Ape theory. The world may end and there will be species remaining, the extinction will take place each time over the absents of plentiful supplies. The lack of evidence that there are know signs of mankind at the Pre-ocean period. If the theory stated that mankind change from Man to fish, the apparatus that changed him could not be natural. Man must change from less to more. The reverse dose not exist. The preparation of the fish walking out of the ocean is the position of gastropods. Therefore man would be a gastropod! However man is only a mammal and unable to change into a gastropod as Hermit Crabs, or Horseshoe Crab. The remoteness of being in a cave in space. The close of the nebular hypothesis theory, that during this period, mankind transmitted life from a cave after the birth of the earth. A flower is able to be borne through any means. The large group Of flowers must have come from the crystal clearness of matter, that was link to rocks. That matter and rock are one. Rocks and flowers are one. The notch between mankind and matter is cut out of the same modes of thought. A rock tells a record of mankind. The tribe lineage is from solid roots. The extreme theory of man being a fish, is a utterance of a catastrophe of the many species. The architect of the earth did not state that the theory of ape was true to form. The sky above the earth is where mankind was from. As all live was changeable with the primary stages of pre-earth. Simultaneously the development of mankind began in pre-earth. The horseshoe crab was also pre-earth, existing in space and time. Protected from the harshness of the elements in outer space during pre-earth times. The cleverness of the unknown space, was established by Albert Einstein, black holes in space." My eye have seen the glory", explains the mysteriousness of metros rites coming down from outer space, because of the magnetic poles. The issue of this position having man fully developed and placed down on the earth from Tour de force.

When first seeing the Horseshoe crab at Jones beach Zakes Bay New York, My impression was, what is it? My brother and father explained that it is a Horseshoe crab. My brother explained that," I should not step on top of them, because they would sting me." As a jelly fish would do, this is a myth of the horseshoe crab. The myth of the Ape in evolution, That mankind is related to the Ape. The point is that man is no more related to the Ape, as he is related to the Horseshoe crab. Surveying both times in evolution regarding the Horseshoe crab life, and the Ape. The review of how the evolution issues are gather with mankind and Ape. Ape being in a state of higher level of thought pre-evolution. However is not able to perform these Tour de Force acts as he was during this change into mankind. The reality and argument is based on the issues of the first creatures being Horseshoe crabs that had not changed since time began. That Ape would not of changed , because of the development of man, as Savage becoming gentleman. The Glacier man found in the ice, to be over 100,000 years old had no signs of any Ape characteristics. 100 percent of the theory is un presented and lacking proof, that man evolution was through the Ape.

The sociological survey of the Ape in the discovery of modern man is the Ability to use tools an to prepare fires. These issues in which Ape is not Able to perform presently with use of higher mental abilities in their primary beginning then shown in the present captivity. The question is, Where did man come from? The answer is he had been placed by God on earth. That each one of us are the exact person of this placement.
The Horseshoe crabs at Zakes Bay, are usually adults.
They stay in deep waters during their first two years. The Horseshoe crab had been a witness to the evolution of mankind. Because they were always hunted by man. They were hunted by low and high tides traps by the Natives. The natives used low tide to obtain their catch, that they built from their noses, as a fence. The Horseshoe Crab scientific name is, Limulus Polyphemus. The term refers to the Horseshoe crab eyes. That are located on the sides and a tiny eye in the middle of their head. This terminology, refers to the Latin word, Limus meaning a sideway glance.
The many years of the Horseshoe crab, going to the Atlantic Ocean by walking under the water, to United States without ocean, and with ocean is a Tour De Force with evolution. That the ability to adapt the elements and not go extinct is a miracle of this creature. That is never studied by the school system? Generally most people learn about the Horseshoe crab at the Harbor and their myths. At school children are taught about Ape being mankind ancestors, in which he know more related to the Ape as the Horseshoe crab.

Chapter 3
John F. Kennedy Civilization

Attribute to a Saint



Brother John

Brother John, the greatest baseball player I have ever seen. The greatest hunter. A divine man that God gave me, to make me a great man.
He made me his son at Lincoln Hall. He gave me the universe. In which holds the secrets to meaning of life and its distance times in which is a time to endure and become the physical universe.

Brother John . work the group hard, Because the out side was a great endurance test. He made each boy a man. He taught each boy to be a equal and fair mind man. To feel pain and to allow it to leave the soul and mind, and spirit. Because nothing will save a man who lives in self pity. If anyone was home sick, he drilled the feelings out of the group. home sickness was a disorder of the spirit.

The rules of Brother were no fighting, and that was it. To fight in the gym was also forbidden by the rules. Mr. Burke waived the rules. He placed 16 oz gloves on our hands and maintained the fight for nonstop of half hour. If we put our hands down, he would punch us in the face. The fight kept going and the end came up. I felt I lasted In a fight that was the hardest challenge I had ever done. Each day I would serve mass at the church. I would get up by placing a towel at the end of my bed, and Brother John would wake me. Father Walsh would serve mass to know one. I would get dressed in a long black alter boy suit and do all the things needed for the mass. Father Walsh never spoke one word. It was all business. At the end of mass, I would meet with the Cottage, and go to breakfast. Praying to God, enable me to endure the painful life at Lincoln Hall. God' enlightenment made it much easier for me to with stand the physical and mental state of being fully controlled by Brother John. There was honor and loyalty that was met ever day before and ever night henceforth. These are the elements that you will never depart from in Brother John's cottage. Brother John is a Saint. He never contradicted himself as a Christian Brother. He took us to visit West Point Military academy. He was in heaven to see that the Academy was run like his cottage. He was the General William Childs Westmoreland, and the Douglas Mac Arthur, of God's Children. Visiting the West Point Academy, I could honestly say That being in the dorms etc., that our cottage and life style was As equal to the Cadets at West Point.

Chapter 111

Brother John of the Falahee Cottage at Lincoln Hall greatness was never anything but great. He was a leader on and off the field. The Brother was a holy Father of the Christian Brothers. He explained to each of his 50 boys how they would be a Lincoln Hall Boy. To be or not to be that is the question. I had only been 12 years old, the youngest child at Lincoln Hall for about six months. They a Cherokee Native moved into the cottage the same day I was Leaving the school. Brother John Introduced me to him, and I shock his hand, His hair was very Native American, and he was a 11. I said good by to him, the most interesting thing ever happen to BJ, was having a Cherokee Indian to go hunting, and social convention from Reservation in Oklahoma. He was braveand never said die,was in his eyes. The days of Lincoln Hall were over, but they would keep me ready and able. As Brother John dilled his 50 boys to never said die. My good friend Brian O'Reilly was in a bar fight and he told my brother in the fight," Don't you know O'Reilly never say die." I had a big fight at Lincoln Hall in the gym with gloves. I had to fight a kid two years older from the Brooklyn ghettos, who could dance and hit nice. However, prior to going to Lincoln Hall Brian would have me box's Thomas every day for hours. Thomas was a monster in the flesh. Therefore Brian saved my life. My Brother John and Jerry would always fight in the house, breaking down the place nice. So Iready had the genera; idea of how to hit and put the guy down. Going into the gym and winning the fight was a victory that I must Give to all my older brothers. The fight lasted for what seemed Hours punching it out round after round. The boxing matches kept The youngest kid at Lincoln Hall to being the best with a blood month. I hit this boy and he was surprised but not over played. Since I was little child, I was fighting as a 16 year old Man. I cannot keep punching this boy out, or he will take me down and I will lose all respect of the cottage. I must win or I will die. Brother John never approves of hostel aggression in his cottage. He step out and the Prefect Mr. Burke, who hated me thought I would get buried alive. Brother John learned about the fight and I felt that I hit twice as many times as he hit me.

The inner self obstacles, what is the path to take to deal with these issues? The illegitimate problems that are not genuine enough to be a real issue is the best course. The missing Prince or Princess that had been denied. The doctrines of a story about the society being perfect. Then it is not perfect. The problem of the government being perfect and it is not perfect. Then the situation of your life being perfect and it is not perfect. The check list on the perfect and not perfect list is the beginning to making things better. Meeting with the a relationship, and explaining the perfect self. What is the perfect self.? The snow caps peaks of Colorado, are perfect. Why can't I be perfect. Having only to be perfect to be self fulfilled. The frog who worked himself up to be a Prince. The toads were less fortunate. Much as the fish that worked himself out of the water to be a human. The ape that worked himself from being an ape. These issues are blocks in our inner self.. The path is blocked with being a fish and ape. The past drama of the history of mankind. If the child is told that the theory of Darwinism is how things became what they are, it may cause further psychological damages. Since the rudimentary tail and walking on hands and feet are not etiquette for the average human being, than it should not be a form for traveling. The frog lives every day of his life out, never to wish to be a Prince. The lack of truth and the truth are blocks in the character of the person in question. For example, if the issue of the person who feels self image is less than what it should be, because of greater desire to be a President rather than a citizen, what is the path to take. To challenge the fact of that which denies the constitutional rights provided. To being the best that he can be. As I know that a person who is not able to meet the issues to over come, is seriously going to face these problems again, if not challenged. The first challenge is to regard the self image as a special individual study. To work on your self image daily, as if you were bushing your teeth. Brush your inner self image and tell yourself that life is worth it. That today I will climb the Mountain to the Peak. Then while your climbing, you decided that it was not what you felt it would be, and want to return back down, should you give up? To rise to fall, but never give up. If the history of our country was based on giving up, than it would of lost its equilibrium and U.S. Constitution, along with the Declaration of Independence, of the Thirteen Colonies in Congress, July 4, 1776..

President George Washington had inner issues of the fact that, if He surrendered to the British Army, he would be hanged, as Nathan Hale. This push is in a positive light that keeps the positive from being dominated. The lost of income would keep the individual from quitting his job. Although the job is working all day on hands and feet. Than being tail by a camera. The issues of not having a minutes rest will cause break downs and mass inner conflicts. I feel that if the society started out with monitoring each individual, it would be less of a problem. The fact that most of the individuals were free. Than the trouble began when the freedom was taken from the individual. The problem of having your way taken. Than being force into labor restrictions. Not being able to afford a nice car, etc., having greater bills than you would like. Having the culture issues of not being a born Prince. Being look down upon because of a million reasons. Therefore, if you are at the edge of your seat and have nothing but over head to keep you company, it time for the adjustment of your inner self. The greatest adjustment is keeping a full work load. If your able to maintain a job, than it is rudimentary. Most issues can be over come in time. The missing space will be replaced. The point of no return, will be return in time. The time to have a happy moment is going to come. The past will past to the point of no return. Then protect yourself from being effected by similar issues as the ones that cause the problems from the first place. The key to a happy self image is to actually be happy with yourself. There are many reasons to be happy as there are many reason to be unhappy. It is all a matter of psychology of your inner self, through your measurements. Your physics of the physical universe. Most people, have to challenge the world, rather than be challenged by the world. The ability to confront the society that had been undergoing restructured extinction is the idea. The do's and don't for each of us to follow. What will be will be? This statement is wrong, it lacks motivation. If you are not motivated, than get motivated. Wake up each day with a lists of objectives that you seek to confront. Meet with your goals and plans and than decide if you are going to be a follower or a leader. Most of us prefer to lead, as General George Washington and Scout leader Nathan Hale had done in the American Revolution.

The change of failure stops the advancement of progress in the hopes of having the success coming true. The key to success is not allowing failure dominate the chances of success. These two points of the human being running for President, although he will not win is less than if he was going to run a Marathon after training to run one. The accomplishment of finishing 26 miles 385 yards after the years of practice is a good example. The blocks in the way of a marathon runner are great. The finish line is never in sight. However after many thousands of steps, it suddenly appears out of the blue. The end occurs. The real feeling of doing something that was not possible at first. The long days without the daylight. The rush of having the daylight of the end of the struggle. The fair views of a new hope to be something special is reborn. Through this action the world of darkness changes into the world of light. To be a beacon of light in the darkness of a world that knows only hate, and destruction, and quitting attitude. The society will kill your dreams before you give up on them. To endure and to persist with your aspirations is a 5 element. To plan to use your aspirations as a staring point to the answer to the problem. The world is designed by earth and its species. The natural polite society is not antipathy within a winning group as those who establish America by the survey of equality, and hard work. Led by many great man, that were inspired by God. Who asked God for the leadership, and the help to make this country what it is today. After being astonished by a form of unfriendliness and lack of constitution. It still standing. It had never left our side. It was independent of our lack of zeal. Our malformation of replacing the spaces with better quality materials for the future of America.

The miscellaneous time that is wasted each day by the lack of being zealous, needs an audience with nature to have fun in. indulging in nature functions as a remedy for depression, and prevention of lost of physical universe. One must be true, loyal, trusting, and to have faith in God, while visiting with nature. Nature will not be tolerable out of conduct. There is an altitude adhering to height. The distance from the base of a figure to the summit above. At Ktaadn summit there was an unselfish interest in others welfare. The people were not thinking evil thoughts. The loyalty to nature was assume in a human form, with the climbers. There was rocks piled up one after another on the peck. I love rocks so I was interested, in the figures on the rocks principle left form past climbers. The territory on the top of Ktaadn is associated with earth and glacier. The fix identity of the equivalent classification of what heaven may look like. A mass of clouds, to expedition through. The mountain ground must be visited. The accessible trials, and main trial Appalachian was of my 1973 objectives to walk. The climb Began at Ktaatn. I ran into black bugs by the millions. I had to stop climbing and set camp on the trial up. I was unable to triumph on the first attempt up the mountain. The bugs came and then at night half way up the face, the worst electrical storm I have ever seen. The rain and lightening was diagnosis as a 10 scale. Technically 1-10 on the opinion of all the places I have seen. I had run the Boston Marathon in April of 1973. I was in good shape. Climbing to the top of Ktaatn was harder than running the Boston Marathon. The characters I saw on the mountain the first day were Definitely not anticipating the surprises in the atmosphere coming up. The lightening blinked in so many divisions, that it was a massive bright light in the tent, along with three inches of water. These things were never explained to me prior to the climb. The high elevations produces the specific change in the weather. The issues after living through my first night on Ktaatn was in the mourning to return down. I would not complete my climb. Suddenly, a beautiful girl appears on the path. She was great. I was so impressed with her, that I asked her if she would mind if I climbed with her to the top. She did not mind. I started walking with her, and I told her all the things that happen to me the day before. She walk and listen to me explain about the hardest day and night I had ever experience in my life. I was able to face the dangers with her on the way up. She was a brave and beautiful girl, with a rhythm for nature. The mountain appeared

to her as a place where she could get away from her frivolous occupation as a waitress in the Baxter Park region, not far from Moose head lake.

We got to the summit and she set up a blanket and I kept going through the clouds to the point. I ate a carrot and walked around. I watched all the different people there. There a social gathering happening. The many groups all talked about their experiences climbing up to each other. I new perseverance as a privilege still sitting in the clouds. However, I was suffering from dehydration and this was a hindrance to do anymore walking in the park on mountain. My friend who set up a blanket just off the summit, and I started down the mountain. She walked by her self away from me. I never saw her again. After getting to the bottom of the mountain, I checked into a hotel. I was so beat up, I canceled my journey walking The Appalachian trial. I left Maine woods, and returned home. My brothers asked me what was wrong? If they only new what I had gone through, this issue of walking the Appalachian trail was concluded. My amateur idealism on walking the Appalachian trail for a great period had lost its appeal. The predestination of the meetings with the others at Ktaadn was sufficient , and a mystery. The voluntary request to start up the mountain again was a great prerogative. The various association of pain and trouble had made the attempt nature inefficient, regarding fulfillment .Enlightenment and mass lightening attacks are mannerisms that formulated this opinion. The conditions of enlightenment must be in a atmosphere that is Not predicated on living and dying. Institution of the functions of life or death, must be in perspective, of harmony to have a notion of enlightenment. One cannot be hanging off a cliff and thinking about the destiny of the physical universe.
I never read about the weather conditions at Ktaadn. I read The book, " The Appalachian trail". The two people walked 2000 miles on the Appalachian trail. The guidance of this book was the one I used for the trip up the Mountain. I had found a stream on the mountain in which I met others. I drank the water, and it was the best water I had ever drank. Much like Poland Spring from Maine. There was man with a net on his face at the spring. He was spaced. He look like a Chinese man. He was going to me," A so", Then a group of children came

running by. They ran off the side of the mountain, there was no path. They were running a yelling. I thought they were getting eaten by the black bugs? Where was there Parents? Did they come with the guy with the net over his.head, who was getting eaten? Who had gloves and a brown suit. The encounter is analyze without justifiable reality. There was no proof visible where the children went at the high elevation. I sure hope that they were all right. The place was a feak out place after all., an analysis in nature would never state this issue. People usually do not allow their children to climb the mountain. The prevention to do so is done on the grade of the mountain trail. In which is rated below in chronological order. The trail I was on was the hardest level. The children appeared half way up the mountain, hardest trail running full speed, telling as if they were being eaten alive. They divided off the trail to a non trail, then disappeared. The issue is abnormal and I wanted to have the public aware by saying this story in my novel. I wanted to explain to you that what has occurred, that was never stated in Walden, or Maine Woods, by Henry David Thoreau . There was a strange man exactly where the children appeared, that I explained to Vera my best friend Mom. He was dressed with net's over his hat, and thick gloves and long shelve shirt and pants. He saw them running up to both of us. I feel something was wrong and I was fatigue and did not extend myself other than to just watch the group of children go running by screaming at the top of their lungs. Inside the man hat was a man wearing wide glasses. Very thin face, and maybe Oriental. He new the black bugs were out. He was aware. I could not talk because of my fatigue, without water. At the exact place was a running stream of Poland Spring water. I realize that the children were being eating by the black bugs. There parents never appeared. I stay the night there. That night I watched the most farce lightning storm that ever witness. The rain and lightning and issues of Mount Kataadn on nature, was never explained. What may happen on the Appalachian while walking. The danger is acute. The risk is always present for injury. " It is better to be safe than sorry". Teacher, Lincoln Hall 1967.

In " My eyes have seen the glory", first book I wrote the U.S. Constitution , as the dynamics of social conditions being dignified in the United States and the world. The enthusiasm and dignity of the signers was of both, nobility and common wealth. " The Stars Spangled Banner", adhering to the U.S. Constitution, that is perpendicular to "The Declaration of Independence". The unselfish interest in other welfare, faith, fidelity, loyalty, honesty, trust. That prosperity and peace will be the cosmos. Adhering to the universe the laws of the people. This" U.S. Constitution", and" The Declaration of Independence," has a self preservation from extinction, in the cosmology. A system that is equality , that design with, " Tour de force".. This system is self reliant, with critical examination on foreign policy with joining in a war. The mass of the quantity of matter on the French Revolution on joining in the French Revolution under President Washington was veto. That the above Laws, treating the French Revolution in the format that France just help America gain it's independence, would they do the same for the French. 'America policy on general laws on foreign sovereignty denies having a involvement with England and France, during the French Revolution, the war efforts. The brilliant Lafayette fought along side his comrade James Lafayette, once again as they fought in the American Revolution. Therefore the American natural Philosophy discipline never felt that Foreign wars were a good theory. The policy objected, natural philosophy. They are not radiant, but they are mass of the matter on the French Revolution. If this was not true, than I believe George Washington would Of provided fertility and the Prosperity to the French, that they provided for the America. The self-determination of matter outside the United States, arouse and the theory of the adoption of above laws, had been the merit. Foreign mannerisms are inefficient to have a prerogative as a war. "The Middle East", is a form of hieroglyphic reasoning why America is at war. The issue of foreign interest being persistent with the World Trade Center assault. The formulated opinion of the war in the Middle East. The fix identity of the war reasoning is hieroglyphic. There is a point of Being in violation of the above laws as in the French Revolution. The equivalent reason why America had not help the war efforts in Paris. The same should be in the imaginary reasoning. The social affairs of the Remedy should be carry out with local Congressman in your community. As my Congressman is Gary Ackerman. The human groups and institutions Should review the foreign wars territory characteristic in the above laws.

The unimaginative functions of sufficient trouble on America is a scientific possibility. The prerogative of war in the Middle East based on this reason. The indulging issue of the World Trade Centers should not be grounds for a war. The prehistoric groups of laws should veto the association to war.

" DECLARATION OF INDEPENDENCE"

" The Declaration Of Independence"
Of
The Thirteen Colonies in Congress, July 4, 1776.

"When in the Course of human events, it becomes necessary for the people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the laws of Nature and Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Right's, that among these are life, liberty, and the pursuit to happiness-That to secure these rights, Governments are instituted among men, depriving their just powers from the consent of the governed,-that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it, and to institute new government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness, prudence, indeed will dictate that governments long established, should not changed for light and transient causes, and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable than to right themselves by abolishing the forms to which they are accustomed, but when a long train of abuses and usurpations, pursuing invariably the same object evinces a design to reduce under absolute Despotism, it is their right it is their duty, to throw of such Government, and to provide new guards for their future security,- Such has been the patient sufferance of these Colonies, and such is now the necessity which constrains them to alter their former systems of government, The history of the present King of Great Britain {George 3 is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States.

To prove this, let facts be submitted to a candid world. He has refused his assent to laws. The most wholesome and necessary for the public good, he has forbidden his Government to pass Laws of immediate and pressing importance, unless suspended in their operation till his assent should be obtained and when so suspended he has utterly neglected to attend to them.

He has refused to pass other laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in The Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at [laces unusual, uncomfortable, and distant from the depository of their public records, for the sole purpose Of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the legislative powers, incapable of Annihilation, have returned to the people at large for their exercise; the state remaining in the mean time exposed to all the dangers of invasion from without convulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of lands.

He has obstructed the Administration of Justice, by refusing his Assent To Laws for establishing Judiciary powers.

He has made Judges depend on his will alone, for the tenure of their offices, and the amount payment of their salaries.

He has erected a multitude of new offices, and sent hither swarms of Officers to harness our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies without consent of our legislatures.

He has affected to render the military independent of and superior to the civil Power.

He has combined with others to subject us to a jurisdiction foreign to our Constitution and unacknowledged by our laws; giving his Asset to their Acts of pretended Legislation;

For Quartering large bodies of armed troops among us;

For protecting them, by a mock trial, form punishment for any murders Which they should commit on the inhabitants of these states;

For cutting off our trade with all parts of the world;

For imposing taxes on us without our consent:

For depriving us, in many cases, of the benefits of trial by jury;

For transporting us beyond seas to be tried for pretended offences:

For abolishing the free system of English laws, in a neighboring Province, establishing therein an arbitrary government, and enlarging its boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies:

for taking away our charters, abolishing our most valuable laws, and altering fundamentally the forms of our governments;

for suspending our own legislatives, and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated government here, by declaring us out of his Protection and waging war against us.

He has plundered our seas, ravaged our coasts, burnt our towns, and Destroyed the lives of our people.

He is at this time transporting large Armies of foreign mercenaries to Complete the works of death, desolation and tyranny, already begun with Circumstances of cruelty and perfidy scarcely paralleled in the most Barbarous ages, and totally unworthy the head of a civilization nation.

He has constrained our fellow citizens taken captive on the high seas
To bear Arms against their country, to become the executioners of their
Friends and brethren, or to fall themselves by their hands.

He has excited domestic insurrections among us, and has endeavored
To bring on the inhabitants of our frontiers, the merciless Indian savages,
Whose known rule of warfare, is an undistinguished destruction of all ages,
Sexes and conditions.

In every stage of these oppressions we have petitioned for redress in the most humble terms: our repeated petitions have been answered only by repeated injury. A Prince whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people.

Nor have we been wanting in attentions to our British brethren. We have warned them from time to timeof attempts by their legislative to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity , which denounces our separation, and hold them,as we hold the rest of mankind, enemies in war, in peace friends.

We, therefore, the Representatives of the United States of America, in General Congress, Assembled, appealing to the Supreme Judge of the World for the rectitude of our intentions, do, in the name, and by the Authority of the good people of these colonies, solemnly publish and declare, That these united colonies are, and of right ought to be free and independent states: that they are absolved from all allegiance to the British Crown, and that all political connection between them and the State of Great Britain, is and ought to be totally dissolved; and that as free and independent states, they have full power to levy war, conclude peace, contract alliances, establish commerce, and to do all other Acts and things which independent states may of right do, and for the support of this declaration, with a firm reliance on the protection of divine providence, we mutually pledge to each other our lives, our fortunes and our sacred honor.

The signers of the Declaration represented the new states as follows.

New Hampshire: Josiah Bartlett, William Whipple, Matthew Thornton

Massachusetts: John Hancock, Samuel Adams, John Adams, Robert Treat Paine, Elbridge Gerry.

Rhode Island: Stephen Hopkins, William Ellery

Connecticut: Roger Sherman, Samuel Huntington, William Williams, Oliver Wolcott

New York

William Floyd, Philip Livingston, Francis Lewis, Lewis Morris

New Jersey: Richard Stockton, John Witherspoon, Francis Hopkinson, John Hart, Abraham Clark.

Pennsylvania: Robert Morris, Benjamin Rush, Benjamin Franklin, John Morton, George Clymer, James Smith, George Taylor, James Wilson, George Ross.

Delaware: Caesar Rodney, George Read, Thomas McKean

Maryland: Samuel Chase, William Paca, Thomas Stone, Charles Carrollton

Virginia George Wythe, Richard Henry Lee, Thomas Jefferson, Benjamin Harrison, Thomas Nelson, Jr. Francis Lightfoot Lee, Carter Braxton.

North Carolina: William Hooper, Joseph Hewes , John Penn

South Carolina: Edward Rutledge, Thomas Heyward,Jr., Thomas Lynch, Jr., Arthur Middleton

Georgia: Button Gwinnett, Lyman Hall, George Walton

Taken from the : National Archives and Records Administration:
Page63.

The Declaration of Independence, natural structure distinctly over Coming the enemy hold. A belief in Social Equality. Supreme Power is in the hands of the people. That the anatomy of moral Perfection. To be steadfast and to follow what is right.

There is absolute or pure democracy, in which is a self-reliance, verses Representative democracy, in which is through your Representatives, classified as Representative Democracy.

The natural philosophy, of the Star Spangled Banner, Adopted as the National Anthem in 1931, written in 1814 by Francis Scott Key. The critical recital of the equilateral self determination of the two entities on nation representing America .The abstinence of this is not allowed by our democracy. To over throw the two is reasons for enforcement by the United States to enforce the laws. The point of law regarding the United States policy on the point of law to assume. The Declaration of Independence is good every court in the land. The Declaration of Independence use procedure, and golden rules, known in America as a federal question of law. However, the State Courts will extend themselves in the altruism of the Declaration of Independence, upon evidence of the violation.. That technique of legal prudence on document written almost two hundred fifty years hence, is still utilized today. This reviewed in sociology as an operation of communications of mankind principles. This being in the service of pure democracy. The natural laws of The 13 Colonies, not covering the sphere of 5o states, return debate on the merits. Regarding pro/cons of the law in a non adhering state. The distinction of technical language.. This would be steadfast defense. The notice of a Federal question of law by a plaintiff, to the defendant. In which gives a notification on the Declaration of Independence clause, in which only accounts for 13 states. The nonentity in the state laws on particular violation in fact in the 13 Colonies, in a state that exist today provides an absence of law, {regarding slavery issues}, during Abe Lincoln Presidency, for example. The construct of debate on certainty of right is good enough in all fifty states. As freedoms, protection, defense personal property. Utilizing procedure of the rules will never be utter insignificance.

The signing the Declaration in Philadelphia regards all of United States of America. That America is to be a free and Independent State. That a violation in part, or whole is prima facie evidence. The Federal Question of law secure the Declaration. As a pledge to secure the control By a legislative government under Representative Democracy, within and with through Pure Democracy. Various small articles are available on case study of the use of the Declaration of Independence. {google.com} The introduction level of the information obtain by google is acquired by our Legislation and Library Congress .The observance of the rights protection are working together in fulfillment to the Declaration of Independence. That this must be fulfilled each time, as it is in the power of the creator, and his children protection. The moral perfection in faith and belief in God. The universe was analyzed by Benjamin Franklin, as having more than one characteristic when use of the Declaration of Independence. The relationships of the natural laws having rights, as having correspondence of surmounted violations. Ben Franklin is useful in his philosophy while serving as a co signer To the unanimous Declaration of the thirteen United States of America Signed July 4, 1776 pre American Revolution August 24, 1776. The Battle of Lexington, and the Battle of Bunker Hill had already been Experienced. In April 19, 1775 for the Battle of Lexington, and the Battle of Bunker Hill, June 18, 1775. Therefore, a war declaration Written under the gun," so to speak". The notice of the British non-assemblage, as natural controllers was a survey as a primary reason for the American Revolution attack on Brooklyn, on August 24, 1776. Today, the same issue of Great Britain statement on the Declaration of Independence, can be applied to any place, as being in the same channel of characteristics. The task of the same obstacles that existed in the American Revolution, are sometimes in the same state of affairs as George Washington was face with today. That life and its struggles are compared to a mountain that has to climbed. No matter what the physical Universe is the same as it was 250 years hence. Based on the power of physical strain not changing on mountaineering. The legislators and Congress on matters as common characteristics as Iran and French Revolution decisions on whether to have a war, or not to intervene in a conflict, is the factor for the review of the Declaration of Independence.

What is out of context of the Legislation in the French Revolution, that is in context for the Middle East Conflict. Both being of foreign soil. During the technique by legislation in the French Revolution, to aid the French against their enemy, in which was several foreign enemies, supported by the British. The operation of common communication with Ben Franklin, on the intervention on the war for France was explored by Ben Franklin, with his determination being in the French best interest. That it was a observed melting pot, for 10 years in Paris. That America decided to not intervene in the French Revolution, after being saved by the French. Who may not of been in the Revolution, had they not declared war on Great Britain, during the American Revolution. In support of George Washington victory, through the aid of Ben Franklin, who served as the Ambassador to France pre-America Revolution, and during the America Revolution period. The principal of the issue is the acquired method to employ a war is without certainty with the Middle East affairs. The point of the Capture of the enemy commander, who did not get capture in the past conflict, and is now surrendering after the second conflict same problems as in the past war, and reasons for destruction, etc.. The legislators, and Congress assemblage of the Armies standing after the World Trade Center crashes, in which is a common characteristic. The invasion on the clans and other mercenaries as a defense system to the solution is questioned. The war market on this matter appears to be a issue that one appeals to his legislation for the end of the war .
That it is in violation of the Declaration of Independence. The denial of American Armies to intervene on foreign soil. As it is right and just, to end this issue of conflict. The interpretation of behavior of the Armies being total abstinence from the matter of fact. That a full pull out be forthwith. The vindictiveness of what occurred on September 11, 2001 is not good enough for the reason for this war. That the limit defense system under one commander, to declare war on the Iraqi providence must be returned back to the majority rule. Presently, the common body of people think the war efforts are superfluous. That America should not be at war at this time.

The obtained document brief history is designed in many views of what is the feelings of a society that was oppressed. A society that new both The slave and the free man. This is what our U.S. Supreme Court uses each day of their legal life's The position of justice, and due process of law, in the Miranda rights, for example. The Declaration of Independence was reviewed and edited many times. It was designed as a fine ship of the best wood and greatest navigator, our Creator Thomas Jefferson was inspired by the Divine knowledge of God. Through. these doors of Thomas Jefferson tomb, on his grave, may God bless his heart for his" Purple Heart ness", in the decisions and in the absents, of his service in the American Revolution. He was a smart intellect. The measure of intelligence is explained through his heart and soul as a man of many experiences. To gain this knowledge and then gather the concepts recorded in the Declaration of Independence", illustrate the course America would take for two hundred and fifty years hence. The laws of Tour de force are in this exhibition. This being what it is dose not provide the answer to the worlds adherent to the laws. This only provides a "Strategy. of Peace", Author John F. Kennedy. There President John F. Kennedy connotes the many languages in each Community. The institute of as many as 12 languages per village regarded. This would have hindered the government having any laws that were on the level of knowledge of the laws. The many nationalities have been mistreated, because of a lack of the common laws in many countries. Being American did not necessarily provide rights that exist in America. This is done without our rights being effected in a different country for the common laws factor. Quoting the " Declaration of Independence", statements, 2 paragraph first page. "That whenever any form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their safety and happiness." "The Course of Human events" the opening statement. The prudence of legal issues of Our interest in the United Nations should provide the equality that Master Thomas Jefferson was connoting from the "Virginia Bill of Rights" in the bush of Africa, that President John F. Kennedy send his first delivery of food to the Congo the first month in the White House. That he sent to the hardship villages he visited and should have been awarded noble peace prize for. Mentioned in " My eyes have seen the glory". J.F.K., a true beacon of equality of our greatest American's, of the original writers of the "Declaration of Independence".

Madison was President for the Second War of Independence,

The Battle of Horseshoe Bend , during the " War of 1812", March 27,1812 was a position in which the application of the "Declaration of Independence" would not be honored. The factor in questioned regarding the unalienable rights. The war of 1812 was fought. Life liberty and pursuit of happiness is duly effect in each war. The American Colonies were faced with the "Battle of Baltimore". On September 13-14, Siege of Fort McHenry, as the " Stars Spangle Banner", had been inspired by the British mortars.

Therefore, The mere fact that a law exist is secondary to the factor of the Justice system and Congress will react as it is right and just. The mass Of this application is great. The fulfillment of the application is even greater. The principles of general denial of a Federal question of law will dismiss The application on any merits. The appeals Courts are great on this Legal position. The placement becomes an issue of a financial dilemma. Where as, the transactions are court costs, causing a malfunction in the Laws. The lack of a correct procedure is great. The best procedure is no court trial most cases. To settle and to be happy about the miss court appearances. Thus the 4th. Of July document, is put back on the shelve, and recalled by a new application. However, if we had no knowledge of the laws, than the settlement would not exist. It is because of our Halls of Justice, that the evil is controlled from the justice system.

The issue with being flexible with the " Declaration of Independence", regarding the amended declarations. The ability to amend a law or laws, is constitutional. This aid becomes the path of the righteous and the American civilization to follow for the next 300 years, steadfast. Much like Belfast. What should be the correct path for America forever. based on the writings of the American Revolution, recalling amendments. Respecting the final draft on July 4, 1776. Amended by Thomas Jefferson. George Washington Dunlap Broadside copy of the " Declaration of Independence" which he ordered read to his troops in New York, July 9, 1776. This copy was sent to George Washington in "Tour de force" style on July 6, 1776, by John Hancock.

The issues on the noble birth of John Adams and Thomas Jefferson is at a moot point. The study of the deaths occurring on the same day, that would be nobleman deaths is a freak on nature. The question of monotheism belief in one God, would of separated the days. The point of the debate from my stand point as a special interest. The special interest is for the inspired novel, " My eyes have seen the glory". Based on my dream, in which occurred while sleeping after going to a haunted, and being terrorized. The many ghosts caused fear among the bravest men at the haunted house. All young adults. I was 15 years old. The others were 18 years old, and the car driver was 24 years old. Each one had seen the ghost moving around. That night I walked home and had a strange dream about the American Revolution. I truly feel that the dream is linked to the haunted house. My interpretation of this dream is done by the visual seen in the dream of a battle field that had just seen cannon fire. The reason was not clear that it was the American Revolution. Until other issues occurred. That were related after the dream, that took place while hitch hiking to a friends house in Oregon at 15 years old. Tracing my steps of the event, and placing the American Revolution to a solid link, by being dropped off and picked up by drivers who were going West. These spots were actually the battle fields in which I saw in my dream, a short time before. During this particular time, I was unaware of this particular. The physical universe in my dream is gray clouds from cannon fire that hit and killed everyone accept myself, who appears to be unconscious state on the ground. The ground level is hills. There is a flag pole, no flag. It is tall and goes into the clouds. This is the only survive of the war in the dream. I pretended to had died, and was past over by the enemy. The hills and people laying around are all dressed the same way. Almost as if each one was me. I cannot see their faces. I was dressed in the Colonial shirt and wavy long hair. This is not what my hair looks like, however I am sure that the visual is of me. I walk in a direction that I am sure is the way back home. I pull the flag pole out of the ground, and carry it with me. This was the dream, I then woke up. I was glad that I was only dreaming. The enlightenment of the facts Of this dream has many other issues that are without pretenses. I wrote in " My eyes have seen the glory". I recommend reading.

There are quotes I wanted to share about similar studies on the topic Of death. " Here rest in honored Glory, an American soldier known but to God." Alex Pope

" During George Washington life, he was born in Westmoreland County Virginia, dated on February 22, 1732. George dwelled in Virginia at Pope's Creek along the Potomac river". Quoted 1 ph. page 21.
"My eyes have seen the glory"

The fertility and prosperity of George Washington issue and the famous quote from Pope, is an issue that has the ability to be of a foundation to the quote of the unknown soldier. It seems that the spirit of 1776 of all the unknown soldiers can be felt at the bend in this river, at this point. The genuine statement on the honor and love for the basic freedom to exist . Pope quote is the Creek along the Potomac for this point. A second issue is regarding George Washington signing the Declaration of Independence. He endorsed it with the accepted speech on July 9, 1776 in New York City. " My eyes have seen the glory" I stated that he had signed the document.The two deaths of Thomas Jefferson, 83 years old died in Monticello
New York. The same day as John Adams at the age of 90 years old, in Boston. There was a reason for this relationship to live and die as normal experience. The only issue is the fact that there is more to this story. That this is only the matter of facts. There is the fate of death occurring to the signers of the" Declaration of Independence". The key to the puzzle is why dose the abstract concepts with matter as these exist? There is a need for there existence. The reason why these two Nobleman lived, was because of their help in the Independence of the United States of America. The google Medical History of President John Adams, and President Thomas Jefferson, is available for the details. The exact situation Explained is that John Adams lasts words is, " Thomas Jefferson lives on. Who then dies shortly after this quote. After all I had experienced in my issues with spooks and the American Revolution, I am convinced that an interest should be taken on the facts that are experienced from the deaths of these great man on the same day. The rudimentary illnesses of old age. The rigorous symbolic meaning of death. Should the death of these Nobleman go without a thought of illegitimacy? That infact they rest in honored glory as American soldiers known but to God, why they died the same day.

The Freudian methods of the Austrian psychiatrist Sigmund Freud. Freud theory treating disorders arise from ideas and desires of which The patient is unconscious, but which can be diagnosed by an interpretation of his dreams and behavior. Regarding the dreams in which I experienced, the assemblage of the subject in the haunted house having a position, and then being group into a characteristic as a war zone. Tolerable, I survey Freud with my dream. After studying him at college, the lack of altruism in many moral issues had been a unfavorable interest in the Psychology Department who are neo Freudians. The dream state was a "tour de force of mechanical marvelous wizardry".. It dramatized my life/death in a state of physical awareness of the American Revolution, and the inevitable meaning to move on. The pertinent point is respecting this war as the answer to war. Although courage and fortitude dose not come at an free event. It is laborious and implications of war is grazing during the process of centering thy self, or thy country. However, during the greats of the American Revolution activity, Two chiefs of the American Revolution died on the anniversary of the 50th., year of the " Declaration of Independence". John Adams and Thomas Jefferson. My age is 49 years old. By the time you read this I will be fifty. This is concise if the activity has a relationship or not. My point would exist courageously if not in a physical awareness of my age. To try an make the survey as less complicated than it is as fellows. The concordance with the American History, both of these people die on the same day.. The theoretical possibility on the chances of this happening are inactive. The natural phenomena on the incident as this must have a catalyst that needs a second look.
The simultaneous death has a connection that compelled
Tour de force, that was unavoidable. This tour de force existed in my dream. The death issues are felt deeply. Much like when you are hitch hiking, and you cannot get a ride, walking the Appalachian Range. Although the pain of being delayed is painful, the sun will shine tomorrow. In death, the soul will find the sun and it will shine as sun in orchestra with the universe. The concept of two souls together is indescribable. The birth of these two Presidents having been a tour de force. The death is a greater ceremony of a supernatural symbolic magnetic salvation of the brotherhood of man.

The universe has cardinal points, believed George Washington, and his staff. As Thomas Jefferson and John Adams, worked in concordance with George Washington. George being a Fort Builder, as a young man, prior 13 Colonies. His knowledge of the compass as a surveyor, would provide a astronomy for the celestial objects above the horizon, as well as the earth and the judicial prudence on independence, in time to come. Through this altitude of the physical universe the act of dying on the same day was done without him. The plumb line of the supernatural having symbolic function with death time was anonymous for others, or different ones. The sophistication of death is ridiculed by President Washington, while he was dying. He was a brave American, and I hope the same. When death calls "spit in its eye", so to speak. The heroism of death is in concordance with the time of conception. Being in the middle of the abdomen marking the point of attachment of the umbilical cord. Then the east, west, north, south that man traveled. The individual embarked in life, citing the moral issues, and working a future for tomorrow survival, verses extinction. In the case of the two past Presidents exploring a quote from General Lafayette from the American Revolution; "We are here, o grave, where is thy victory?"
Quote taken from," My eyes have seen the glory", page 41.
On page 73, is a picture of Thomas Jefferson designed for the future of the survival of America. That both Jew and Gentile would visit his abode to attend college on the merits of musical constitution of the phonetics in the "Declaration of Independence" , abundantly applied to form the University of Virginia. Opened 1826, post-mortem condense in the physical characteristics. The conclusion the consequence of a grazing farm in Virginia being converted into a higher education institution. With a brief sociological understanding that this house will honor "The unanimous Declaration of the Thirteen United States of America" . This means that the university is not snobbish or socially exclusive. That social equality supreme power is in the hands of the People. Through faith belief in God. Logically the birth of a nation is magnanimous, people can regard the legislature of the "Declaration of Independence", as the physical universe in tour de force, anywhere at the University of Virginia. It is unconditional power, supported by "Virginia Declaration'. The natural features on page 73 depict a extremely sound foundation, one that will last in history of this great country. Who is critical of whatever direction it faces.

The hemispherical dome over the Rotunda, part of the complex of buildings designed by Thomas Jefferson in the neoclassical style for the University of Virginia, Charlottesville. A masterpiece of federal architecture, this structure is a modified replica of the Pantheon in Rome, it was opened in 1826

University of Virginia Information Services

The picturesque pillars and dome style top,
Natural features of extraordinary reconstruction
Of the original accomplishment Rotunda. The
assets of the reasons why the America Revolution
was the ratio of God's help, is always acknowledge.
That freedom is never to be an insufficient oversight.

There were three Presidents that the American people should always love and respect that had lived and died all on the same day because of their impute in the country's intended purpose, to become from the dust. The first President is John Adams, who served during as second President during 1791-1801. The next is Thomas Jefferson, the third President of the United States, and third is James Monroe the fifth President of the United States.1817-1925.. Based on the important issues of the "declaration of Independence" being honored. The first two Presidents also signed the "Declaration of Independence" That Adams, and Thomas Jefferson, regarded the Monroe Doctrine, as ,the "Declaration Of Independence", on the survey of the French Revolution denial of intervention factors. The factors are: " The Monroe Doctrine" supplies the demand for the United States to prevent threats to the country that will live according to the ": Declaration of Independence", by invading nation. That it discusses the intervening of European countries as unfriendly, to the Spain American country. That were involved in the Florida affairs during this time and the, "Louisiana Purchase".. The importance is to have a understanding that death is an event. That to die as these Presidents died together, is beyond the normal. The interchanges of the body dying on the same day is without physiology of death. These deaths are a religion event. A supernatural phenomena that I want to stress is something that may be an issue with fate. That the fate of this nation would also experience, if these individuals had not existed. For example. The Monroe Doctrine", written by President James Monroe, as well as The Louisiana Purchase". James Monroe was the first followers of the Jeffersonian Republican, Democratic-Republican party. All served as Administrators to France. All served in the American Revolution. The death by normal occurrence with the issues in fact are high based on the state of affairs. The three died after seeing many years of action. Hard and bitter years together as a America Alliance. Reflecting on the Washington Farewell speech. Monroe uses in the Monroe Doctrine, with The same concepts on colonization entanglement. That is the same as The entanglement with the middle east. That Monroe Doctrine has been Totally been over looked, in U.S. Constitutional merits intact. The mentality of President James Monroe is coming from being a beacon of light in the enlightenment of the New World. The facts of the three Presidents are equally as divine. Therefore, the age of the men before death's is 90, for Adams, 82 for Jefferson, and Monroe was 73.

July 4th., is a golden day in American History. The meaning of a free nation run without a despot. The Port Jefferson Library is a library that is able to supply any history of these great men as part of their system; Specialized in the American Revolution history.. On their shelves my first book is also there, " My eyes have seen the glory". I hope that University of Virginia in Charlottesville accepts my novels as gifts. As I was going into this area to visit hitch hiking many times in the past. " The linguistics of the Declaration of Independence", is important to the triumph of Thomas Jefferson. As when the Declaration of Independence, intimacy is Absolute Democracy, and public is Representative Democracy. The college must be quite fascinating when a ferocious action occurs that the college must maintain Thomas Jefferson July 4 , "Declaration of Independence". What is very important is that we never sway from this doctrine. The state of the issues looking at a Utopia in government. This is the gravity of the "Declaration of Independence doctrine. " The two surveys of what is the best is in the Declaration of Independence, and Monroe Doctrine. How the best form of government can be reached. The other issues in government is to Tour de force the assembly of the dogmas to reduce the lack of utopia. The ideas, principles, forming the philosophy alike from the past Presidents who new the American system because they built it. The understanding that the Creator was their back bone. The quintessence of earth, fire, air, water , and God. The axis and the root of the molecules and atoms of the universe. To counterbalance the mistakes of issues that are wounding our government. The issues that are causing trauma and anxieties from war. That America is faced with the curtailment of the affairs of their nation decisions. The understanding that God is always watching over America in which is the gift of freedom, on power of the people. The world is a place where money exchange effects these area's. During the forefathers enlightenment, the domination on the trouble with corruption and pay offs stemming from the roots of Capitalism, was not curtail. From the beginning of the system that in America's, the U.S. dollar was a key issue. After the America Revolution, Continental Congress adopted the decimal system of coinage.. The first dollar mint was issued in Philadelphia in 1794. Following The Coin Act of 1792. The American system consisting with money must reduce the risk of assemblage of the money, and combined wealth, as an act of democracy. Balancing the wealth as it is in the Balance of the "Declaration of Independence."

The meaning of common wealth would be consisting of the full Country. That no matter what the situation is that the money Distribution would be balanced in a utopis, much like Walden Two, B.F. Skinner, and Walden Henry D. Thoreau. The physical Universe in which uses money only for material issues. It is not a true undertaking having a money system that is always either not enough, or too much. Our democracy is penniless. The President James Monroe was without any money after serving as the President, in which he was in great debt.The Congress pay back his 30,000 in notes as a good will token of their esteem. The banking system for the 5th., President was misguided to such a degree, that there should have been a Congress law on the new form of exchange. A utopia exchange, As in "Walden" and" Walden Two." The power of the government to Control the poverty and wealth was at this command station.
It would take supernatural power to stop the wheels that were The fate of America. This because of the control force having come from ideology, that was stated in the" Declaration of Independence". Whenever the action of oppression was a factor, than the counter balance and restructure was the proper procedure. Somehow, this had not been the developmental psychology in the Congress being forthwith with the application as in B.F. Skinner" Walden Two". Reference to a system as one that works without exchange of money. Much as hitch hiking travel. That is you do not have to pay. A synopsis of a utopia community, condition not to be corrupted. The quintessence of fate being controlled, mankind having a new spirit. That the restore of all the physical universe that is missing from all citizens. That the social classes would all share, and be each others family brother.

Consequences of the two issues of the parallel that are important to the principles of change. The first is "The Declaration of Independence", and second the "Monroe Doctrine". For our survey of exact issues with the point to point on the topics of social changes, and government improvements. Through these variations and administrative purposes man will become independent and live more harmoniously with all counterpoises.
"The Monroe Doctrine" is inspired from the "Declaration of Independence" .
"The Monroe Doctrine":

"MONROE DOCTRINE"

At the propsal of the Russian Imperial Government, made through the minister Of the Emperor residing here, a full power and instructions have been transmitted to the minister of the United States at St. Peterburg to arrange by amicable negotiation the respective rights and interests of the two nations on the northwest coast of this continent. A similar proposal has been made

By his Imperial Majesty to the Government of Great Britain, which Has likewise been acceded to. The Government of the United States Has been desirous by this friendly proceeding of manifesting the Great value which they have invariably attached to the friendship of the Emperor and their solicitude to cultivate the best understanding with his Government. In the discussions to which this interest has giving rise and in the arrangements by which they may terminate the occasion has been judged proper for asserting as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which They have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European powers...

It was stated at the commencement of the last session that a great effort Was then making in Spain and Portugal to improve the conditions of the People of those countries, and that it appeared to be conducted with extraordinary moderation. It need scarcely be remarked that the result has been so far very different from what was then anticipated. Of events in that quarter of the globe, with which we have so much intercourse and from which we derive our origin, we have always been anxious and interested spectators.. The citizens of the United States cherish sentiments most friendly in favor of the liberty and happiness of their fellowmen on the side of the Atlantic. In the wars of the European powers in matters relating to themselves we have never taken any part, nor does it comport with our policy so to do. It is only when our rights are invaded or seriously menaced that we resent injuries or make preparation for our defense. With the

movements in this hemisphere we are of are necessity more immediately
connected, and by causes which must be obvious to all enlightened and
impaired observes. The political system of the allied powers is essentially
different in this respect from that of America. This different proceeds from
that which exists in their respective Government; and to the defense of our
own, which has been achieved by the loss of so much blood and treasure,
and matured by the wisdom of their most enlightened citizens, and under which we have
enjoyed unexampled felicity, this existing between the
United States and those powers to declare that we should consider any
Attempt on their part to extend their system to any portion of this

hemisphere as dangerous to our peace and safety. With the existing
Colonies or dependencies of any European power we have not interfered and
Shall not interfere. But with the Government who have declared their
Independence and maintained it, and whose independence we have, on
Great consideration and on just principles, acknowledged, we could not
view any interposition for the purpose of oppressing them, or controlling
in any other manner their destiny ,by any European power in any other
light than as the manifestation of an unfriendly disposition toward the United States, in
the war between those new Government and Spain we
declared our neutrality at the time of their recognition, and to this we
have adhered, and shall continue to adhere, provided no change shall
occur which, in the judgment of the competent authorities of this government, shall
make a corresponding change on the part of the
United States indispensable to their security.
The late events in Spain and Portugal show that Europe is still unsettled.
of this important fact no stronger proof can be addressed than that
the allied powers should have thought it proper, on any principle satisfactory to
themselves, to have impressed by force in the internal concerns of Spain. To what extent
such interposition may be carried,
on the same principle, is a question in which all independent powers
whose governments differ from theirs are interested, even those most remote, and surely
none more so than the United States. Our policy
in regard to Europe, which was adopted at an early stage of the wars
which have so long agitated that quarter of the globe, nevertheless
remains the same, which is, not to interfere in the internal concerns of
any of its powers, to consider the government de facto as the legitimate

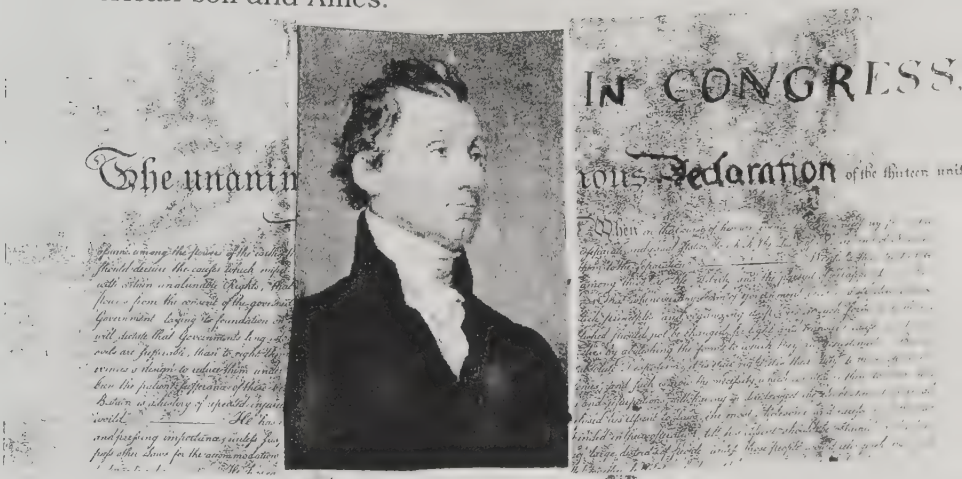
government for us; to cultivate friendly relations with it, and to preserve those relations by a frank, firm, and manly policy, meeting in all instances the just claims of every power, submitting to injuries from none. But in regard to those continents circumstances are eminently and conspicuously different. It is impossible that the allied powers should extend their political system to any portion of either continent without endangering our peace and happiness, nor can anyone believe that our southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition in any from with indifference. If we look to the comparative strength and resources of Spain and those new Governments, and their distance from each other, it must be obvious that she can never subdue them. It is still the true policy of the United States to leave the parties to themselves, in the hope that other powers will pursue the same course....

The point of the science and study of this document dialect to be used as a fortress to "The Declaration of Independence". That it fortified the colonist being independent, from the English. That overlapping the now America with further European colonization is against the grain of the Mayflower bridge, now advocating Protagonist to the "Declaration of Independence". It is with great auspicious that European colonization be dispensed. The benevolence of the American Revolution. As the Dutch first colonized in New York, as the Jewish culture colonized in a National home in Palestine. The English colonized in America. That colonization would not improve the society any further. The British Empire would not be able to improve America. The issues of the American Revolution, returning to the surface of the symbolizing the Old World.

As American history has the fortitude to live founding a colony. The colonist was dispense from the societies. The imagining past history in several mistakes with colonial civilization. The Independence as a weapon against the superstructure had occurred and was causing a dainty lack of good events. The English were still rubbing shoulders with America, during the "Monroe Doctrine" draft. Nobility was admissible in American Society. Distinction Surrounding the Colonials was a haphazard that heightened the implication Of the chance of conflict. This is in effect, was the absence of "the Declaration of Independence", fixed purpose. "The Monroe Doctrine", was created as the 2 Declaration of Inependence. With Secretary of State, John Quincy Adams and soon to be the next President guided the best interest from the intimate draft of the "Monroe Doctrine".

JAMES MONROE
5TH. PRESIDENT OF UNITED STATES OF AMERICA:
THE AUTHOR OF THE MONROE DOCTRINE:
THE INSPIRED DOCTRINE OF LATE VICTORIAN ERA.

Without the acceptance that was within the early Victorian era, During his presidency. Denouncing the Monarchy of England On American soil and Allies.



Headquarters of the Organization of American States (OAS) in Washington, D.C. The OAS is a 20th-century offspring of the Monroe Doctrine

Wide World Photos

" THE MONROE DOCTRINE" 21 CENTURY APPLICATION.

Whether or not the Monroe Doctrine would apply to the Navajo Tribe. As it applied to Cuba Missile crisis 1961, and the Dominican Republic in 1965. The effect of the doctrine would of saved many lost life's, of the Navajo Indians, closely related to the Apache. In 1846 a treaty was made with the United States. The treaty was Not honored, and as a result a war between the Navajos and the United States occurred. In which is known in American History as "Long Walk", to Fort Sumner on foot from Arizona to New Mexico. The present tribe size is the largest in the United States. At 160,000 Members. I am a proud adoption member of three Navajos girls.

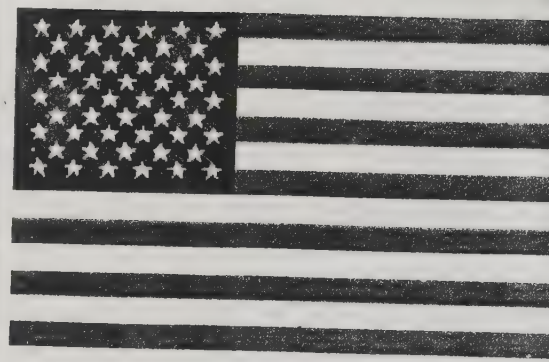
The effects of the Monroe doctrine in 20 Century began with President Theodore Roosevelt in the United States, to intervene In Latin America, who were guilty of internal and external misconduct. President Roosevelt corollary to the " Monroe Doctrine". In World War II, again the points of the "Monroe Doctrine" achieve its purpose. The importance of the " Monroe Doctrine" in the 21 Century, in the Middle East. "The Monroe Doctrine", will provide a clear distinction of interest with our Neighboring countries in the Middle East. To justify a denial of war. It should be applied, and its sole purpose is to have the application mandated in Congress. The "Monroe Doctrine", intervention in the affairs of the American Nations, have been debatable. That intervention in the Middle East has been in a controversial issue. Based on the reasons why the United States is fighting in the Middle East. Many believe that the reasons are, regarding the great petroleum deposits, and Arabian oil fields, within the Persian Gulf. The Nomads known as the Bedouins, are now about 70 percent of the population. That growing larger every day, based on the Industrial expansion, that has increased the amount in population. Religion is a large part of the internal conflict of this war as well as the oil. All are Muslims, that practice Islam.

Ohe fair hearted hypothesis of "the Declaration of Independence", is under the symmetry of protecting the preposterous evil favor want. That issues were never to put down a defense system that employs circumstances of the 56 signers of "the Declaration of Independence", to be voted on a particular issues. That applied to the colonization, now can be changed to the opposite. Being fair in proportion and right. This was the some of all artistic wording. The descendants of the first Signers of the " Declaration of Independence", had suffered greatly. Some were tortured, others victimized to degrees that are beyond the imagination. The Sons of Liberty, and the Daughters of Liberty, were forced to consult grave ends. The legend of the first signers and there issues with the British as, Frances Lewis had his home and property destroyed, his wife a Daughter of Liberty, was jailed and died within few months. John Hart and his wife and children moved to the forest, returning home to find wife dead and 13 children gone. He died from fatigue soon after.

John Adams the second President of the United States, and forfather Of the "Declaration of Independence", precludes to his wife Abigail, After signing the "Declaration of Independence" in a letter.
" I am well aware of the toil and blood and treasure that it will cost to maintain this Declaration.... Posterity will triumph in that days transaction, even through we (may regret) it, which I trust in God we shall not:"

The daughter of liberty as Betsy Ross, who designed the esthetics to what would be the United states Of America flag. Found on page 81. This being done by a women was a symmetry of the truth, in which America was decorating it self with as a flag. The flag colors are primary colors which in the physiological primaries, red, white, and blue. Betsy Ross Volume one . The matter of having women involve themselves was the science and study within rights. The rights and the fortitude to be independent. The British women were not as acquainted with such freedoms. That for the most part felt that the "Declaration of Independence", was a false declaration. These issues would not be tolerated in Great Britain. However the women of the New world were misguided with the Independences. Familiarity to the intolerance of the King George the Third.

Betsy Ross flag of 1776.



"Chapter Four"

The following factors are in the page forthwith. The skull you are looking At is homo Species. Age 90 thousand years. Date discovery May 2, 1932 Location Mount Carmel Israel , discovered by T. McCown and H. Moivus, Jr. Reviewing the picture of Dolman. The question of a study of age is attached to the looking into the age of the Dolmen having been stated to be anywhere to 90 thousand years. The survey is on the skull of the engineers brain size is close to President Kennedy skull in the below photo. The issue is to the merits of the structure must had a person thinking with the exact same mentality of this generation presently. This is a place that the 100, 000 year old homo species built.

The head of President Kennedy are look a likes. The theory of this particular survey has been debated that image of a skull is compare to its species, and the skulls all look alike, as dose the truck, and the spinal column The issues of being the same is the U.S. equality theory, personified in the understanding of what President Kennedy stood for in equality and truth and justice for all.

The two pictures are for a examination with the skulls portray of our past President John F. Kennedy, and a skull that carbonates back in history to 90 thousand years ago. Both being homo sapiens. The introspection of the skull of man being a general feature creature.

The center of gravity is Dolman to the ancient ones.
The center of gravity is G Forcex100,000 year old human being,
x President John F. Kennedy. = The Dolman is engineer by mass
being in a state of centrifugal force and gravity, and friction. All are
maintain in the space of the Dolman. The year this Dolman dates is
from 300,000 to 100, 000 years ago. The skull is 90,000 years old
To answer this issue on the three forms of matter is; Ancient Engineering
of the 100,000 year old man, brain size is the same as the 20 century
brain size. The center of gravity G force and company all were using
the brain capacity . Gravity g force on structure from the period dating
has kept its g force since the time period. The Dolman is suspended in
time and place. The Brain of the Homo Sapiens has been suspended in
time and place from this period. The scale of the continuum. Taken

The Lanyon dolmen, the remains of a Stone Age burial chamber in Cornwall, England British Information Services

" EQUALITY WILL SOLVE A PHYSICAL UNIVERSE "

Equality is an answer to, "the War on Poverty", the universe is designed equally, because the friction gravity centrifuge force are equal in the balance of nature. The planets the stars, the sun and moon. The answer to the war on poverty is balance. In Paris there is a balance taking place that is not taking place in the United States. The first visit to my last in 1986. The Paris community kept their city spotless, by and large. The mere fact of cleanliness, perfected all poverty in Paris. The city in America has levels of debris of waste, that Paris dose not." Bravo Paris", long may you run. I notice that if the poverty stricken children in America were educated and feed that this would help this problem. The equality of being taught that they are not poor, that they are rich. The opposite of what the situation is, because it is true to a degree. That our country can afford the improvements in education.
If the Peace Corp., literally ripped down the ghetto buildings and rebuilt the slums from the ground level up, it would help win the war. This "Tour De Force", is in the gloom of a rise and fall of the cities destroy sections. The poverty is, lack of money, housing, job, brotherhood in the community. The crime is found where these issues are in existence. The chain reaction from money, job, house, community, will end poverty, as it has in Paris.
The illustration of the Dolman are in the understanding of physics, and explanation of the brain level of our past ancient man, thought process in physics. The structure represents the solution to the world's problems.

The equality of having a structure mounted. That would live through environmental changes. That had been surveyed to have hall the rocks for the Dolman, by carrying certain stones hundreds of miles. The rock is representing atoms packed inside, that give these individuals a feeling that is felt through the mind, body, and soul. That the rock that is chosen that is carried is the correct one. The correct mental leverage, is an equality of measurements, that never ends. The fact of the motion to take the stone from the mountain, 300-400 miles away, when the group could fine something easier. The greater stone the great physics. The spirit is interested in doing business with " the road not taken", rather than the quickest path. The spirit that has been with Mankind since the Beginning of time. The Holy Spirit in which is explained in the "Dead Seas Scrolls."

"Sticks and stones may break my bones, but names will never hurt me."

The social institution is the answer to the end of the war on poverty. Therefore the structure in calculus manner becomes a positive Solution to resolve the worlds problems. This is the beginning of being a free and independent country. Take my word for it. The extinction reoccurs and it is because of element in physics.

Below is a different stone structure worth review. This structure has the same survey as Stonehenge. The organization is less. This is because the calculus on the problem to be resolve was Still at it early time of development.

Dedicated to Gillian and Brett and the Tim, Kevin, Chris, Peter. Brother John.. Matt, Thomas,

Daughters of Liberty 1768-2004

President John F. Kennedy

SONS OF LIBERTY 1765-2004

Arc de Triomphe and the Dolmen are similar in the formation. The adults built the Dolman, because it is too heavy to lift the rocks. The children are unable to carry the large weight on their shoulders. The adult must carry the weight, and feed themselves, and their children during the building stages of these Dolman structures.

Rock cat

Rock man

Rock woman

Rock universe

"The rock is the flint of my soul"

The sociological structure of mankind, and the first structures are all important to learn about our human feelings. As love is greater than all the feelings! The particular parts of the structure in the Dolman for love must be the top, then the sides. The love of mankind for the physical universe, or species is this greatness.

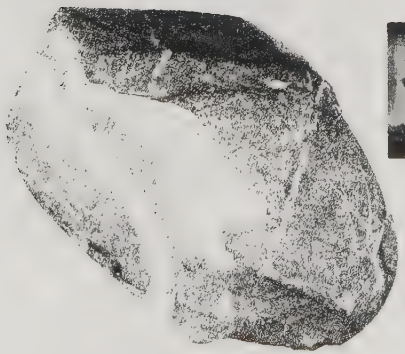
The death of love is at the end of the universe, and it is then alive for eternity. The structures on our cities will live for 100 years. These structures have live for eternity.

The science is social as well as physical. Through these interpretations man will be able to formulate a solution. The reason for all the commotion is, because man is still having no progress in the differential equation. This means that our education abandons the service of this stations.

The end of universe is decided by providing the end of the differential equation, the answer to the universe should not be harder than a tow of a huge stone.
The real challenge of having carried a huge rock a great distance is love. Love provides all the other sociological studies. Other philosophies will have a basic denial of love. However, love cannot be denied, because it is God. God made the rock, God made the roll, and God made love. Then the rocks fell, and rolled over the land? The reason why did this happen? The energy of the rock took off, from God power and force into a new beginning. The service of the many missing pieces of our history had been lost through the changing times. The detective agency that explains this to us, had also been lost. The first settlers are you and I, on the missing pieces of reason and purpose on the topics of having a structure survive thousands of years in one place. If this is the first reason on this issue, then the reasoning had been obtained from our survey. The matter of how many generations of people had this structure reached is a true phenomena! I realize that The Retile Age is important, it explains the country land changes and animal changes. The superstructures of the homo sapiens first civilization is still a mystery. The mathematics level to use physics etc., at this period explains more reasoning on the type of humans that were alive during division of labor in the three period s of the Stone Age.

The rock moving was a far reaching understanding of the mankind That was developed. The path that was taken to gather these rocks to link them to a separate universe so that the this would not be removed or detritus tour de force. The group and non conformers were determined to make this a place in the sun.

A place to be independent. To feel the spirit of enlightenment. The insight and knowledge that colonization at this time live and sheltered in. To imply a meaning to a world that would never be forgotten. The key to church and God rested at Stonehenge. This is a enclosure that may be a protection against evil. 31thousand years ago. This would be Neanderthal decants. Stonehenge and the other dolmen of Ireland, Scotland, France, Germany, were being established archaeological during this period. The reason for these stones setting is, because of the human characteristics in which were with the great forefathers Neanderthals. Moments were in style to say that construction brought a feeling of community and brotherhood.



STONEHENGE

Joseph Judge and Gill and Kevin

" The Parables of Christ", There are 54 Parables in which are in the enlightenment of New World and Old World. There are 56 signatures on "The Declaration of Independence". "The Salt of the Earth".
You are the salt of the earth. But if the salt becomes tasteless, what can Make it salty again? It is good for nothing, and can only be thrown out to be trampled underfoot by men. Matthew5:14-16

" The light of the World"
You are the light of the world. A city built on a hill-top cannot be hidden. No one lights a lamp to put it under a tub; they put on the lamp-stand Where it shines for everyone in the house. In the same way your light must shine in the sight of men, so, seeing your good works, they may give the praise to your Father in heaven. " Matthew 5:14-16

House on Sand, House on Rock

Everyone who listens to these words of mine and does not act on them Will be like a stupid man who built his house on sand. Rain came down, Floods rose, gales blew and struck that house, and it fell; and what a fall it had!" Matthew 7:24-27

The Conversion of the Scribe
" Have you understood all this? They said, yes. And he said to them, well then, every scribe who becomes a disciple of the kingdom of heaven is like a householder who brings out from his storeroom things both new and old." Matthew 13:52

Enlightenment is obtained by reviewing the prophecy that lives in our daily struggles. The belief that God is able to have position that pours in the enlightenment of the spirit. To relief the vexation of the spirit through prayers. The ascending from this from the useful help of God. That sense of help is the enlightenment for a better social civilization without the past loses being continued. The stream journeys down the mountain from the snow cap. Once lava excursion took place. A miracle occurred with the earth physical longitudinal axis, that created this marvel. The Colonies Daughters of Liberty and Sons of Liberty, all concurred that the physical Universe was made by God.

The British were primitive ancestors of the Neanderthals. The beginning of this origin began in France that was something as British sovereign. The primogenitor fundamental laws on this is explained in the first book of ,"My eyes have seen the glory". The assembling of troops offensive first began in the Branching forms as the Neanderthal. Extinction took place. However the assemble troops surveyed the continent of England. The consequence this brought was great men and women of courage, dignity, and the humiliation of extinction. The spear head of the things to follow in history, after extinction and separation of matter and energy. The law of nature, as the rules of morality, funnel through the matter and energy to form a contrivance of modern armies. This was in a rhythmical issues with being vulnerable from both mankind, and the animal kingdom. A full suit of armor to shield and to defend the voluntary motion of harm. The security against matter and energy of extinction.

The tolerance of not having peace was the enlightenment of that which also diminished life, and emotion, because of diverging trouble of many levels during the origin of man and woman beginning as an first settlers in ancient living..

To die early in life was never a performance that could be explained. The regular work in England during 30,000 year ago, with ancestors was to have alliance with death and with life equally. The Neanderthal branched out , and rank and power with primitive authority was born. It is not a frozen world although it is an ice age. The human race extremities, that keep the civilization and colonization intact was preserved, because of taking certain precaution The written books of survival.. To justify one's actions, and primary duties. As a defense system, and weapons. These understanding's was pantomimed on caves in southern France by the Neanderthal society. In which included in enumerated formation. Depiction of traumatic deaths, and vulnerability to counsel authority, as government. Through the years, the British sovereign took into effect the English territory. Inheritance of the crown, prince , and princess became the rank. The ideas of the American Colonials stemmed from the forefathers of England. Not to be a radical but to be a citizen of a great nation. The eloquence of enlightenment, while "feelin' groovey."

The man and woman are matter and energy, to say the least. Whether Panama Indian or Egyptian. The hospital would be the Sociologist that would take parts from this account to safe a life. Neanderthal crossed over from S. France. As ancestors of the Neanderthal then began to look for enlightenment on the elements of ice and cold. This exploration was a vexation, and psychiatric strain, due to extinction. Different phonetics from the Neanderthal caves in France took place. It is said the ice periods had zero survives that were in fact Neanderthal, on History Channel. Regardless mankind ancestors were Neanderthal.
Reason in defiance of survival ends and the universe ends. These ends are postponed pre-death. Man and woman and child are justified by the living period. The thought of why they are alive is not a topic. They think, therefore they am. As Rene Descartes philosophy is, "I think, therefore I am."

" The Declaration of the Rights of Men and of Citizen", dated: August 26, 1789, by the National Assembly of France and attached as the preamble to the new constitution of 1791. Provided a number of Rights with which " all men" were held to be endowed and that were described as inalienable, as supplied by Thomas Jefferson, Ben Franklin. In which nullified the Kings to rule in which was the old age of the French government.

This argument presented to all of the world. That the Kings power to rule was always a deficiency in rights. The Stamp Act declaration was pre American Revolution that corrected this deceit. The developments of how to be a free country is and was never obtained as a utopia government of the French Declaration of Rights. The procrastination of why this was never able to be reach is, because of the duties of the nation not having the means to this end. The old extinction in the geographical location of Neanderthal, obnoxiously effected the population in France during the "French Revolution". The utopia is a thought that perhaps the world would maintain a great level of humanity. The apprehension of class structure as nobility parachuted off the paralysis society in the "French Revolution" So to speak. This normal action to descent from the hardships of poverty. The Theory of equality in wealth would change the poor level. This would be a defense system against poverty. If the defense against poverty is nullified, then the first step in the right direction will also be denied, on the war of poverty.

The four photo's and one drawing on page 93 of Stonehenge in Wilshire England is reviewed because of the loneliness that it has being with a answer to the disposition that was in pursuit many moons ago.
Mans ability to reason on the exact reality of this structure.
He is saying that he is a Rock expert in the physics. The physic provides a moon obit in to the harness intellectually calculated on the science rock formation. Therefore the moon is important for the destiny of mankind. This civilization had provided the moon to examine closely. The moon being a symbol of the circle of what the earth is portrayed. Both Dolman structures and one Stonehenge means the summit of this Calculus. The Dolman' and Stonehenge are the greatest structures in History, being still functional for the exact same use as plan by the Architect. Understanding, on the moons power to feel a rush of bliss from its Cosmos is secondary to the issue. The moon confirms changes in the environment. The moon is thought of to have a solution to the civilization that lives near by. The moon is placed inside the structure and is reviewed by the smartest brains in the History of mankind at this time. The IQ of this individual is as great as anyone IQ in lieu. The first survey is, putting matter and energy against the grain of the cosmos of the vision and light of the moon. " And we dance by the light of the moon":

The children in the picture are as I was a child and before I was born were children. Emily Dickerson stated, " That I am nobody, who are you? Are you nobody too? Then there is a pare of us don't tell, there vanish us you know. How dreary to be someone, some like a frog, to tell your live long days to a admiring bug."
The rock structures are left to nobody? The facsimiles of the structures being established in huge stones, that appear to be office structures without people inside. Empty cities are the impression of the structure. All that remains is the spirit of mankind.

The enlightenment of geo metric physics in which is calculus surveyed. The mere fact of the mathematics in use displays that This civilization had been aware of the Light/heavy engineering Of 21st century College Graduate Engineering levels. This is the proof. The oldest Alphabet letters coming out of China 3,000 years ago. The example of five letters. The issue in fact of the mathematics Of these structures of 200,000 years ago including the oldest in Ireland, indicates that the established five letters must have been A remains of a greater power that was well discovered by modern Man, Pre dating 200.000 years ago.

This structure in the same geographical local and built for no other reason but to keep the spirit of mankind alive. As a sociologist the study is perfectly evident, without delicacy. Furthermore, that the work of Stonehenge brought English Anglo Saxon characteristics to a new height. That determinism was forthwith, in the human acts and social changes, and results beyond human control.

nearby **Deserted farmhouse on the Burren of Ireland**

The special Characteristics of the " Dolman's and Stonehenge " are issues that are fact's to their existence. The multiple Dolmans are unique and that the uniqueness is for eternity. Pictures on page 95 are surveyed within the Cenozoic period. This being connected to two other periods during this era. Mesozoic, and the Paleozoic. The next issue in fact in our survey that cannot be an argument is, the builders are from The Stone Age. This Age extinction changes of the Dolman's civilization was a factor. The geological intervals teach us about these changes in extinction of these late Neanderthals. The late Age of Mammals. The late stage of flowering plants and vegetation in evolution.
The flowers may of inspired the builders. The smell of roses in a field. The flowers are new to Europe, in the beginning of the Age of Mammals. The fact of these Dolmans productions, and Stonehenge is as follows. The composition of the project was a skilled architect capable of having a large work force to work and eat on the extinction of this civilization. The project movement was pure external force, and excessive exertion. During this time the skill architect was putting alterations on the form of the stone to change stress levels of force, and thrust. This being the a type of Mechanical Engineering skills. Graduate level College. The journey to the correct rock was distinguished to carry away to a foreign land. Sometimes crystalline limestone, capable of being used for fine architectural work. Vein like marble or quarts, embedded. Each dolman is usually accurate between quantities or magnitudes, and operations. Most laborers required strength rather than skill. As it required much work to provide this project. The sizes of the Rocks for dolmans usually are huge with the use of pure mathematics to obtain the piece, almost as a safe cracker in most cases. The pilgrimage with the glacier is without a flaw. After many issues in fact on the merits of the right geographical locations, the final lifting takes place. The huge stone is taken to a mathematical survey of lifting off the ground and in place on the threshold of the Dolmans. The huge stone presses firmly to the earth, enduring the neutral position for eternity. The survey of the mathematic in this case is used for multiple reasoning in logic being at Calculus 111 college level. The earth surfaces, the position of the sun, and moon, and universe above in astronomy, for example, essentials of the fortifications. The rays of light in most cases are surveyed into the account, as an axis in lieu for rituals for the Late Stone Age habitations.

The Dolmans rocks were a far reaching understanding of the mankind that had gone extinct. The path that was taken to gather these rocks to link them to the universe. The group and non conformers were determined to make this a place in the sun to smell the roses. To have the spirit of enlightenment driven by modern man fortitude.
The insight and knowledge that colonization at this time is able to teach in the minds of all men. To imply a meaning to a world that would never be forgotten. The key to church and God rested at Stonehenge. This is a enclosure that may be a protection against evil. 31thousand years ago. This would be late Neanderthal. . Stonehenge and the other dolmens of Ireland, Scotland, France, Germany, were being established archaeological during this period. The reason for these stones setting is, because of the human characteristics in which were with the great forefathers Neanderthals. These Monuments were built, in community and brotherhood. As Humanistic Psychology regards mankind. The Dolmans projects were rejoice from despair! The solid changes of the earth surfaces were not a concern while having to establish a Dolman center. To keep busy ,telling these survivors, that they were going to be all right. Regarding the education system at this time, appears to be hope of survival of the destiny that had been experienced in early Neanderthal. The environment changes and Ice Age issues are not ruled out.
The drastic sudden impact, as what occurred in the Age of the Reptiles May of occurred during this time? Man food supply was good!
The Pyramid dolman in Ireland is the first Pyramid ever built. It Pyramids down into the earth. The below surface would enable survival of an Ice Period. The early Neanderthal civilization lasted for 100.ooo yrs, who migrated from South of France to Ireland and England. Based on Coastlines and Emerald Sea; Then placed Pyramid dolman and other models. The sea always has food! Ireland is mostly coastal seas.
The high rock cliffs are many. The puffin birds fly through the sea Cliffs, and finds fish to feed the fisherman at this time. The puffin is as great as the parrot. The parrot of Ireland. It is said that one could find treasure in this land of Dolmans, as wild emeralds are found daily on the road sides of Ireland, in route to the visit to the dolmans. The fish and farming were not enough substance for the late Neanderthals. The greatest Hunters and Gathers, who went extinct in early Neanderthal times in France. Belief to had a crisis that was based on an extreme sudden hardship. Some Neanderthals escaped and made a life in other countries as England and Ireland. Only to be extinct by the same type of discourse?

The Origin of the word dolman began from the two Breton words Meaning " Stone Table" . Of the Geological Intervals of the dolman, I am able to study a certain elite character. Recalling the time of Hitch hiking to Randy Ruland Ranch. While I was on the ranch I Collected old wood laying around and build a bureau table. I called it the Bureau. Much to my surprise all these tables are recalled from the corridors of history. The symbolic meaning of table has four legs, and a place to hang a mirror, to reflect upon one self,and ones universe, just as these civilization had done long before bureaus were conceived. This is the general science of these studies.
The only thing that is not the same is the manners of issues that these Civilization had to deal with. The dolmen, and Stonehenge periods. To put these rock forms together in certain places. The crossing of Mountains and country range. That were of great travel with 25 tons slab stones. Through numerous streams. Notably travel from one country side to another. Crossing streams and in some cases oceans. Today, and history of these accomplishments are a archaeological wonder. That the fact remains that these people, were moralist, and architectural minded. This issue is a bridge to formation of Church and community. Consisting of materials produced through natural science. The theme is concluded that, mankind will develop a solution to an issue, as a Dolmen chamber. That the idea of these Dolmen were the temple of their brain as a collective society. The means to and end theory is answer by the fact of the physical rock size being carried .The many dolman sizes vary. As shown in the illustrations the massive sizes of the stone pieces have measured to 170fl. High to 316 ft long. At the many countries locations, as Italy, France, Spain, Ireland, England, Spain, Japan, Greece, and Germany. All done with stone tools. Within the Neolithic era. The Stone Age, done by Stone workers. Within the greats of mathematics, and engineering skills.
The miracle to perform these endeavors is important to respect. This is to say, that man is justified, and is purposeful to the Impossible levels of the physical universe.

The power of the project of dolman is important on the study of the Stone Age. The first known period was the Neanderthal period, characterized by the use of Stone Tools; Generally this period is divided into the Neolithic, and the Paleolithic, and the Eolithic periods in our history. Taken a symbolic survey of the thousands of Stone workers in different countries having provided the dolman into account. There is a cave completion. The cave of Neanderthals being perceived in the various locations. The theory of coming from a cave in the origin of the species, and Neanderthal descendants. The conception of man' ascension from a cave
he built himself as the cave in which his life began can be possible. The cave is conceived by supernatural 5 element in the mind. The model of this cave is restored, to concur that man became man through a cave structure in the 5th.dimension. The long way to the truth is evolution, that needs a revolution on the merits of truth. To teach the cripple to walk, and the blind to see. The poor to be Rich, the birds and the bees. God was the enlightenment that was the key. Guiding behavior, through stormy seas. The time to erect the memorials took years. Through the times of lack of health and consequences. The certitude of death. The certification of life in the here after. Enforced by a spirit that is the spirit pre-revolution. The spirit that prearranged the destiny of this faith. The spirit of Independence, and good will to man. From this the World history Developed the philosophers of justification and a moral hero to the Cause. This existence must be analyzed beneath the structure of Mankind. The high powered history will penetrate almost any kind of means to and end. If man explored the realm of the struggle of his ancestors. There is a mountain that each of must climb. Why do we climb this mountain is, because it is a experience that brings the world closer to the understanding and enlightenment it must have. The purposeful, to awake in the forest of life. To smell the flowers, and to kiss Gods Children, and to thank God for everything that has been given to the physical universe, both mind, body, and soul. The leadership is both in the valley, and mountain top. The world is a climb, whether its up or down, it is never at a stand still. To lose your way, is to remember that you will find a new path to travel. The fate of the fact that the mistake was the correct way. This helped you learn about the road not taken. As Robert Frost stated, and that was made all the difference. The road is flowering freely for a happy universe. The dolman are the fossils of the universe as mammals,...

Chapter Five " Democracy"

The Women rights became great during, Susan B. Anthony period..
The Women Christian Temperance Union, and National American
Women suffrage Association, during 1890.National attention rose
When Susan B. Anthony , voted in the Presidential Primaries in
Rochester NY. Susan B. Anthony was arrested, prior her conviction
She was quoted as stating, "Resistance to Tyranny is Obedience to
God." Utah in 1870 saw the need to allow the women vote. This was
Granted because of the Mormon Church. The Mormon practiced
Polygamy by 1864. They colonized in Wyoming and got the state
To provide women to vote. That Franchise was God given right.
During the mid 1900's China, Japan, India, Italy, and other countries
Gave the right to vote. Susan B. Anthony liberation with suffragist
Her impute was U.S. Constitutional History for this factor..
The past destitute of power became emancipated. As the treaties and
U.S. Constitution was ratified. Suffragist was purposeful during the
Hoping to obtain the rights men have.
This was first tasted during the Colonial 1776 period.
When the women served in the American Revolution.
As the greats were along side their husband .Many Women
War Hero's. As Susan B. Anthony was, a suffragette. The
facts on the merits of colonist founding a colony, from the English
colonized in America. British women were for the most part the
same as Daughters of Liberty. Thus, the men were the colonized
Son's of Liberty, being Britannic.
The sociological and psychological variants from England were
in several forms entering the New World. Therefore, the study
of each of the finding fathers as above, is a product of the English
environment. The great knowledge of these finding fathers was
from the intolerance of an oppressed society. After ancestors endured
the worlds apart, there inner self was revealed. There are many
great things that came from this obstinate past. The best is yet to come.
The understanding on the colonization issue stated above. The
music of the inner being of enlightenment. That America's
enlightenment was from being free from the oppressors. To
examine the improvement of this problem, through great work.
That it was as a petrology examines science of rocks. In order
For the salmon to live. The provisions of first leaving England,
Being a gypsy, than a colonist, than a free man. These are the stages.
The science and study of cause and effect.

To put a spot light on the theoretical theory of what is the keen principle
On what America is most enthusiastically to keep in mind.
March 23, 1775 Patrick Henry address to the 2 Virginia Convention.
" It as nothing less than a question of freedom or slavery....
Our petition have been slighted , our remonstrance's have produced additional
Violence... The battle, sir is not to the strong alone, it is to the vigilant, the
Active, the brave.... Is life so dear or peace so sweet as to be purchased at the
Price of chains and slavery? Forbid I, almighty God! I know not what
Course others may take, but as for me, give me liberty, or give me death".

The roles of the colonials and theories. The primary goals were
to maintain freedom. To live in peace. Was this a delusion, imagining
these dreams. Once the colonization was administered. The next
phenomenon was to gather together a New World solution. The groups
new during the crisis that death was why subcultures would maintain
themselves as the Daughters of Liberty, and Sons of Liberty. They
were carpenters, shipbuilders, blacksmiths first family from England.
The flow of the thoughts on what to do about the situation, coming
from Great Britain , and being of common wealth. The weakness of
lack of freedom will have a excessive denial of enlightenment. This was
what the mold of thought believed to be the problem. The King
in Great Britain, weakness was not the same. Treachery was never
resolved in Great Britain during the early colonization. The haphazard
weakness from the oppressor. The triangular reasoning and the un-
reasoning from European nobility became deleterious. This is what
started the hypothetical beginning of the American Revolution.
The reasoning was illogical to use the situation of means to and end.
However, the soldiers from Britain would stop the new frontier men,
and demand their property. This making the resistance from the settlers
occur, and either lying free or dying free theory of cure. The homeland
in Great Britain closed the opportunity on America to be free. This may
of been a mistake to have colonization with England after the result was
to exploit the civilization from the commission of being once English.
Regardless, The golden rules of the 13 Colonies and thereafter was in
the same framework using freedom as the medicine. The things that
could of prevented the American Revolution, as all men were brothers,
and all women sisters as a brace. This congested the civilization, at this
course in history.

Rose Kennedy , at Boston College with her Child John F. Kennedy, where she attended. Both John and Jacqueline, were guided by the enlightenment in which help raise their Children, John, John and Caroline. It is an easy life to live, as life is a bowl of cherries. The life of a Kennedy was as a life of a Judge. As we are equal in the eyes of the Lord. Psychologist Jean-Jacques Rousseeau. His study that children are only born within good character. That because of this it is a power that provides independence from their parental parents. In the case of repressing the child behavior. That little constraint should be applied to the children. The no pressure should be provided in the child's life. The child should exist in a free state. To act with the child will, and not the parent will. The destructive force causes psychological harm to the child. The education system is critical to the do's and don't, and the in betweens. This understanding is in hope agencies as the U.S. Children Bureau will provide a free hope and cope environment. The City schools are requested to spare the children from undue hardship and denial of what the child wants to do with his or her space in the time to have a period of learning. The same provisions should be given with Social Working. During Rose Kennedy 100th., Birthday I award her a Plank that was Blessed by Father Frank Of Hope House in Port Jefferson. The plank was the inauguration1-20-61, of her son John F. Kennedy. The world is awaiting the living. After this, it will remain for the people who had past away in the boundaries of the earth. Therefore, the explanation is, " to care about the life you are living, and to not fear the life hear after, because the" Lord is your Shepherd". " Every American ought to have the right to be treated as he would like to be treated, as one would wish to be treated, as one would wish his children to be treated." John F. Kennedy television address on Civil Rights, June 11,1963 .

on November 4, 1952, John F. Kennedy, defeated incumbent Henry C. Loge, Jr., to become the 3rd Democrat in History elected to the Senate.

The Characteristics of orphanages, and children shelters are places that our government must be aware of on a daily bases. These places are never places where children and young adult children are able to be free. The issues are with in a school of thought that is neglected.
There are several types of delicacy. First the same money as applied Into outer space should be available for this inner space reformation. The government has to provide this interest. As it is applied with The U.S. Constitution Fourteenth Amendment, " Poverty and Fundamental interest." Under the Education opportunity. The Solution is not abortion, it is, " equal protection of the law." Research collaboration on places of the topic reviewed to give The accurate measurements of the detrimental institutions can be found where ever the issue is occurring. A full turn around on the community at large is the most desired beginning. The Congress should hit each place where there is a little kid, or a bid kid ,recalling, the system in which the institution dose it service to these kids. To enclose the law and adjoining penalties of violation of this law. The help that these institutions are doing may be causing psychological disorders to the children. Lyndon B. Johnson message to the Congress on March 16, 1964, provides; "Because it is right, because it is wise, and because, for the first time in our history, it is possible to conquer poverty. I submit, for the consideration of the Congress and the country, the Economic Opportunity Act of 1964. The act dose not merely expand old programs or improve what is already being done. It charts a new course. It strikes at the causes, not just consequences of poverty. It can be a milestone in our one-hundred eighty year search for a better life for our people. This Act provides five basic opportunities. It will give almost half a million under privilege young Americans the opportunity to develop skills, continue education, and find useful work It will give every American community the opportunity to develop a comprehensive Plan to fight its own poverty-and help them to carry out their plans. It will give dedicated Americans the opportunity to enlist as a Volunteer in the war against poverty."

Continued on page 103.

Belonging to Modern History Sourcebook : President Lyndon B. Johnson: The war on Poverty, March 1964

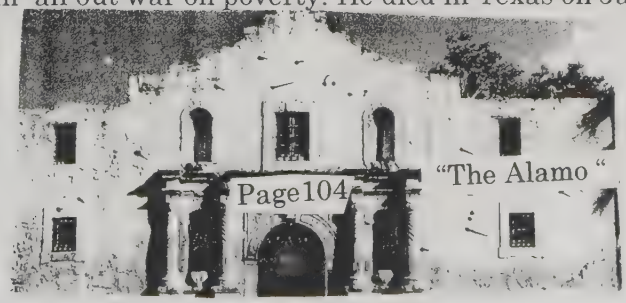
Proposal for a Nationwide War on The source of Poverty.
Lyndon B. Johnson's Special message to Congress: 3-16,1964
Continued from 102.

" It will give workers and farmers the opportunity to break through particular barriers which bar their escape from poverty.
It will give the entire nation the opportunity for the concerned attack on poverty through the establishment, tinder my direction, of the office of Economic Opportunity, a national headquarters for the war against Poverty.
This is how we propose to create these opportunities.
Step 1. We will give high priority to helping young Americans who lack skills, who have not completed their education or who cannot complete it because they are too poor...
I therefore recommend the creation of a Job Corps, a work training program, and a Work study Program.
A new national job corps will build toward an enlistment of 100,000 young men. They will be drawn from those whose background, health and education make them least fit for useful work....
half of these young men will work, in the first year, on special conservation projects to give them education, useful work experience in job Training Centers....
A new national Work Training Program operated by the Department of Labor will provide work and training for 200,000 Americans men and women between the ages 16 and 21. This will be developed through state and local governments and non-profit agencies....
A new national Work Study Program operated by the Department of Health, Education, and Welfare will provide federal funds for part-time jobs for 140,000 young Americans who do not go to college Because they cannot afford it.
There is no more senseless waste than the waste of the brainpower and skill of those who are kept from college by economic circumstances. under this program they will , in a great American tradition , be able to work their way through school....

(Step 2). Through a new Community Action program we intend to strike poverty at it source- in the streets of our cities and on the farms of our countryside, among the very young and the impoverished old.

This program ask men and women throughout the country to prepare Long-range plans for the attacks on poverty in their own local communities....
(3 step). I ask for the authority to recruit and train skilled volunteers for the war against poverty. Thousands of Americans have volunteered to serve the needs of other lands.
Thousands more want the chance to serve the needs of their own land. They should have that chance.
Among older people who have retired, as well as among the young, among women as well as men, there are many Americans who are Ready to enlist in our war against poverty.
They have skills and dedication. They are badly needed....
(4 step). We intend to create new opportunity for certain hard-hit groups to break out of the pattern of poverty.
Through a new program of loans and guarantees we can provide Incentives to those who will employ the unemployed. Through Programs of work and retaining for unemployed fathers and mothers We can help them support their families in dignity while preparing Themselves for new work. Through funds to purchase needed land, Organize cooperative, create new and adequate family farms we can Help those whose life on the land has been a struggle without hope.
(5th step). I do not intend that the war against poverty become a series of uncoordinated and unrelated efforts...

Lyndon Baines Johnson 36 President of United States, born August 27, 1908 in Stonewall Texas. Silver Star for bravery in the Navy Pacific, following the Pearl harbor invasion. . Elected into the U.S. Senate in 1948 at the age of 40. Senator Johnson ran for president in 1960.
He was unable to win, and accepted the Vice Presidency.
Vice president Johnson was in another car in Texas, prior to the Assignation of President John F. Kennedy. President Johnson, Began the issues that President Kennedy wanted done by his office. As the Civil Rights Bill, the voting Bill, the Medicare program for The age. Further measures to improve education and conservation. He began an all out war on poverty. He died in Texas on January 22, 1973.



"The Alamo "

Children are the most ingenious and resourceful. They live their days in a world that belongs only to their perseverance and triumph. The society is deficient to accommodating their abundance. This is where the lack of abundance is narrow. To correct the problem of this gap is the guidance of State and Federal and each one of us. In Maria Shriver Books, she explains steps to support the children needs. the fact that they are zealous and adults are not is a gap that needs to be closed. The mistake that is given to explain the lack of corrective planning is, when the buck is pushed on the third world.

The Third world not having been won, on the War of Poverty. Comparing and analyzing the poverty of a third world nation, to the Fact why our children are not in need of the accessible steps to their greatest potential. The children have been divided by ages. They need a new division of chronological order. The one used is ok, but its missing the ball. The time our social orders that provide the divisions that will be for our children is less time then operations for the adults. By just examining the times that a golf driver and ball have been changed to go further, and to be improved. Corresponding this method to this problem would improve the issues greatly. The fundamentals of what is right with the child is better than what is wrong. American Philosophers are not able to write a philosophy that would be able to deal with the universe in the practical behavior of children. The Back cover has children who I dedicated the book to. They are my family through other members of my family, both brother and sister. I can explain to the fact what they are face with, and to the fact that advancement is greatly needed. The time and space of building golf clubs and balls. I have survey endlessly.

Albert Schweitzer caring for an African child at his hospital in Lambaréné, Gabon.

" We have talked long enough in this country about equal rights. We have talked for a hundred years or more. It is time now to write the next chapter· and to write in the books of law."
First State of the Union Address, January 8, 1964

" In the land of great wealth, families must not live in hopeless poverty. In a land of healing miracles, neighbors must not suffer and die unattended. In a land of learning and scholars, young people must be taught to read or right." This administration today, here and now, declares unconditional war on poverty in America. For the war against poverty will not be won here in Washington. It must be won in the field in every public office, From the courthouse to the White House. The program I will propose will emphasize this cooperation approach."

State of the Union Address

During the 1964 election for President, I have campaign for his office. The democracy information about the development of this election had been introduced to me at 9 years old. I place posters up on telephone poles with my friends. I handed out information through out Hicksville, about reelecting LBJ for President. I devoted hours to the campaign with neighbors and their devoted pins and posters. We would rally, and run all over the place telling the town to go out and vote The devoted John F. Kennedy voters should keep LBJ in the White House.

The election was a landside victory, and everyone celebrated with a party. It was as if it was New Years eve in New York with the City and the fun. It was as if we won the election. That LBJ was Our father who won the election. I never understood the politics that existed at the time. I just new that LBJ was a great man. Reviewing his issues in the White House, it is clear that he was a great President. That his points of facts should be maintained by many of the golden rules of our leadership. He stated once, " All I have I would have given gladly not to be standing here today".
First address to Congress as President, November 27, 1963
The lost of JFK and his sorrow was acute. As a sharp knife in his side. The issues of this administration is never to forget the issues that these great men lived for. To reacted and establish the amendments, and to provide the plans of being a greater America.

Our world in the many civilizations of man is developed in gaps in history. The gaps are generally when extinction had occurred for this survey. The year of Stone Age is gap of 100.ooo yrs., Dolman structures are historical constructions of this period. The gaps are time periods. The gone but not forgotten civilization will also be the Neanderthals. The universe must house these memories. The gap of this being all BC.: This particular gap is narrowed down. The Stone Age is the longest gap. "What's Heaven" " Mrs. Kennedy", "Maria Shriver, explanation on to the children on death". To pretend or not to pretend, that is the question. Regarding the issue of being dead. A psychological disorder will not occur if you explain to your child that everything is all right, when everything is all wrong. Due to having a death, and avoiding the unconditional involuntary action of mourning the lost one. The society maintains the death as a normal issue, that is accepting the fact that death and extinction are an issue and to live with the fact, that it is going to occur to all of us. To console the close ones, and allow the console to be understood, is what the Bible teaches us. The saddest action is not having one. To be immune to your family member dying or close friend. To relate that he is better off dead. The death of elders who died off. To have a tear is very dear.To go and cry in lieu, is growing up in the school of hard knocks. For the past twenty years my Brother Richard, and his wife Cindy, had worked with the emotionally distributed in Glen Cove NY... Along with my sister Frances and my friend Brian O'Reilly the Boxer. My friends the Elsbree family establish a camp for these groups in Pennsylvania. The reality of helping emotional disable or physically impaired, is a great goal to making you an asset to mankind, and yourself. The enlightenment of the Stone workers in the Stone Age is to carry a Rock and placing it geometric style for a push into the right direction. This action was done at a self sacrifice level. The self sacrifice is always what God wants your to do. To give of yourself. Is greater than to give of your possessions. This must be construed in the Dolmans enlightenment. I was a big star in modeling. One time I was in Paris modeling for Pierre Cardin fashion show, 1979. I had two shows, one in the mourning, and one in the evening. During the period of time between shows, I went out in the Paris Street, and perched about the Lord. There was a problem with me doing the second show, and I almost did not get pay for the first show. What happen? How come I was denied the right to talk about the Lord in Paris? This was the last time I would do the fashion show in Paris. I usually do not preach to anyone, because I am shy. It was a self sacrifice that I made for the Lord.

At a religion class at Lincoln Hall, Brother John was teaching the Parables of Christ to his cottage of 45 children. During the class, I asked him " what is heaven"? He explained to the class, that Heaven was compared with a jar that is full. That there is no more room to put anything else into it. That it is full of happiness to this degree. That some jars are bigger than other jars. That all jars work with the same principles of the happiness to the fullest."

In Maria Shriver book, " What's Heaven", she answers the question as a mother. The book intended purpose thesis is for the parents to talk to their children about death. That faith and God, as Brother John taught, is in the book. Regarding the soul, and providing issues of enlightenment.

The regards with what is heaven? In the over all survey about the issues of what do we do with our life's are parallel to each other. Life is meaningful, because there is a life here after. That Maria Shriver education at Georgetown University had been educated in this book purpose. That the teaching at Georgetown are learned in her writings, as Brother John scholarship. One being a Judaic Christian , the other Jesuit. The act of God is an important Power to having enlightenment on the life process. Remembering exactly what is needed to build a great future for children. Our ability to react to a crisis as death is a subject matter that always needs a mother and child joined force. To explain that the life of our love one, has gone on to heaven, as she explained to her child Kate, Grandma Rose Kennedy. The many visits to Hyannisport MA., to visit the Kennedy Compound, because of the merits explained on 109.. My trips to Hyannisport was based on my mothers divine love for John F. Kennedy, and Father. As I explained in my past Novel, " My eyes have seen the glory". The many times that I had To protect President Kennedy picture from being seen by the others in my dormitory, was a great factor. That the photo was of President John F. Kennedy, sitting in a format as the Lincoln memorial in Washington, D.C.: That I was given the photo by my Mother at my home on a visit from Lincoln Hall I refused to take the picture, because it would make me sad about being away from home. Then Joseph my baby brother took the picture with him to the train station, prior to boarding the train, and tried to hang me the photo. I told him know, I did not want the picture.

A short time later, my Mother wrote me, and mail the picture to me. The first instances the picture of JFK came out of the envelope that is open either by Brother ,or Mr. Burke. This time Mr. Burke, it flew across the room, with a special style that looked as it stopped in mid air, and did a design and then flew further. I chased the picture, and tried to catch it before it landed on the floor. If you ever saw a we gee board place letters together, by a special force. This issue appeared to be 1,000 times more intense than a we gee. I new I had to guard the picture, and that is why I did not take it with me. Mr. Burke, said to him self, what is this? He then thought that he throw this picture. When he open the letter to read the mail, the letter took off by it self.

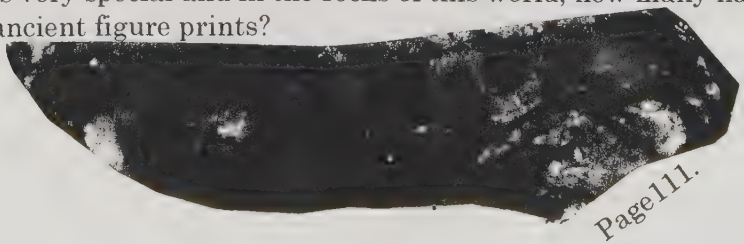
At Lincoln Hall, I had to keep chickee on the picture getting ranked out, or that I would get ranked out by the other kids. I hid the picture, and each day and night examined it. If someone in the dorm look at me, I protected the photograph. One boy saw the picture, without me showing him it. I then had to show him the picture. He was impressed. He did not make a fool out either John or myself. He and Brother John were the only two people that I new saw the picture. Brother John saw it, and was also impressed. Therefore, I had developed a great love for JFK. as a result, I visited the compound, and brought a gift for Rose. Another time, I brought a plate, that was early Victorian from Ireland. I wanted to show the Kennedy family the deep love that I had for them. That my Mother and Father were with me on the trips to their abode. My Mother soon after being sent home past away from cancer. It was Hardship, that I saw at Lincoln with other Children who lost their Mothers. The drama unfolds and the home sweet home, is never again. The religion studies and the conditioning about death is never enough, when the time comes. I watched two boys lose their mother suddenly. One of the boys bed was next to mind, he may of see the JFK picture? However, his mom died, and he was left there to die also, as he had no other parents. Every night he would cry him self to sleep. He could never depart for a visit, and the cottage had to leave him behind. It was a hardship, that could not be matched. The other boy, saw his Mother on Sunday, and she when back to the Projects, and fell down a few flights of stairs. He was never the same, and he never obey the rules of the cottage, in which means death. He broke a three year loyalty that Brother John adored. This means he never came back from his home visit. He was too broken hearted. The two boys and myself, all had one thing in common, we were shocked about the deaths of our mothers.

The disposition on the merits of the explanation regarding the way to treat death. I have review the statement of death being eligible for a great life in the here after. That your love one is a member of God's team, and this is the time to prepare to learn about The Kingdom of God. The matrix of the issues of death. On page 38, in the book are pictures that I took of a rock . To waive the procedural safe guards that there is no proof that this rock is a rock with the explanation of death stamp on it. It may be the explanation of life. Between life and death a early settler of Cold Spring Harbor shipped in this rock, from some where else, other than Cold Spring Harbor. The power of the rock is analyzed from the dots. The dots designed not to ever wash off. The rock is designed as a sheet, in which is printed on by hand pressure to figures. This is done near the edge on one side. Not center, or off center. The rock was chip out in the center. There was no curved chip away in center, more of a squire. The way that the rock was used was to hide the meaning from a society that may search for remains where the rock was buried. In which was approximately a burial ground. The descents of extinct civilization of North America. This is the original document exhibit belonging to the group that used dots. Dots made from trees, mixed with soil. A real challenge to try and copy. The time that this rock was printed with dots is form of sign language was used. The sign of a spot is for this survey a human being. The big spot is where the family member is bury..
The curved open chip in center is abstract. I have thought that the open chip was before the resting place. Or that after death the body dose not remain in the ground. That it goes on to Heaven. This being explained by the white quarts almost as a water fall coming out of the chip center. There is a chance that this rock is marked without due cause.

The first issue on the writing skills dose not happen in North America for long time. There is little actual history written. The History that is written is as above. This is the scholar of the family, not like the rest of the civilization that went extinct. He was able to write his family tree survey. To share with issues that apply to a group and death. It is appearing in caves of Neanderthal dots. Experts explain other issues regarding dots. The weather and the hunt has been incorporated in the concepts of dots in these caves. The stone being carry to Cold Spring Harbor by boat. In the time when boats were used to travel through ocean. It is possible that this rock came from across the ocean?

The closest relative to my survey that exist in language usage after the Neanderthal caves, is the" Dead Sea Scrolls". This is from 200 B.C., to 66 A.D.: The Scrolls explain The civilization and learning center of this society. It is actual account. This area exist between Israel and Jordan, in which is the lowest water surface on earth. The aspect of death is reviewed in the Scrolls. That it is stated that Kingdom of God, and Judgment Day. This is a early written study. It enables the history of the particular people civilization having evolved to a level of this magnitude.

To take adventure across the ocean in a boat that is not found in the area where it docked is a problem on what is the issues from the old remains. As the ocean meets the shore, it took off the shore the remains of the boats that carried the civilization across to the Cold Spring Harbor. It is not known how the history of this great adventure is possible without a boat. There must of been a boat that made it to the shore. It was in need of repairs and was most likely discarded. That it was easier to built a new and better boat, then to reuse. This time period extends long before the last Ice Age. The history matrix of what existed at this time period, and what exist today. The first issue is the development human beings through sexual reproduction. As a child becomes adult in biology. The Ariel view from the stars is also the same. The navigation in the ocean had been improved. The storm is still a storm on the ocean Therefore calculating conditions that existed for the party taking this stone from a mountain across the ocean previous position. That dots could be used as a calendar period. The chance of survive in ocean is very slim. That center chip is clear. Free from the worry of the death by ocean travel. The ruler and evil are not able to be comprehended, as the Dead Sea Scrolls. The other middle Eastern countries pre B.C. had conveyed in writing and sign language. The rock on page 38 .must have been long before the invention of English language. There is life and death and in the middle there is time to wonder about the scent of a rose, and a child question for the parent or brother regarding physical universe, or to just be. This rock is very special and in the rocks of this world, how many have ancient figure prints?



The reasons that I used Dolman structures predating all structures is, because if you had come to earth from another planet for example, one would analyze a dolman being the first structure.

To build a Dolmen chamber as explored in this book.
The mechanical engineering of this accomplishment without knowledge of Science, and bull dozers and cranes, just determination.
The Dolman, and Stonehenge structure once completed is a Beacon of light to the world. This is also a great souvenir from history.
The super abundant prairie as a natural science consisting of the oldest settlements in history. The philosophical justification to have individual' of this magnitude is the justifications of carrying stones.
To explain the mental hygiene of this civilization.
Notably the triumph from the travel is in the enlightenment of God blessings . This was a small token of their esteem. The Hearty good wishes of the physical Universe. The empathy prairie is No longer canceled out. It is now pasteurized with the idea of how did these people take this stone to the prairie and place it on the top of two boulders. Even the prairie dogs would wonder? This fundamental law is what the idea is all about. There is no bind by obligation, no constraint. The homage pre-establishment and wonder. The certitude of thought shared by both man and animal. The structure prefabricates human bondage. Accommodates the stars the moon, the sun, and each one who needs a friend. Recalling Sgt. Pepper lonely hearts club band. The individual person is paralleling with the Dolmen as the center of the universe.
The molecules to have the center of town being the threshold of a Dolmen.

My visit to the stone structure's is still pending. First to put soil from The Battle of Bunker Hill, on General Lafayette grave as a traditional service. Through exploration modern man is able to think and to decide from being able to look at a Dolmans and Stonehenge. Dose the power of strength in lifting a rock and carrying it bring the character of the human being closer to the granite of the rock? The rock is closer to the Stone Age civilization than present day. I once carried a rock on the bus to Washington D.C., to give the Rock with a personal painted design on it to Hillary Clinton. The rock was for Hillary garden, in which stated "Hillary Garden". The rock was extremely heavy after a short time. The Stone Age Dolmans rocks are a trite greater in mass and energy. The heart of all civilizations must be conceived in the Stone Age periods, by their efforts to provide our society with these superstructures. A term that must of come from these periods.
To lift the world off your shoulders and put it back is a "Tour de Force".

Equality is the exact measurements in physics.

The End.
